SPRING QUARTER 2010-11 (TERM CODE 1116; MD PROGRAM Q3 AND Q6)

Feb 6  Sun  Axess opens for spring quarter course enrollment
Mar 18 Fri  Deadline (5 p.m.) to enroll in courses to receive stipend or refund check on first day of term

Mar 28  Mon  **First day of spring quarter**
Mar 28  Mon  Deadline (5 p.m.) to file for leave of absence in spring quarter
Mar 28  Mon  Deadline (5 p.m.) to file preliminary study list with sufficient units for student to be “at status”
Mar 28  Mon  Instruction begins
Mar 28  Mon  MD – First day of clerkships for Period 10
Mar 31  Thu  GRAD – Conferral of degrees for winter quarter
Apr 8  Fri  Deadline (5 p.m.) to apply for spring quarter degree conferral
Apr 15  Fri  MD – INDE 297 session for clinical students (Period 10)
Apr 15  Fri  Deadline (5 p.m.) to file final study list (add/drop, adjust units for variable-unit course)
Apr 25  Mon  MD – First day of clerkships for Period 11
May 10 Tue  Deadline (5 p.m.) to file for term withdrawal
May 20  Fri  Deadline (5 p.m.) to file change to grading basis or course withdrawal
May 23  Mon  MD – First day of instruction Q6 POM
May 23  Mon  MD – First day of clerkships for Period 12
May 27–Jun 2 Fri–Thu  GRAD – End-Quarter period (“Dead Week”)
May 30  Mon  Memorial Day (holiday; no classes)
Jun 1  Wed  GRAD – Last day of instruction; last day to arrange for an Incomplete in a course
Jun 1  Wed  GRAD – Deadline (12 p.m., noon) to submit thesis/dissertation for spring quarter degree conferral

Jun 2  Thu  MD – Last day of instruction for first year students
Jun 2  Thu  GRAD – Day before finals (no classes)
Jun 3–8 Fri–Wed  GRAD – End-Quarter examinations
Jun 3–8 Fri–Wed  MD – End-Quarter examinations for first year students

**Jun 8  Wed  Last day of spring quarter**
Jun 9  Thu  Grades for graduating students due at 12 p.m., noon
Jun 10  Fri  MD – INDE 297 session for clinical students (Period 12)
Jun 11  Sat  School of Medicine Commencement (all degree programs)
Jun 12  Sun  Stanford University Commencement
Jun 14  Tue  Grades for non-graduating students due at 11:59 p.m.
Jun 17  Fri  MD – Last day of instruction Q6 POM
Jun 20–26 Mon–Sun  MD – Summer Break for clinical students

SUMMER QUARTER 2010-11 (TERM CODE 1118)

Apr 10  Sun  Axess opens for summer quarter course enrollment
Jun 10  Fri  Deadline (5 p.m.) to enroll in courses to receive stipend or refund check on first day of term

**Jun 20  Mon  First day of summer quarter**
Jun 20  Mon  Deadline (5 p.m.) to file for leave of absence in summer quarter
Jun 20  Mon  Deadline (5 p.m.) to file preliminary study list with sufficient units for student to be “at status”
Jun 20  Mon  Instruction begins
Jun 27  Mon  MD – First day of clerkships for Period 1
Jul 1  Fri  Deadline (5 p.m.) to file final study list (add/drop, adjust units for variable-unit course)
Jul 4  Mon  Independence Day (holiday; no classes)
Jul 22  Fri  Deadline (5 p.m.) to file for term withdrawal
Jul 25  Mon  MD – First day of clerkships for Period 2
Jul 29  Fri  Deadline (5 p.m.) to file change to grading basis or course withdrawal
Jul 29  Fri  GRAD – Deadline (5 p.m.) to apply for summer quarter degree conferral
Aug 6–11 Sat–Thu  End-quarter period (“Dead Week”)
Aug 11  Thu  Last day of instruction; last day to arrange for an Incomplete in a course
Aug 11  Thu  GRAD – Deadline (12 p.m., noon) to submit thesis/dissertation for summer quarter degree conferral
Aug 12  Fri  MD – INDE 297 session for clinical students (Period 2)
Aug 12–13 Fri–Sat  End-quarter examinations
Aug 13  Sat  **Last day of summer quarter**
Aug 16  Tue  Grades due at 11:59 p.m.
Aug 22  Mon  MD – First day of clerkships for Period 3

Applies to all programs, unless otherwise noted: “MD” for MD program, “GRAD” for MS/PhD programs. Dates are subject to change.
1.2 SCHOOL OF MEDICINE ACADEMIC DEPARTMENTS AND PROGRAMS

**BASIC SCIENCE DEPARTMENTS:**
- Biochemistry
- Bioengineering
- Chemical and Systems Biology
- Developmental Biology
- Genetics
- Health Research and Policy
  - Epidemiology (in HRP)
  - Health Services Research Program (in HRP)
- Microbiology and Immunology
- Molecular and Cellular Physiology
- Neurobiology
- Structural Biology

**CLINICAL DEPARTMENTS:**
- Anesthesia
- Cardiothoracic Surgery
- Comparative Medicine
- Dermatology
- Medicine
- Neurology and Neurological Sciences
- Neurosurgery
- Obstetrics and Gynecology (OB/GYN)
- Ophthalmology
- Orthopedic Surgery
- Otolaryngology, Head and Neck Surgery
- Pathology
- Pediatrics
- Psychiatry and Behavioral Sciences
- Radiation Oncology
- Radiology
- Surgery
- Urology

**INTERDEPARTMENTAL GRADUATE PROGRAMS:**
- Biomedical Informatics (BMI)
- Biophysics
- Cancer Biology
- Immunology
- Neurosciences

**STANFORD INSTITUTES OF MEDICINE:**
- Cardiovascular Institute
- Comprehensive Cancer Center
- Institute for Immunity, Transplantation and Infection

**OTHER:**
- Center for Biomedical Ethics
- Institute for Stem Cell Biology and Regenerative Medicine
- Neuroscience Institute

2. REQUIREMENTS FOR THE MD DEGREE

2.1 Specification of Requirements for Graduation with the MD Degree

2.2 Competencies and Objectives for Medical Student Education

2.3 Medical Health Requirements and Immunizations

2.4 Data Security and Privacy (HIPAA) Training

2.5 Safety Training

2.6 Ethical Conduct of Biomedical Research

2.7 Academic Requirements
   - MD Program Curriculum – Overview (Color Schematic)
   - Students Matriculating Academic Year 2010-2011 or 2009-2010
   - Students Matriculating Academic Year 2007-08 or 2008-09
   - Students Matriculating Academic Year 2006-07
   - Students Matriculating Academic Years 2003-04, 2004-05, or 2005-06
   - Students Matriculating Academic Year 2002-03 or Prior

2.8 United States Medical Licensing Examination (USMLE)

2.9 School of Medicine Statement on Professionalism

2.10 School of Medicine Technical, Non-Academic Standards

2.11 Note on Licensure
2.1 SPECIFICATION OF REQUIREMENTS FOR GRADUATION WITH THE MD DEGREE

The requirements for the MD degree are established by the Stanford University School of Medicine Faculty Senate and allow no exceptions. Those requirements are as follows:

1. **Satisfaction of Academic Requirements**: To graduate, students must satisfy all academic requirements, as delineated in Section 2.7 of this handbook.

