We are conducting an exciting new brain imaging study to help identify new treatments for individuals with Autism Spectrum Disorder or Asperger’s Disorder.

Participation in the study will involve:

• Traveling to Stanford for 3 days
• Remaining still in a simulated scan session
• Cognitive testing
• Preparation for PET imaging
• Completion of a combined 1 hour PET/MRI scan

The subject must be:

• Between 21 and 45 years of age
• Diagnosed with Autism Spectrum Disorder or Asperger’s Disorder
• IQ greater than 70

Benefits of participating:

• Results of the cognitive testing
• High resolution pictures of the brain
• An honorarium of $100 for participation

For more information, or to enroll in this exciting opportunity, please contact:
