

STANFORD MATERNAL AND CHILD HEALTH RESEARCH INSTITUTE Bridge Support Policy

GENERAL

The Stanford Maternal and Child Health Research Institute (MCHRI) Bridge Support Program aims to provide maternal and child¹ health researchers up to 1 year of funding to aid in the continuation of independent investigator clinical and translational research projects (NIH R01 or NSF, DOD, or other equivalent award) so that progress may be made to obtain renewed or replacement funding.

All projects must be *significantly* related to the health of expectant mothers and children. The applicant must be a pediatrician, obstetrician, a child health subspecialist, or scientist who has a focus on, or plans to focus on, child health research.

Applicants pursuing this funding mechanism typically fall into one of the following categories:

- **Unsuccessful first submission of a competitive renewal.** Applicant must clearly address the concerns outlined in the summary statement.
- **Unsuccessful submission of a new R01 proposal** if:
 1. New proposal represents replacement funding for a previous NIH funded line of investigation that has run its course; **or**
 2. Applicant has completed a K08, K23, K12, or K01 grant or an equivalent NIH K grant intended for transition to independence and has received a priority score on the original R01 submission.
- **Unsuccessful submission of a new R21 proposal** will be considered if the proposal represents replacement funding for a previous NIH funded line of investigation that has run its course.
- **Unsuccessful (A1) resubmission of a competitive renewal or a new R01 (as outlined above)** will be considered if:
 1. Applicant received a strong priority score; and
 2. Applicant describes how the summary statement will guide development of a new application.

ELIGIBILITY

- Only research projects supported (or in progress) by an **independent investigator award** (NIH R01 or NSF, DOD, or other equivalent award) will be eligible.
- Applicant must hold an appointment in the following lines within SoM or Stanford University: *CE/MCL/NTLR/NTLT/UTL*.
- All appointees at the rank of Assistant Professor or above can apply
- All applicants must have or plan on having a focus on maternal and child health research, or wish to expand their interest in maternal and child health research

The following are *not* eligible:

- Visiting scholars to Stanford

IRB Approval (Approved Before Application)

IRB approval of the research project is required **prior** to application submission. IRB approval letter must be attached with application. For more information, please see:

<http://humansubjects.stanford.edu/>

Pre-Submission Consultations

Project Design/General

MCHRI Administration can help identify other Stanford resources (e.g., budgeting, statistics, and informatics) to improve proposal. To request a proposal consultation, contact chri_admin@stanford.edu *at least 30 days prior to submission deadline*.

Biostatistics Support

As part of a partnership with the Stanford Quantitative Sciences Unit (QSU), MCHRI Support Program Applicants may request services that enhance the success of their research project (*most services at no charge to the investigator*). QSU expertise includes one-time consultations; help with grant proposal development, and as partners in the implementation of funded projects. Click [here](#) to submit a request directly to the QSU.

¹ "Children" or "Child" refers to expectant mothers, oocyte, zygote, embryo, fetus, infant, child, and/or adolescent.

MCHRI Bridge Support Policy

APPLICATION CRITERIA

Application must:

- Be enthusiastically endorsed by the Division Chief
- Letter from the Department Chair indicating, if awarded, the Department will supply \$50K in matching funds (see **AWARD**)
- Be submitted prior to the termination of existing funding
- Include the summary statement of the unsuccessful submission
- Include written support of the program project principal investigator (in the case of sub-projects with program projects – P01, P50, SCOR, etc.)

AWARD

Total award is up to **\$100,000** (\$50,000 from the MCHRI and \$50,000 cost shared from the applicant's department) for one year. **One** proposal per applicant is accepted each cycle.

Award may be used for:

- Research personnel
- Supplies and ancillary services necessary for project
- Statistical support
- Computer software (must be justified)

Award may NOT be used for:

- PI Salary (Department is required to provide support)
- Travel, conference fees, tuition, classes
- Computer equipment
- Capital equipment
- Office supplies, ITSS communication
- Poster presentations, abstract submissions
- Any other indirect research costs

Performance Period

MCHRI Bridge Support is for *no longer than 12 months*. Should renewed or replacement funding be awarded prior to bridge funding end date, the awardee is required to notify MCHRI Administration and return any unexpended funds. The start date can be no later than three months after the award announcement date.