2. **United States Medical Licensing Examination**: To graduate, students must achieve overall passes on the USMLE Step 1 and Step 2 CK (Clinical Knowledge) examinations, and must have taken the Step 2 CS (Clinical Skills) examination, as described in Section 2.8 of this handbook.

3. **Satisfaction of Professionalism Requirements**: To graduate, students must meet the standards of professionalism set forth in the *School of Medicine Statement on Professionalism* (see Section 2.9 of this handbook).

4. **Satisfaction of Technical Standards**: To graduate, students must meet the requirements set forth in the *School of Medicine Technical, Non-Academic Standards* (see Section 2.11 of this handbook).

5. **Residency Requirement**: To graduate, students must register for 13 quarters at full “Med-MD” tuition. MD degree candidates must be registered for the quarter during which the degree is conferred. Students must apply for conferral of a degree by filing an Application to Graduate on Axess. Students may graduate in any quarter by completing their degree requirements and filing the Application to Graduate by the deadline date for that quarter.

6. **Medical Health Requirements and Immunizations**: MD degree candidates must be in compliance with medical health requirements at all times. Entering medical students must complete certain health-related forms, immunizations, and tests before beginning studies at Stanford and, for some of these, annually thereafter (see Sections 2.3 and 9.4 of this handbook).

7. **Data Security and Privacy (HIPAA) Training**: MD degree candidates must be in compliance with Stanford’s HIPAA training requirements (see Section 2.4 of this handbook).

8. **Safety Training**: MD degree candidates must be in compliance with Bloodborne Pathogens, Hospital-Acquired Infections training, and Safety and Emergency Preparedness training requirements (see Section 2.5 of this handbook).

9. **Ethical Conduct of Biomedical Research**: MD degree candidates must be in compliance with the CITI training requirement (see Section 2.6 of this handbook).

**NOTE:** These requirements may be changed at any time.

2.2 COMPETENCIES AND OBJECTIVES FOR MEDICAL STUDENT EDUCATION

The following competencies and their associated educational objectives serve as a guide for curriculum development and evaluation of the success of the training program and its graduates:

1. **Knowledge of the Basic Medical Sciences and Organ Systems**
A graduate is expected to:

- Know the normal structure and function of the body (as an intact organism) and of each of its major organ systems
- Know the molecular, biochemical, and cellular mechanisms that are important in maintaining the body’s homeostasis
- Know the various causes (genetic, developmental, metabolic, toxic, microbiologic, autoimmune, neoplastic, degenerative, and traumatic) of maladies and the ways which they operate on the body (pathogenesis)
- Know the altered structure and function (pathology and pathophysiology) of the body and its major organ systems that are seen in various diseases and conditions
- Know the principles of pharmacology, therapeutics, and therapeutic decision-making

2. Ability to Apply Clinical Skills in the Care of Patients

A graduate is expected to:

- Obtain an accurate medical history that covers all essential aspects of the history, including issues related to age, gender, sexuality, and socio-economic status
- Communicate with patients and their families in culturally appropriate ways regarding: sexuality and sexual function, domestic violence, substance abuse, financial obstacles to health, end-of-life issues, and other topics that materially affect patient well-being
- Communicate clearly, both orally and in writing, with patients, patients’ families, colleagues, and others with whom physicians must exchange information in carrying out their responsibilities
- Conduct a thorough and accurate physical exam, including psychiatric, neurologic, genital, and orthopedic examinations in adults and children
- Perform routine technical procedures used in medicine and surgery
- Interpret the most frequent clinical, laboratory, roentgenologic, and pathologic manifestations of common maladies
- Reason deductively in solving clinical problems
- Construct appropriate management strategies (both diagnostic and therapeutic) for patients with common conditions, both acute and chronic, including medical, psychiatric, and surgical conditions, and those requiring short- and long-term rehabilitation
- Recognize and outline an initial course of management for patients with serious conditions requiring critical care
- Appropriately relieve pain and ameliorate the suffering of patients.
3. **Promotion of health care that appropriately responds to social, cultural, and health system contexts within which the care is delivered**

A graduate is expected to:

- Demonstrate a commitment to advocate at all times for the interests of one’s patients over one’s own interests
- Demonstrate an understanding of the manner in which people of diverse cultures and belief systems perceive health and illness and respond to various symptoms, diseases, and treatments
- Demonstrate respect for the roles of other health care professionals and a willingness/commitment to collaborate with others in caring for individual patients and in promoting the health of defined populations
- Demonstrate a commitment to provide care to patients who are unable to pay and to advocate for access to health care for members of traditionally underserved populations
- Understand and work within existing healthcare systems, including the public health system, to provide optimal care for patients and communities
- Understand the various approaches to the organization, financing and delivery of health care

4. **Knowledge of the Foundations of Population and Evidence-based Medicine**

A graduate is expected to:

- Understand the important non-biological determinants of poor health and the economic, psychological, social, and cultural factors that contribute to the development and/or continuation of maladies
- Know the epidemiology of common maladies and the systematic approaches useful in reducing the incidence and prevalence of those maladies
- Understand the economic cost of health care and balance the obligation to fulfill the needs and wishes of individual patients with a societal obligation to practice efficient, evidence-based, and cost-effective medicine
- Understand the power of the scientific method in establishing the causation of disease and efficacy of traditional and non-traditional therapies

5. **Commitment to Ethics and Professionalism**

A graduate is expected to:

- Know the theories and principles that govern ethical decision making, and of the major ethical dilemmas in medicine, particularly those that rise at the beginning and end of life and those that arise from the rapid expansion of knowledge of genetics
• Demonstrate compassionate treatment of patients, and respect for their privacy and dignity

• Demonstrate honesty and integrity in all interactions with patients’ families, colleagues, and others with whom physicians must interact in their professional lives

• Understand the positive and negative consequences resulting from the involvement of corporations in health care delivery, scientific research, and medical products

6. **Commitment to Personal and Professional Development**

   A graduate is expected to:

   • Demonstrate the capacity to recognize and accept limitations in one’s knowledge and clinical skills and a commitment to continuously improve one’s knowledge and ability

   • Demonstrate a commitment to engage in lifelong learning to stay abreast of relevant scientific, health care, and public health advances

   • Demonstrate the ability to retrieve (from electronic databases and other resources), manage, and utilize biomedical information for solving problems and making decisions that are relevant to the care of individuals and populations

   • Demonstrate a commitment to work collaboratively with colleagues in healthcare, research and leadership teams

   • Demonstrate a commitment to optimize patient safety by thoughtful selection and timing of interventions and collaborations with all members of the health care team

   • Demonstrate knowledge and proficiency in effective techniques for practice-based learning by individuals and system-wide improvements across the continuum of care

   • Demonstrate leadership in the various branches of medicine and the health sciences

7. **Commitment to an Area of Scientific and/or Clinical Inquiry**

   A graduate is expected to:

   • Recognize unresolved clinical or scientific questions, formulate an hypothesis, and identify methods and resources to address this hypothesis

   • Conduct investigation in an area of interest related to patient care or scientific endeavor

   • Understand the scientific theory and methodology that form the basis of medical discoveries

   • Understand the ethical requirements for laboratory, animal-based and patient-oriented scientific inquiry

   • Communicate new knowledge obtained from scientific inquiry responsibly and clearly
2.3 MEDICAL HEALTH REQUIREMENTS AND IMMUNIZATIONS

MEDICAL REQUIREMENTS

All matriculated Stanford students must complete the Entrance Medical Requirements at their own expense. These requirements are established and monitored by Vaden Student Health Center. Details can be found at the following Web site:

http://vaden.stanford.edu/new_students/entrance_req.html

ANNUAL TESTS AND IMMUNIZATIONS

The following immunizations are required of each MD student ANNUALLY (even if the student is also pursuing another degree such as an MPH, MS, or PhD). All immunizations can be performed at the following locations:

Vaden Student Health Center
866 Campus Drive
Stanford, CA 94305-8580
(650) 498-2336

Occupational Health Center (OHC)
480 Oak Road
Stanford, CA 94305-8007
(650) 725-5306

Tuberculosis (TB): Student may choose to have either a PPD test (requires a return visit to have the test result read) or Quantiferon.

