CANCER BIOLOGY SEMINAR SERIES 2017-18

July 11, 2017
Start Time: 12:30PM
Roman Thomas, MD
University of Cologne, Germany
"Small Cell Lung Cancer Genomics"

August 29, 2017
Laurent Le Cam, PhD
Montpellier Cancer Center, INSERM, France
"Roles of the p53 Pathway in Metabolism: Implications in Aging, Tissue Homeostasis and Carcinogenesis"

October 10, 2017
Sohail Tavazoie, MD, PhD
Rockefeller University
"Surprising Molecular Events Regulating Cancer Progression"

October 24, 2017
David Feldser, PhD
University of Pennsylvania
"Deconstructing Lung Adenocarcinoma Progression"

November 14, 2017
David Gius, MD, PhD
Northwestern University
"The Dysregulation of the SIRT3-MnSOD-Ac Axis in Luminal B Breast Malignancies"

December 5, 2017
Paul Mischel, MD, PhD
University of California, San Diego
"In Cancer, as in Real Estate, Location Matters – the Role of Extrachromosomal Oncogene Amplification in Cancer"

January 16, 2018
M. Celeste Simon, PhD
University of Pennsylvania
"Metabolism, Inflammation, and Tumor Progression"

February 6, 2018
Kun-Liang Guan, PhD
University of California, San Diego
"The Hippo Pathway in Cell Growth, Organ Size, and Cancer"

February 20, 2018
Location: TBA
Elaine Fuchs, PhD
Rockefeller University
"Stem Cells in Silence, Action and Cancer"

March 6, 2018
Jennifer Cochran, PhD
Stanford University
"Engineered Proteins as Next-generation Cancer Therapeutics"

April 10, 2018
Elsa Flores, PhD
Moffitt Cancer Center
"p53 Family Regulation of Non-coding RNAs in Cancer Metastasis"

April 24, 2018
Angelika Amon, PhD
Massachusetts Institute of Technology
"Aneuploidy and Cancer - a Complicated Relationship"

May 15, 2018
Catherine Wu, MD
Harvard University
"Building Personal Neoantigen-targeting Vaccines for Cancer"

TUESDAY, 12:00 P.M.

MUNZER AUDITORIUM, BECKMAN CENTER

For further information, please contact Grace Batoon (650) 723-6198, gracebatoon@stanford.edu

Sponsored by the Stanford Cancer Institute and Beckman Center
Organized by Monte Winslow and Cancer Biology Students

Stanford Cancer Institute
A National Cancer Institute Comprehensive Cancer Center

Stanford MEDICINE