Review Timeline

- Three grant cycles are offered annually (September, January & May)
- Proposals are reviewed within 3-4 weeks of the submission deadline
- Awards are announced approximately 4-5 weeks from the submission deadline

Maternal and Child Health Research Resources

The award may be applied towards Research Coordinator Services to assist with any or all of the following: IRB applications, regulatory document completion, identification of eligible subjects, recruitment, enrollment, clinical data collection or sample acquisition, specimen handling/shipping, quality control, adverse event reporting, data entry, oversight of regulatory compliance, etc. Contact [Maternal and Child Health Research Support](#) to request coordinator services.

REVIEW CRITERIA

Review is based on (1) relevance to maternal child health and (2) NIH Investigator-initiated Review Criteria:

1. Significance. Does this study address an important [child's health] problem? If the aims are achieved, how will scientific knowledge or clinical practice be advanced? What will be the effect of these studies on the concepts, methods, technologies, treatments, services, or preventions that drive this field?

2. Approach. Are the conceptual or clinical framework, design, methods, and analyses adequately developed, well integrated, well-reasoned, and appropriate to the aims of the project? Does the applicant acknowledge potential problem areas and consider alternative tactics?

3. Innovation. Is the project original and innovative? For example: Does it challenge existing paradigms, clinical practice, address an innovative hypothesis, or critical barrier to progress in the field? Does the project develop or use novel concepts, approaches, methods, tools, or technologies?

4. Investigators. Are the investigators appropriately trained and well suited to carry out this work? Is the work proposed appropriate to the experience level of the principal investigator and other researchers? Does the investigative team bring complementary and integrated expertise to the project (if applicable)?

5. Environment. Does the scientific environment contribute to the probability of success? Do the studies benefit from unique features of the scientific environment, subject populations, or use useful collaborative arrangements? Is there evidence of institutional support?

MCHRI Bridge Support Policy

SELECTION PROCESS

Proposals will be reviewed by the MCHRI Director, the applicant's Department Chair (or designee), Departmental Research Director (if applicable) and two reviewers who have expertise in the applicants field of study.

Successful proposals should demonstrate the potential to meet the following criteria:

- Significance of the research and maternal child health relevance
- Project's past productivity, external review assessment, track record in area, and appropriateness of the budget; and
- Project's likelihood of funding within the next appropriate funding cycle.

Reviewer Comments

All applicants will receive reviewer comments regardless of award and have the opportunity to address reviewer comments.

AWARDEE RESPONSIBILITIES

The PI will take responsibility for the research idea, development methods, IRB approval, supervision and conduct of the study in addition to the following:

- The PI will also list in their proposal a minimum of two external funding agencies to which an application for subsequent funding will be submitted
- Submit reports in a timely manner, including a Progress Report *within 30 days of the award end date*
- Provide updates in all Progress Reports on funding status from external and/or internal sources
- Submit progress reports for up to 3 years following the award end date that will include information about grants submitted, publications, employment, and new external funding resulting from this award
- Acknowledge research support in all publications, abstracts, and presentations as follows:

"The project described in this publication was supported by the by the Maternal and Child Health Research Institute."

Award recipients who have not acknowledged their work, as indicated above, are not eligible for future awards sponsored by the MCHRI.

TERM OF AWARD

All awardees are limited to a single award of up to 1 year. Should there be a change in the awardee's role that significantly alters their ability to carry out their responsibilities, the award will be forfeited prior to the completion of the term. However, if there have been unusual occurrences then the awardee may request a deferral or leave of absence from the award; this request will be adjudicated by the Director of the MCHRI. If a deferral is approved, the end date of this award will be adjusted accordingly by MCHRI administration.