Influenza: All MD students must be immunized against influenza.

Additional tests or immunizations required by specific clerkships require a note of explanation from the requiring Clerkship Director. The note should be presented to either Vaden or OHC before the test or immunization is received.

Annual immunizations required by the School of Medicine and its clerkships are performed at the School of Medicine’s expense. The School of Medicine does not provide funding for immunizations required by residency programs.

2.4 DATA SECURITY AND PRIVACY (HIPAA) TRAINING

In compliance with the Privacy Rule of the Health Insurance Portability and Accountability Act (HIPAA), the Stanford University School of Medicine requires all new medical students to complete Patient Privacy Regulation HIPAA Training before starting classes and ANNUALLY thereafter. Stanford’s HIPAA Training is a Web-based training that takes approximately one-and-a-half hours. The Office of Student Life sends e-mail instructions to all MD students annually.
Pre-clerkship students will not receive credit for POM until they have completed this training (both years). Clinical students are not able to enter the Clerkship Draw until they have completed this training.

To complete most Web-based training from outside the School of Medicine requires setting up a Virtual Private Network using the link:

http://med.stanford.edu/irt/security/vpn/

2.5 SAFETY TRAINING

BLOODBORNE PATHOGENS TRAINING

The California OSHA Bloodborne Pathogens Standard requires that all individuals with occupational exposure to blood, blood products, or other potentially infectious materials complete a Bloodborne Pathogens training course ANNUALLY. This requirement applies to all medical students. Stanford University Bloodborne Pathogens Training is a Web-based training that takes approximately one-half hour. The Office of Student Life sends e-mail instructions to all MD students annually.

Pre-clerkship students will not receive credit for POM until they have completed this training (both years). Clinical students are not able to enter the Clerkship Draw until they have completed this training.

To complete most Web-based training from outside the School of Medicine requires setting up a Virtual Private Network using the link:

http://med.stanford.edu/irt/security/vpn/

Hospital-Acquired Infections Training

All students must complete training on the prevention of hospital-acquired infections. The Office of Student Life sends e-mail instructions to all MD students on an annual basis.

Pre-clerkship students will not receive credit for POM until they have completed this training (both years). Clinical students are not able to enter the Clerkship Draw until they have completed this training.

SAFETY AND EMERGENCY PREPAREDNESS TRAINING

All medical students are required to complete the following three online courses:

- General Safety and Emergency Preparedness (EHS-4200)
- Biosafety (EHS-1500)
- Chemical Safety for Labs (EHS-1900)—required of all MD students in laboratories. Compliance is monitored by the lab administrators.

These courses are accessed through STARS in AXESS. Pre-clerkship students will not receive credit for POM until they have completed this training.
2.6 ETHICAL CONDUCT OF BIOMEDICAL RESEARCH

As part of medical student training in the ethical conduct of biomedical research, all medical students matriculating starting in 2009 are required to complete a series of CITI online course modules. The deadline for completion of this requirement for incoming first-year students is December 1, 2010.

To complete this training, students must:

1. Visit the CITI Web site:
   https://www.citiprogram.org/
2. Register for Group 1.
3. Complete the following required modules:
   - The Integrity Assurance Statement
   - History & Ethical Principles
   - Basic Institutional Review Board (IRB) Regulations and Review Process
   - Informed Consent
   - Research with Protected Populations – Vulnerable Subjects: An Overview
   - FDA-Regulated Research
   - Social & Behavior Research for Biomedical Researchers
   - Records Based Research
   - Genetic Research in Human Populations
   - Group Harms
   - HIPAA & Human Subjects
   - Hot Topics
   - Conflicts of Interest
4. After completing all of the required modules, return to the CITI Main Menu, sub-bullet titled, “Previous Coursework Completed.” Save the screenshot (make sure your name is visible) and submit to Mara Violanti (marav@stanford.edu). Hard copies are also accepted in MSOB 345.

Students will not receive credit for completion of CITI until the Office of Medical Student Research and Scholarship has received their certificate of completion.

Note: Students who matriculated prior to 2009-2010 who have successfully completed MED 255 Responsible Conduct of Research are exempt from this requirement. Students who have not previously completed MED 255 must complete the online CITI training in order to graduate.
2.7 ACADEMIC REQUIREMENTS

MD PROGRAM CURRICULUM – OVERVIEW

Autumn | Winter | Spring

**FOUNDATIONS OF MEDICINE I**
- Cells to Tissues
- Molecular
- Foundations of Medicine

**FOUNDATIONS OF MEDICINE II**
- Applied Biochemistry
- Genetics
- Development & Disease Mechanisms
- Basic Cardiac Life Support
- Gross Anatomy

**HUMAN HEALTH & DISEASE I**
- The Nervous System
- Immunology
- Gross Anatomy of Head & Neck
- Human Health & Disease I

**HUMAN HEALTH & DISEASE II**
- Pulmonary
- Cardiovascular

**PRACTICE OF MEDICINE I**

**PRACTICE OF MEDICINE II**

**PRACTICE OF MEDICINE III**

**SCHOLARLY CONCENTRATIONS**

Year 1

**HUMAN HEALTH & DISEASE III**
- Renal/Genitourinary
- Gastrointestinal
- Skin / Endocrine
- Reproduction / Women’s Health

**HUMAN HEALTH & DISEASE IV**
- Brain and Behavior
- Hematology
- Systemic Diseases

**PRACTICE OF MEDICINE IV**

**PRACTICE OF MEDICINE V**

**PRACTICE OF MEDICINE VI**

**TRANSITION TO CLINICAL CLERKSHIPS**
- May
- Study for USMLE
- June
- 1-month intensive preparation for clerkships

**SCHOLARLY CONCENTRATIONS**

Year 2

**CLINICAL CLERKSHIPS**
- 8 Weeks
  - Internal Medicine
  - Pediatrics
  - Surgery
- 6 Weeks
  - Obstetrics & Gynecology
- 4 Weeks
  - Family Medicine
  - Psychiatry
  - Neurology
  - Critical Care
- Selectives
  - Ambulatory Practice (3 weeks)
- Electives
  - Subinternship

**RESEARCH & REFLECTIONS IN THE ADVANCEMENT OF PATIENT-CARE (RRAP)**

**SCHOLARLY CONCENTRATIONS**

Year 3, 4, 5

**BLOCKS**
- Block 1: FOUNDATIONS OF MEDICINE
- Block 2: HUMAN HEALTH & DISEASE
- Block 3: PRACTICE OF MEDICINE
- Block 4: CLINICAL CLERKSHIPS
- Block 5: Research & Reflections in the Advancement of Patient-Care
STUDENTS MATRICULATING ACADEMIC YEAR 2010-2011 OR 2009-10

In addition to satisfying the requirements for the MD degree set forth in Section 2.1 of this Handbook, students entering in Academic Year 2010-2011 or 2009-10 must also complete the following requirements.

