October 2, 2018  
Capucine Van Rechem, PhD  
Stanford University  
“Understanding Chromatin Modifiers Contribution to Diseases through Cell Cycle and Unconventional Roles”

October 23, 2018  
New Time: 4-5 PM  
New Location: LKSC Berg Hall  
John Minna, MD  
University of Texas Southwestern Medical Center  
“Identifying and Targeting Lung Cancer Vulnerabilities”

November 13, 2018  
Hao Zhu, MD  
University of Texas Southwestern Medical Center  
“Interrogating the Genomics of Liver Regeneration and Liver Cancer with Mouse Models”

December 4, 2018  
Rebecca Ihrie, PhD  
Vanderbilt University  
“Neural Stem Cell Signaling in Development and Cancer”

January 15, 2019  
Ron Levy, MD  
Stanford University  
“In Situ Vaccination for Cancer”

January 29, 2019  
Sandra Horning, MD  
Genentech  
“Personalized Cancer Therapy: Genentech’s Ongoing Journey”

February 19, 2019  
Valerie Weaver, PhD  
University of California, San Francisco  
“Forcing Tumor Progression and Metastasis”

March 5, 2019  
Location: Clark Center Auditorium  
Mario Suva, MD, PhD  
Harvard Medical School Massachusetts General Hospital  
“Dissecting Pediatric and Adult Gliomas Single-cell Genomics”

March 26, 2019  
Location: Clark Center Auditorium  
Heather Christofk, PhD  
University of California, Los Angeles  
“Metabolic Transitions in Cancer”

April 16, 2019  
Christina Curtis, PhD, MSc  
Stanford University  
“Delineating the Determinants and Dynamics of Metastasis”

May 7, 2019  
Matthew Meyerson, MD, PhD  
Harvard Medical School / Broad Institute  
“Genomic and Functional Studies of Human Lung Cancers”

May 21, 2019  
Catherine Wu, MD  
Harvard Medical School Dana Farber Cancer Institutes  
“Building Personal Neoantigen-targeting Vaccines for Cancer”

TUESDAY, 12:00 P.M.  
MUNZER AUDITORIUM, BECKMAN CENTER  
For further information, please contact Grace Batoon (650) 723-6198, gracebatoon@stanford.edu  
Sponsored by the Stanford Cancer Institute and Beckman Center  
Organized by Monte Winslow and Cancer Biology Students
