CANCER BIOLOGY SEMINAR SERIES 2019-20

MONDAY, September 23, 2019
Xin Lu, Ph.D.
Oxford University
“Cellular Plasticity and Upper GI Cancers”

February 11, 2020
David Bilder, Ph.D.
University of California, Berkeley
“Cold-Blooded Cancer”

October 15, 2019
Hannah Carter, Ph.D.
University of California, San Diego
“MHC Genotype Shapes the Oncogenic Mutational Landscape”

February 25, 2020
Kristian Helin, Ph.D.
Memorial Sloan Kettering
“Epigenetics, Transcription, and Cancer”

October 22, 2019
Howard Chang, M.D., Ph.D.
Stanford University
“Personal Regulome Navigation of Cancer”

March 10, 2020
Agata Smogorzewska, M.D., Ph.D.
Rockefeller University
“Mechanism of DNA Repair during Replication”

November 5, 2019
Karen Cichowski, Ph.D.
Harvard University
“Developing Therapies for Ras Driven Cancers”

March 24, 2020
Mario Suva, M.D., Ph.D.
MGH/Harvard
“An Integrative Model of Single-Cell States and Genetics for Glioblastoma”

December 10, 2019
Laura Fejerman, Ph.D.
University of California, San Francisco
“Subtype-Specific Breast Cancer Risk in Highly Indigenous Latin American Women”

April 14, 2020
Owen Witte, M.D.
University of California, Los Angeles
“Convergent Evolution to a Stem Cell Phenotype in Epithelial Cancers”

January 14, 2020
Aimee Edinger, VMD, Ph.D.
University of California, Irvine
“Starving Cancer Cells to Death by Limiting their Access to Nutrients”

May 5, 2020
Sumin Kang, Ph.D.
Emory University
“Targeting Cancer Signaling Nodes to Overcome Chemotherapy Resistance”

January 21, 2020
Christine Mayr, Ph.D.
Memorial Sloan Kettering
“Regulation of Protein Functions by 3’ UTRs”

May 26, 2020
Sylvia Plevritis, Ph.D.
Stanford University
“Reconstructing the Tumor Microenvironment Through Multi-Omic Analysis”

TUESDAY, 12:00 P.M.
MUNZER AUDITORIUM, BECKMAN CENTER

For further information, please contact Grace Batoon (650) 723-6198, gracebatoon@stanford.edu

Sponsored by the Stanford Cancer Institute and Beckman Center
Organized by Monte Winslow, Ron Shanderson, and the Cancer Biology Students