Academic Units

Satisfactory completion of a minimum total of 249 required academic units as specified in the table Courses and Units for Students Matriculating Academic Year 2010-11 or 2009-10 (see page 21).

Students cannot graduate with any uncorrected failing grade in a pre-clerkship course or any uncorrected failing or marginal pass grade in clinical clerkships. Students can graduate with one uncorrected marginal pass in a pre-clerkship course having fewer than eight units.

Pre-clerkship Curriculum

Students must successfully complete all required courses on the pre-clerkship grid (138 units).

Clinical Curriculum

A minimum of fifteen and one-half months (93 units) in clinical clerkships

Additional requirements

- MED 295 Certification in Advanced Cardiac Life Support (ACLS) – 2 units (see Section 4.7)
- INDE 297 Reflections, Research, and Advances in Patient Care – 4 units (see Section 4.6)
- Scholarly Concentration – Completion of 12 units of coursework and other requirements of a Scholarly Concentration (see Section 3.4)
- Demonstration of at least minimum competency in a comprehensive Clinical Performance Examination (see Section 4.9)
- United States Medical Licensing Examination (USMLE) requirements (see Section 2.8)

updated August 6, 2010
STUDENTS MATRICULATING ACADEMIC YEAR 2007-08 OR 2008-09

In addition to satisfying the requirements for the MD degree set forth Section 2.1 of this Handbook, students entering in Academic Year 2007-08 or 2008-09 must also complete the following requirements.

Academic Units

Satisfactory completion of a minimum total of 251 required academic units as specified in the table Courses and Units for Students Matriculating Academic Year 2007-08 or 2008-09 (see page 22).

Students cannot graduate with any uncorrected failing grade in a pre-clerkship course or any uncorrected failing or marginal pass grade in clinical clerkships. Students can graduate with one uncorrected marginal pass in a pre-clerkship course having fewer than eight units.

Pre-clerkship Curriculum

Students must successfully complete all required courses on the pre-clerkship grid (140 units).

Clinical Curriculum

A minimum of fifteen and one-half months (93 units) in clinical clerkships.

Additional requirements

- MED 295 Certification in Advanced Cardiac Life Support (ACLS) – 2 units (see Section 4.7)
- INDE 297 Reflections, Research, and Advances in Patient Care – 4 units (see Section 4.6)
- Scholarly Concentration – Completion of 12 units of coursework and other requirements of a Scholarly Concentration (see Section 3.4)
- Demonstration of at least minimum competency in a comprehensive Clinical Performance Examination (see Section 4.9)
- United States Medical Licensing Examination (USMLE) requirements (see Section 2.8)

### Total pre-clerkship units: 140

#### Clinical clerkships:

- ANES 306A,N,P: 6
- INDE 301A: 6
- MED 300A: 12
- MED 313A: 6
- NENS 301A: 6
- OBGYN 300A: 9
- PEDS 300A: 12
- PSYC 300A: 6
- SURG 300A: 12
- Selectives: 12
- Elective: 6

### Total clerkship units: 93

#### Other requirements:

- MED 295 (ACLS): 2
- INDE 297: 4
- Scholarly Concentration coursework: 12

### Total for graduation: 251
STUDENTS MATRICULATING ACADEMIC YEAR 2006-07

In addition to satisfying the requirements for the MD degree set forth Section 2.1 of this Handbook, students entering in Academic Year 2006-07 must also complete the following requirements.

Academic Units

Satisfactory completion of a minimum total of 239 required academic units as specified in the table Courses and Units for Students Matriculating Academic Year 2006-07 (see page 24).

Students cannot graduate with any uncorrected failing grade in a pre-clerkship course or any uncorrected failing or marginal pass grade in clinical clerkships. Students can graduate with one uncorrected marginal pass in a pre-clerkship course having fewer than eight units.

Pre-clerkship Curriculum

Students must successfully complete all required courses on the pre-clerkship grid (140 units).

Clinical Curriculum

A minimum of fifteen and one-half months (93 units) in clinical clerkships

Additional requirements

- MED 295 Certification in Advanced Cardiac Life Support (ACLS) – 2 units (see Section 4.7)
- INDE 297 Reflections, Research, and Advances in Patient Care – 4 units (see Section 4.6)
- Scholarly Concentration - Completion of the requirements of a Scholarly Concentration (see Section 3.4)
- Demonstration of at least minimum competency in a comprehensive Clinical Performance Examination (see Section 4.9)
- United States Medical Licensing Examination (USMLE) requirements (see Section 2.8)

**Total clerkship units:** 93

**Other Clinical requirements:**
- MED 295 (ACLS)                          | 2 |
- INDE 297                                | 4 |
**Total for graduation:** 239
STUDENTS MATRICULATING ACADEMIC YEAR 2003-04, 2004-05, OR 2005-06

In addition to satisfying the requirements for the MD degree set forth Section 2.1 of this Handbook, students entering in Academic Year 2003-04, 2004-05, or 2005-06 must also complete the following requirements.

Academic Units

Satisfactory completion of a minimum total of 239 required academic units as specified in the table 
Courses and Units Required for Graduation (Students Matriculating 2003-04 and Later) on the Web site, 
or consult with the School of Medicine Registrar’s Office:

http://med.stanford.edu/md/curriculum/requirements.html

Students cannot graduate with any uncorrected failing grade in a pre-clerkship course or any 
uncorrected failing or marginal pass grade in clinical clerkships. Students can graduate with one 
uncorrected marginal pass in a pre-clerkship course having fewer than eight units.

Pre-clerkship Curriculum

Students must successfully complete all required courses on the pre-clerkship grid (140 units).

Clinical Curriculum

A minimum of fifteen and one-half months (93 units) in clinical clerkships

Additional requirements

- MED 295 Certification in Advanced Cardiac Life Support (ACLS) – 2 units (see Section 4.7)
- INDE 297 Reflections, Research, and Advances in Patient Care – 4 units (see Section 4.6)
- Scholarly Concentration - Completion of the requirements of a Scholarly Concentration (see Section 3.4)
- Demonstration of at least minimum competency in a comprehensive Clinical Performance Examination (see Section 4.9)
- United States Medical Licensing Examination (USMLE) requirements (see Section 2.8)
**STUDENTS MATRICULATING ACADEMIC YEAR 2002-03 OR PRIOR**

In addition to satisfying the requirements for the MD degree set forth Section 2.1 of this Handbook, students entering in Academic Year 2002-03 or Prior must also complete the following requirements.

