CARE Principal Investigator: Dr. Van Ta Park

Funded by NIH/NIA R24AG063718
UCSF IRB Protocol Number: 19-28027

UCSF
University of California San Francisco

The purpose of CARE is to address the gap and reduce disparities in research participation among Asian Americans and Pacific Islanders (AAPI) through the creation of a research registry of AAPI who are interested in participating in various types of research.

Who Can Participate?

To be eligible for CARE, you must:

- Self-identify as Asian, Asian American and/or Pacific Islander
- 18 years old or older
- Can speak English, Mandarin, Cantonese, Vietnamese, or Korean
- Can read English, Simplified Chinese, Traditional Chinese, Vietnamese or Korean
- Have an interest in participating in potential research.

In return for your time and effort, you will be provided a $10 gift card by the study team.

CARE aims to increase Asian American and Pacific Islander participation in research involving prevention, intervention, and treatment of cognitive decline, Alzheimer's disease and related dementias. We also seek to increase AAPI participation in other aging-related health concerns including health issues, risk and protective factors that begin in early to mid-life; and, the health and wellness of caregivers.
