Participants Needed for Autism Research

Stanford University researchers are currently recruiting individuals with and without autism to help study the biology of **neurosteroids** as a possible biosignature for Autism Spectrum Disorder and other neurodevelopmental disorders.

To be eligible for this study, you and/or your child must be:

- Between ages 3-45 years old
- Have a diagnosis of Autism Spectrum Disorder (ASD) **OR**
- Be in good medical health and without a severe neuropsychiatric disorder
- **AND** be willing and able to complete cognitive assessments (i.e. IQ testing) and be willing to provide saliva and or blood samples.

**Participant will be paid up to $40.00 for his or her participation. Families will be provided results of the cognitive assessments if desired.**

**There is no cost to participate in this research study.**