**Academic Units**

Satisfactory completion of a minimum total of 236 required academic units. See table *Units and Courses Required for Graduation – Academic Year 2002-03 and Earlier* on the Web site, or consult with the School of Medicine Registrar’s Office:

[http://med.stanford.edu/md/curriculum/requirements.html](http://med.stanford.edu/md/curriculum/requirements.html)

Students cannot graduate with any uncorrected failing grade in a pre-clerkship course or any uncorrected failing or marginal pass grade in clinical clerkships. Students can graduate with one uncorrected marginal pass in a pre-clerkship course having fewer than eight units.

**Pre-clerkship Curriculum**

Students must successfully complete all required courses on the pre-clerkship grid (140 units).

**Clinical Curriculum**

A minimum of fifteen and one-half months (93 units) in clinical clerkships

**Additional requirements**

- PEDS 209 *Clinical Nutrition* – 1 unit, via Internet.
- MED 295 *Certification in Advanced Cardiac Life Support (ACLS)* – 2 units (see Section 4.7)
- Demonstration of at least minimum competency in a comprehensive Clinical Performance Examination (see Section 4.9)
- United States Medical Licensing Examination (USMLE) requirements (see Section 2.8)

*Students beginning clerkships in Period 11 of the 2004-05 academic year or later are also required to complete MED 313A and INDE 297.*
2.8 UNITED STATES MEDICAL LICENSING EXAMINATIONS (USMLE): STEP 1, STEP 2 CK AND STEP 2 CS

To graduate, students must pass USMLE Step 1 and Step 2 CK (Clinical Knowledge), and must have taken the Step 2 CS (Clinical Skills). The National Board of Medical Examiners (NBME) sets the level for passing the steps of the USMLE.

Students must receive an overall pass on Step 1 of the USMLE by February 1 of the first clinical year. Students appearing on the agenda of the Committee on Performance, Professionalism and Promotion (CP³) as a result of academic deficiencies in pre-clerkship courses must sit for the USMLE Step 1 prior to beginning clerkships.

Students must receive an overall pass on Step 2 CK (Clinical Knowledge). Students should apply for Step 2 by November 1 of their last year and must sit for the examination no later than March 30 in order to ensure that test scores are received by the School of Medicine Registrar in time to clear students for graduation.

Failure to meet these requirements will result in review by the CP³. Passing an institutionally administered USMLE equivalency exam may, under certain circumstances, serve to meet Step 2 CK requirements for the MD degree. Such institutionally administered USMLE equivalency exams do not, however, meet requirements for licensure to practice medicine.

Students must take the USMLE Step 2 CS (Clinical Skills) examination prior to graduation. A passing score is not required for graduation but is required to sit for Step 3; passing Step 3 is required for licensure in California and virtually every other state. Note: Students not intending to enter the residency match may qualify for an exemption. A letter co-signed by the student and advisor must be submitted to the CP³ for approval. The student must have passed the school’s CPX exam before requesting the Step 2 CS exemption.

The USMLE Step 1 and Step 2 CK are administered by computer at Prometric Test Centers. Testing occurs throughout the year, except for the first two weeks in January.

Up-to-date information on the availability of testing times at Prometric is posted at:

http://www.prometric.com

Scheduling permits for a practice test session may be obtained at:

http://www.usmle.org

Information on NBME Self-Assessment Services can be found at:

http://www.nbme.org/Students/sas/sas.html

Testing for Step 2 CS is currently offered at five centers in different areas of the country. Information on the location of the testing centers is available in the USMLE Bulletin of Information or at

http://www.usmle.org/examinations/step2/cs/CSECAddresses.html
2.9 SCHOOL OF MEDICINE STATEMENT ON PROFESSIONALISM

The following statement on professionalism is adapted from statements of the American Boards of Internal Medicine and of Pediatrics. These standards of professionalism must be met in order for a student to qualify for conferral of the MD degree from the Stanford University School of Medicine.

Professionalism comprises those attributes and behaviors that serve to maintain patient interests above physician self-interest. Professionalism extends beyond interactions with patients and their families, however. Professionalism also involves relationships and interactions between all those involved in medical education and the delivery of patient care including physicians, students, administrators, and allied health professionals. It has implications for research activities and interactions with for-profit companies, governmental agencies, and other outside entities. Professionalism should pervade all of our activities in medicine and should include:

- A commitment to the highest standards of excellence in the practice of medicine and in the generation and dissemination of knowledge.
- A commitment to sustain the interests and welfare of patients.
- A commitment to be responsive to the health needs of society.

The elements of professionalism include altruism, accountability, responsibility, excellence, duty, honesty, integrity, and respect for others. Physicians, students of medicine, and all staff participating in medical student education and patient care at Stanford University School of Medicine are expected to aspire to these ideals, further defined as:

- **Altruism** is the unselfish regard for and devotion to the welfare of others and is a key element of professionalism. Self-interest or the interests of other parties should not interfere with the care of one’s patients and their families.

- **Accountability and responsibility** are required at many levels – individual patients, society and the profession. First, there must be accountability to one’s patients and to their families. There must also be accountability to society for addressing the health needs of the public and to ensure that the public’s needs are addressed. One must also be accountable to the profession to ensure that the ethical precepts of practice are upheld. Inherent in responsibility is reliability in completing assigned duties or fulfilling commitments. There must also be a willingness to accept responsibility for errors.

- **Excellence** entails a conscientious effort to exceed ordinary expectations and to make a commitment to life-long learning. Commitment to excellence is an acknowledged goal for all physicians and students of medicine. A key to excellence is the pursuit of and commitment to providing the highest quality of health care through lifelong learning, education, and reflection. One must seek to learn from errors and aspire to excellence through self-evaluation and acceptance of the critiques of others.

- **Duty** is the free acceptance of a commitment to service. This commitment entails being available and responsive when “on call,” accepting inconvenience to meet the need of one’s patients, enduring unavoidable risks to oneself when a patient’s welfare is at stake, advocating the best possible care regardless of ability to pay, seeking active roles in professional organizations, and volunteering one’s skills and expertise for the welfare of the community.
• **Honesty and integrity** are the consistent regard for the highest standards of behavior and the refusal to violate one’s personal and professional codes. Honesty and integrity imply being fair, being truthful, keeping one’s word, meeting commitments, and being forthright in interactions with patients, peers, and in all professional work, whether through documentation, personal communication, presentations, research, or other aspects of interaction. They require awareness of situations that may result in conflict of interest or that result in personal gain at the expense of the best interest of the patient.

• **Respect for others** is the essence of humanism, and humanism is central to professionalism. This respect extends to all spheres of contact, including but not limited to patients, families, other physicians, and professional colleagues, including nurses, residents, fellows, and medical students. One must treat all persons with respect and regard for their individual worth and dignity. One must listen attentively and respond humanely to the concerns of patients and family members. Appropriate empathy for and relief of pain, discomfort, and anxiety should be part of the daily practice of medicine. One must be fair and nondiscriminatory and be aware of emotional, personal, family, and cultural influences on patient well-being and patients’ rights and choices of medical care. It is also a professional obligation to respect appropriate patient confidentiality.

