Goal is Global Eradication of Hepatitis B
New headquarters donated by Dr. CJ Huang give Asian Liver Center programs room to grow

2010 year in REVIEW
Improving Education and Vaccination in Laos

Upon the World Health Organization’s (WHO) request, the Asian Liver Center visited Lao People’s Democratic Republic and developed recommendations for the Ministry of Health and Expanded Program on Immunization for new educational materials and awareness campaigns.

Rallying Youth with White House Advisor Kate Moraras

White House Advisor on Health Policy and Community Engagement, Kate Moraras, rallied students from across the country at the 8th Annual Youth Leadership Conference, where they laid the foundation for a youth movement against hepatitis B and liver cancer.

Creative Approaches to Raising Awareness

The Asian Liver Center partnered with Stanford University to host the first annual LIVERight Zumbathon, a Zumba Fitness event that gathered over 700 participants to raise awareness about hepatitis B and liver cancer.

Which One Deserves to Die?

Educatin the Workforce about Hep B

The Asian Liver Center partnered with Cisco Systems, General Electric, IBM, Stanford University, and the National Business Group on Health to educate and protect employees from hepatitis B through webinars, screenings/vaccinations, health risk assessments, and adoption of non-discriminatory policies.

Hep B Stops with Me!

Mother to child transmission of hepatitis B is being steadily eliminated through Hep B Moms, a bold new website raising awareness through creative strategies such as a photo contest in partnership with Tea Collection and disseminating resources developed for patient education to hospitals, community organizations, and public health departments nationwide.

Educatin the Workforce about Hep B

The Asian Liver Center partnered with Cisco Systems, General Electric, IBM, Stanford University, and the National Business Group on Health to educate and protect employees from hepatitis B through webinars, screenings/vaccinations, health risk assessments, and adoption of non-discriminatory policies.

Convening Experts in China

Asia and Pacific Alliance to Eliminate Viral Hepatitis (APAVH): Health experts from China, the World Health Organization (WHO), and the U.S. Centers for Disease Control and Prevention (CDC) met in Hong Kong in April to discuss how China can serve as a regional model to enhance hepatitis B prevention and control efforts in Asia.
Asian Liver Center advocacy to eliminate hepatitis B stigma resulted in sweeping national policies changes in China, banning discriminatory practices in school admissions and workplace hiring and promotion.

**Recognition**

The Asian Liver Center received two prestigious awards from the U.S. Centers for Disease Control and Prevention (CDC) for mobilizing people and resources in ways that have changed national and global public health policies related to hepatitis B, as a result saving lives and increasing productivity by reducing stigma. ALC was also featured as a news story on PBS NewsHour, the first time hepatitis B received major coverage on national television.

To all our donors, thank you for your generous support. Special thanks to:
