RESEARCH

Fellows have access to the unique assets of Stanford University and Silicon Valley with broad exposure to national leaders in the following fields:

- Health Policy and Health Services Research
- Technology and Health
- Health Literacy and Health Communication
- System Redesign
- Health Economics
- Health Behavior Research
- Chronic-Illness Care
- Quality Improvement and Implementation Science
- Medical Education

CLINICAL

Fellows will serve two-half days as an attending physician in the resident continuity clinic, which serves primarily low income families in partnership with a federal qualified health center.

TRAINING

As part of the two-year Fellowship, each fellow receives formal, structured training in research methodology – including study design, epidemiology, biostatistics, programming, behavioral research, and solution-oriented design. Fellows have the opportunity to pursue a Masters in Epidemiology & Clinical Research or Health Services Research.

Each fellow will develop an independent research project under the mentorship of Stanford faculty members and their Scholarly Oversight Committee. This consists of weekly mentorship meetings and monthly presentations of works-in-progress are facilitated in a multi-disciplinary environment.

MISSION

The mission of the Stanford University Fellowship in Academic General Pediatrics is to prepare physician scholars with innovative methods for improving child health – securing an understanding of rigorous research methodology and building leadership skills as advocates for child well-being. We seek applicants with interests in technology- and solution-oriented research that will improve child health through interventions at the level of the delivery system, the community, and/or the family unit.

“...The fellowship program provides an opportunity to pursue scholarly research that is relevant and responsive to social needs...”

Victor Cueto, MD
Fellow, Academic General Pediatrics

HOW TO APPLY

Interested applicants should send the following items to Charlene Rotandi, Senior Fellowship Coordinator, at charlene.rotandi@stanford.edu.

- Letter of Interest
- CV
- Letters of Support (3)
- 5-minute TED-style video, optional

We are committed to fostering the development of physician leaders prepared to address health inequities. Toward that end, we encourage candidates with multi-lingual skills, from diverse backgrounds, and/or underrepresented minorities to apply.