### 2.10 SCHOOL OF MEDICINE STANDARDS OF CONDUCT FOR THE TEACHER-LEARNER RELATIONSHIP

**Standards**

A. Stanford School of Medicine (SoM) is committed to providing a work and educational environment that is conducive to teaching and learning, research, the practice of medicine and patient care. This includes a shared commitment among all members of the SoM community to respect each person’s worth and dignity, and to contribute to a positive learning environment where medical students are enabled and encouraged to excel. Given their roles in the educational process and their inherently unequal positions vis-à-vis students, all instructional personnel (including faculty, residents, and other members of the healthcare team) are to treat students with courtesy, civility and respect and with an awareness of the potential impact of their behavior on such students’ professional futures.

B. Conduct inconsistent with this policy can occur in a variety of forms and may seriously impair learning. In particular, instructional personnel are expected to create an environment in which feedback regarding their performance can be given openly by students without concern for reprisal, and which is free of exploitation, harassment, impermissible discriminatory treatment, humiliation, or other mistreatment or abuse of medical students. Examples of conduct inconsistent with these standards might include:

i. Sexual harassment
ii. Physical or verbal abuse
iii. Assigning duties as punishment rather than education
iv. Requiring a student to perform personal services (such as shopping or babysitting)
v. Unwarranted exclusion from reasonable learning or professional opportunities
vi. Evaluating or grading on inappropriate criteria (or threatening to do so)
vii. Harassment or discrimination on the basis of sex, race, age, color, disability, religion, sexual orientation, gender identity, national or ethnic origin, or any other characteristic protected by applicable law.

C. Note: The expectations stated in this policy primarily relate to the standards of conduct for instructional personnel. For their part, medical students are expected to adhere to similar standards of respectful and professional behavior, including (but not limited to) the standards of conduct for students set forth in the MD Program Handbook and Policy Manual: Procedures, Policies and Essential Information such as sections 2.9 (School of Medicine Statement of Professionalism), 2.11
GUIDELINES FOR APPLICATION
D. These standards of conduct are applicable to all SoM instructional personnel (including faculty, residents and other members of the healthcare team) in their interactions with Stanford medical students—whether on or off campus and whether in formal educational (such as clinical or classroom) or in social settings.
E. In general, a determination of whether specific conduct is inconsistent with this policy will depend on a case-by-case analysis of the particular facts and circumstances, and the use of a “reasonable medical student” standard.
F. Students subjected to abuse, discrimination, mistreatment or harassment have a right to seek timely and effective remediation with the full support of the SoM and Stanford University. In addition, retaliation and/or reprisals against an individual who in good faith reports or provides information in an investigation about conduct that may violate this policy is prohibited.
G. Conduct inconsistent with this policy may consist of repeated actions or may even arise from a single incident if sufficiently egregious.
H. In the review of conduct under this policy, other Stanford University and SoM policies and procedures (such as Stanford’s Sexual Harassment and Consensual Sexual or Romantic Relationships Policy) may become relevant.

THE RESPECTFUL EDUCATOR CONDUCT COMMITTEE (RECC)
The Respectful Educator Conduct Committee (RECC) is a standing committee to carry out the purposes and procedures set forth in this policy.
I. The committee meets quarterly, and on an ad hoc basis if it is deemed necessary by the Chair.
J. The committee is chaired by the Associate Dean for Medical Student Life Advising, who is hereafter referred to as the Chair.
K. The composition of the committee includes the following as members:
   i. The Chair
   ii. One or more clinical students
   iii. An Academic Advising Dean
   iv. The Director of Graduate Medical Education (or designee)
   v. The Director of Clerkships
   vi. The Director of Educators for Care
   vii. A Residency Training Program Director
   viii. A Resident
   ix. The Chair of the Physician Wellbeing Committee

L. The RECC will keep such confidential records of its proceedings as are appropriate to support its purposes of education and concern resolution.

PROCEDURES
The following procedures for handling incidents of potential violations of the Standards of Conduct for the Teacher-Learner Relationship place a strong emphasis on resolving complaints informally. The procedures include advising and mediation. It is important to note that the procedures do not preempt other formal or informal channels available within the University. It is recommended that students should -- as a first step-- contact the Chair of the RECC to review the various options that are available (on a confidential basis as that status is granted to the Associate Dean for Medical Student Life Advising – http://med.stanford.edu/md/student-development/confidentiality.html). The Chair of the RECC is
empowered to explore with the student a plan of action that may include some or all of the steps described below.

M. Informal - Concern about potential violations may be handled by communication with various individuals, including but not limited to the following:

i. Direct discussion (by the student or others) with the alleged offender.

ii. Conversation (by the student or others) with individuals such as the chief resident, attending physician, clerkship director, and/or Educator For Care (E4C) faculty.

iii. The Chair of the RECC may present the concern to all or a portion of the RECC, and to such third parties that the Chair of the RECC deems appropriate for seeking an informal resolution.

iv. The Chair of the RECC also may in his/her discretion refer the matter to an alternate available University process or office, such as an existing grievance process or the Sexual Harassment Policy Office or the Director of the Diversity and Access Office.

v. Direct conversation by the student with confidential resources including but not limited to the Ombuds, Counseling and Psychological Services, and the Deans of Religious Life.

Informal solutions to address the problem may be recommended and/or pursued such as (but not limited to) systems changes or educational interventions. The Chair of the RECC will be available throughout the process to discuss with the student the status of the matter, including any potential resolution.

N. Formal – If no resolution is reached and the student wishes to proceed with a more formal grievance or complaint process, the Chair of the RECC may refer the student to other existing processes or may (in an appropriate case) accept from the student a written grievance or complaint to use the procedure described below.

i. The student should set forth in writing the substance of the grievance or complaint, the grounds for it and the evidence on which it is based, and the efforts taken to date to resolve the matter. It is at this stage that the matter becomes a formal grievance or complaint.

ii. The grievance or complaint document should be submitted to the Chair of the RECC. A grievance should be filed in a timely fashion, i.e., normally within thirty days of the end of the academic quarter in which the action that is the subject of the grievance or complaint occurred. A delay in filing may be grounds for rejection of that grievance or complaint.

iii. The Chair of the RECC will review the grievance or complaint and (if it reflects an appropriate use of the process) will then promptly (within 7 days) transmit the grievance or complaint to the Senior Associate Dean for Medical Education (SADME) for handling.

iv. The SADME shall promptly initiate a review, which should normally be completed within sixty days. The SADME may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance officer or other designee, who will evaluate and/or address the matter as the SADME directs. The SADME may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance or complaint arose) for further consideration.

v. In undertaking this review, the SADME (or his or her designee) may request a response to the issues raised in the grievance or complaint from any individuals believed to have information the reviewer considers relevant, including faculty, staff and students.

vi. The SADME (or his or her designee) shall issue his or her decision in writing, and take steps to initiate such corrective action as is called for (if any). Conduct meriting discipline shall be brought to the attention of the appropriate disciplinary process.

vii. Appeal
a. If the student is dissatisfied with the disposition by the SADME (or his or her
designee), he or she may appeal to the Dean of the School of Medicine. The
appeal should be filed in writing with the Dean within ten days of the
issuance of the decision by the SADME (or his or her designee); a delay in
filing the appeal may be ground for rejection of that appeal.
b. The Dean may attempt to resolve the matter informally, and may refer the
matter (or any part of it) to a grievance appeal officer or other designee, who
will review the matter at the Dean’s direction. The Dean also may remand
the matter to the appropriate administrator (including to the administrative
level at which the grievance arose) for further consideration.
c. The Dean should normally complete his or her review of the appeal and issue
his or her decision in writing within forty-five days. That decision is final. It
is not subject to further review by any other University process.

