STANFORD UNIVERSITY RESEARCH

HEALTHY ADULTS

We are conducting an exciting new brain imaging study to help determine how the brain works at a molecular level.

Participation in the study will involve:

- Traveling to Stanford for 3 days
- Remaining still in a simulated scan session
- Cognitive testing
- Preparation for PET imaging
- Completion of a combined 1hour PET/MRI scan

The subject must be:

- Between 21 and 45 years of age
- Healthy and without any psychiatric diagnosis
- IQ greater than 70

Benefits of participating:

- Results of the cognitive testing
- High resolution pictures of the brain
- An honorarium of $100 for participation
