BIODESIGN INNOVATION FELLOWSHIP

The Biodesign Innovation Fellowship is a launch pad for initiating, redirecting, or accelerating a career in health technology. Learn a proven, team-based approach to **identify** important unmet health needs, **invent** diagnostics, devices, or digital technologies to address them, and prepare to **implement** those products to improve lives everywhere.

Who should apply?

- Individuals with backgrounds in medicine, engineering, and/or business
- Masters, medical, or doctorate degrees preferred; otherwise significant work experience in the health technology sector is required
- We are especially interested in those who have demonstrated exceptional creativity and/or innovation in their professional or academic careers

The fellowship is a full-time, paid program at Stanford University that runs from August – June each year. To learn more, visit bit.ly/BiodesignFellow or contact fellowships manager, Emily Johnson, at erj@stanford.edu.

Stanford Biodesign is committed to providing an inclusive and respectful work environment. We believe that personal and professional diversity inspires creativity in our teams and helps us innovate effectively for different patient populations.

The application period for the 2020-21 fellowship year opens May 13, 2019 and closes August 15, 2019.