GENERAL PROVISIONS

1. Time Guidelines – The time frames set forth herein are guidelines. They may be extended by the Chair of
the RECC, the SADME or the Dean, as applicable, in his or her discretion for good cause (including for
reasons relating to breaks in the academic calendar).

2. Advisers – A student initiating or participating in a grievance or complaint under this procedure may be
accompanied by an adviser in any discussion with the Chair of the RECC, the SADME, the Dean, or their
designees (such as a grievance or grievance appeal officer); such adviser must be a current Stanford faculty,
staff member or student.

3. Ombuds – Students should be aware that the University Ombuds
(http://www.stanford.edu/dept/ocr/ombuds) is available to discuss and advise on any matters of University
concern and frequently helps expedite resolution of such matters. Although it has no decision making
authority, the Ombuds’ Office has wide powers of inquiry.

4. Sexual Harassment and Disability related issues- For further information and resources concerning sexual
harassment, students should refer to the web page of the Sexual harassment Policy Office at
http://harass.stanford.edu. For further information and resources concerning disabilities and accessible
education, students should refer to the web page of the Office of Accessible Education at
http://www.stanford.edu/group/DRC/

5. No retaliation- Stanford University prohibits retaliation or reprisals against individuals based on their
pursuit in good faith of a grievance or complaint under this procedure, or their participation in good faith in
the grievance or complaint process.

6. Standards for Review- If the grievance or complaint involves a decision that is being challenged, the review
by the SADME, as well as the review by the Dean on appeal, usually will be limited to the following
considerations:
   a. Were the proper facts and criteria brought to bear on the decision? Were improper or extraneous
facts or criteria brought to bear that substantially affected the decision to the detriment of the
   grievant?
   b. Were there any procedural irregularities that substantially affected the outcome of the matter to the
detriment of the grievant?
   c. Given the proper facts, criteria, and procedures, was the decision one which a person in the position
   of the decision maker might reasonably have made?
EDUCATION

The Stanford School of Medicine will provide ongoing education to promote a positive learning environment and discourage violations of the standards of conduct for the teacher-learner relationship. Such education serves several purposes. First, it promotes an environment of respect for each person’s worth and dignity. Second, it informs students that there are procedures available for them to register concerns of educator conduct violations, which can be investigated and addressed without fear of retaliation. Third, it informs instructional personnel of the SoM’s standards of conduct and procedures for responding to allegations of violations of these standards. This policy will be included in the MD Program, Resident and Faculty handbooks and posted on the medical school website. Educational sessions on this topic will be introduced during the pre-clerkship curriculum and readdressed early in the clinical curriculum. Educational sessions on this topic will also be presented to educational personnel including but not limited to at forums such as resident orientation, department meetings, and staff meetings. The materials and methods for providing this education will be the responsibility of the Respectful Educator Conduct Committee.

At the time of the publication of the 2010-2011 MD Program Handbook and Policy Manual, this policy still remains to be reviewed and approved by the School of Medicine Faculty Senate. The reader is advised to check the web version (http://med.stanford.edu/md/policies/) for the most recent policy language.

2.11 SCHOOL OF MEDICINE TECHNICAL, NON-ACADEMIC STANDARDS

Essential Abilities and Characteristics Required for Admission to and Completion of the MD Degree

The MD degree is a broad undifferentiated degree attesting to general knowledge in medicine and the basic skills required for the practice of medicine. Essential abilities and characteristics required for completion of the MD degree consist of certain minimum physical and cognitive abilities and sufficient mental and emotional stability to assure that candidates for admission, promotion, and graduation are able to complete the entire course of study and participate fully in all aspects of medical training, with or without reasonable accommodation. Stanford University School of Medicine intends for its graduates to become competent and compassionate physicians who are capable of entering residency training (graduate medical education) and meeting all requirements for medical licensure. The School of Medicine is committed to educating and training future leaders in medicine, many of whom will pursue careers in academic medicine. For purposes of this document and unless otherwise defined, the term “candidate” means candidates for admission to the MD program as well as enrolled medical students who are candidates for promotion and graduation.

The following abilities and characteristics are defined as technical standards, which, in conjunction with academic standards established by the faculty, are requirements for admission, promotion, and graduation. Delineation of technical standards is required for the accreditation of U.S. medical schools by the Liaison Committee on Medical Education. Although these standards serve to delineate the necessary physical and mental abilities of all candidates, they are not intended to deter any candidate for whom reasonable accommodation will allow the fulfillment of the complete curriculum. Candidates with questions regarding technical standards are encouraged to contact the School of Medicine Student Life Advisor immediately to begin to address what types of accommodation may be considered for development to achieve these standards. Admission to Stanford University School of Medicine is conditional on the candidate’s having the ability to satisfy these technical standards, with or without reasonable accommodation, and results from a process that examines and values all of the skills, attitudes and attributes of each candidate on a case-by-case basis.

The School of Medicine has an ethical responsibility for the safety of patients with whom students and graduates will come in contact. Although students learn and work under the supervision of the faculty students interact with
patients throughout their medical education. Patient safety and well-being are therefore major factors in establishing requirements involving the physical, cognitive, and emotional abilities of candidates for admission, promotion, and graduation. Candidates must have the physical and emotional stamina and capacity to function in a competent manner in the hospital, classroom and laboratory settings, including settings that may involve heavy workloads, long hours and stressful situations. Individuals whose performance is impaired by abuse of alcohol or other substances are not suitable candidates for admission, promotion, or graduation.

**TECHNICAL (NON-ACADEMIC) STANDARDS**

**Observation:**

Candidates must be able to observe demonstrations and participate in experiments of science, including but not limited to such things as dissection of cadavers; examination of specimens in anatomy, pathology, and neuroanatomy laboratories; and microscopic study of microorganisms and tissues in normal and pathologic states. Candidates must be able to accurately observe patients and assess findings. They must be able to obtain a medical history and perform a complete physical examination in order to integrate findings based on these observations and to develop an appropriate diagnostic and treatment plan.

**Communication:**

Candidates must be able to communicate effectively and efficiently with patients, their families, and members of the health care team. They must be able to obtain a medical history in a timely fashion, interpret non-verbal aspects of communication, and establish therapeutic relationships with patients. Candidates must be able to record information accurately and clearly, and communicate effectively in English with other health care professionals in a variety of patient settings.

**Motor Function:**

Candidates must possess the capacity to perform physical examinations and diagnostic maneuvers. They must be able to respond to emergency situations in a timely manner and provide general and emergency care. They must adhere to universal precaution measures and meet safety standards applicable to inpatient and outpatient settings and other clinical activities.

**Intellectual-Conceptual, Integrative, and Quantitative Abilities:**

Candidates must have sufficient cognitive (mental) abilities and effective learning techniques to assimilate the detailed and complex information presented in the medical student curriculum. They must be able to learn through a variety of modalities including, but not limited to, classroom instruction; small group, team and collaborative activities; individual study; preparation and presentation of reports; and use of computer technology. Candidates must be able to memorize, measure, calculate, reason, analyze, synthesize, and transmit information across modalities. They must recognize and draw conclusions about three-dimensional spatial relationships and logical sequential relationships among events. They must be able to formulate and test hypotheses that enable effective and timely problem solving in diagnosis and treatment of patients in a variety of clinical modalities.

**Behavioral and Social Attributes:**
Candidates must demonstrate the maturity and emotional stability required for full use of their intellectual abilities. They must accept responsibility for learning, exercising good judgment, and promptly completing all responsibilities attendant to the diagnosis and care of patients. They must understand the legal and ethical aspects of the practice of medicine and function within both the law and ethical standards of the medical profession. Candidates must be able to work effectively, respectfully and professionally as part of the healthcare team, and to interact with patients, their families, and health care personnel in a courteous, professional, and respectful manner. They must be able to tolerate physically taxing workloads and long work hours, to function effectively under stress, and to display flexibility and adaptability to changing environments. They must be capable of regular, reliable and punctual attendance at classes and in regard to their clinical responsibilities. Candidates must be able to contribute to collaborative, constructive learning environments; accept constructive feedback from others; and take personal responsibility for making appropriate positive changes. It is expected that minimum accommodation will be requested with regards to this set of standards.

**Ethical and Legal Standards:**

Candidates must meet the legal standards to be licensed to practice medicine in the State of California. As such, candidates for admission must acknowledge and provide written explanation of any felony offense or disciplinary action taken against them prior to matriculation in the School of Medicine. In addition, should the student be convicted of any felony offense while in medical school, they agree to immediately notify the Student Life Advisor as to the nature of the conviction. Failure to disclose prior or new offenses can lead to disciplinary action by the School of Medicine that may include dismissal.

**EQUAl ACCESS TO THE SCHOOL OF MEDICINE’S EDUCATIONAL PROGRAM**

The Stanford University School of Medicine intends for its students and graduates to become competent and compassionate physicians who are capable of entering residency training (graduate medical education) and meeting all requirements for medical licensure.

The School of Medicine has an institutional commitment to provide equal educational opportunities for qualified students with disabilities who apply for admission to the MD degree program or who are enrolled as medical students. The School of Medicine is a leader in student diversity and individual rights, with a strong commitment to full compliance with state and federal laws and regulations (including the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990 (as amended), and California law (Civil Code 51 and 54). A “qualified person with a disability” is an individual with a disability who meets the academic and technical standards requisite to admission or participation in the School of Medicine’s educational programs, with or without accommodations. As previously noted, admitted candidates with disabilities are reviewed individually, on a case-by-case basis, with a complete and careful consideration of all the skills, attitudes and attributes of each candidate to determine whether there are any reasonable accommodations or available options that would permit the candidate to satisfy the standards. An accommodation is not reasonable if it poses a direct threat to the health or safety of self and/or others, if making it requires a substantial modification in an essential element of the curriculum, if it lowers academic standards, or if it poses an undue administrative or financial burden. Except in rare circumstances, the use by the candidate of a third party (e.g., an intermediary) to perform any of the functions described in the Technical Standards set forth above would constitute an unacceptable substantial modification.

**Process**

As stated above, admission and promotion at the School of Medicine is conditional on the candidate’s having the willingness and ability to satisfy the technical standards, with or without reasonable accommodation.
Admitted candidates who have a disability and need accommodations should initiate discussions with the Associate Dean for Medical Student Life Advising or the Assistant Dean for Student Affairs as soon as the offer of admission is received and accepted. They are liaisons with the University’s Office of Accessible Education (OAE). It is the responsibility of a candidate with a disability to provide sufficiently current information documenting the general nature and extent of his/her disability, and the functional limitations proposed to be accommodated. Evaluating and facilitating accommodation requests is a collaborative effort between the candidate, the School of Medicine and the OAE. The School of Medicine reserves the right to request new or additional information.

Should a candidate have or develop a condition that would place patients, the candidate or others at risk or that may affect his/her need for accommodation, an evaluation with the School of Medicine and the OAE may be necessary. As in initial assessments, a complete and careful reconsideration of all the skills, attitudes and attributes of each candidate will be performed. This includes an assessment of his/her willingness, desire and ability to complete the medical curriculum and fulfill all requirements for medical licensure, and will be informed by the knowledge that students with varied types of disabilities have the ability to become successful medical professionals.

### 2.12 NOTE ON LICENSURE

Meeting the graduation requirements for the MD degree at Stanford University School of Medicine does not guarantee eligibility for state licensure. Some states have specialized curricular requirements for licensure, and students are advised to check with the Medical Board in states of possible residency for licensure requirements.
3. REQUIRED PRE-CLERKSHIP CURRICULUM

3.1 Quarter 1 (Q1) through Quarter 6 (Q6) Week-by-Week Grids

3.2 Required Course Descriptions

**Notes:**
- Practice of Medicine
- INRRI/CC Breakout Sessions
3.2 REQUIRED COURSE DESCRIPTIONS

YEAR ONE, Q1: AUTUMN – 13 WEEKS

INDE 201 – Practice of Medicine I

11 units, Aut (Preetha Basaviah)

The Practice of Medicine is a six-quarter series extending throughout the first two years of the MD program, interweaving core skills training in medical interviewing and the physical examination with other major threads addressing the context of medical practice: information literacy, nutrition principles, clinical epidemiology and biostatistics, evidence-based practice, psychiatry, biomedical ethics, health policy, population health. Throughout the curriculum, clinical correlations map directly back to the basic science content.

A major goal of this quarter is to develop basic patient-physician communication and medical interviewing skills, as well as understand basic concepts in ethics, epidemiology and biostatistics, nutrition, computer applications in health care, and population health. At the end of this quarter, students participate in a performance-based assessment of their medical interview skills.

- **History-taking and physical examination** training begins in the first quarter, using small groups with physician preceptors to teach, serve as role models, and reinforce principles and techniques. The core clinical skills are acquired through hand-on practice, and evaluated through an extensive program of simulated medical encounters, in which students interview, examine, and “manage” patients in a mock clinic. Large group sessions cover a range of topics from cross-cultural issues to domestic violence and death and dying. Small group meetings provide an environment for interactive learning. Standardized patients with videotaping coupled with feedback are used to improve student skills.

- **Information Literacy (IL)** is taught throughout the two years of the POM curriculum. IL is defined at Stanford as the ability to recognize when information is needed and to locate, evaluate, and use effectively the needed information. IL skills are integrated into Evidence-Based Practice, Population Health, Scholarly Concentrations, and Clinical Reasoning sessions.

- **Nutrition principles** are acquired through interactive, Web-based instruction, reinforced through problem-based learning cases, and runs in parallel to the basic science components over the first year.

- **Epidemiology and Biostatistics** covers the taxonomy of epidemiological studies, how to critically read a journal article, and how to recognize and understand the concepts behind different clinical study designs. Topics include bias, confounding, diagnostic testing and screening, and “how statistics can lie.”

- **Psychiatry** introduces students to the unique role of medical students in talking with patients, the difference between process and content in patient communication, how to respond to breaks in the patient-physician relationship, and the relationship between the quality of the patient-physician interaction and health outcomes.

- **Bioethics** includes important ethical issues in medical practice, such as confidentiality, informed consent, rationing of care, research ethics.
Population health exposes students to concepts of public health, community action, and advocacy. In addition to classroom instruction, this component includes a yearlong, community-based project, in which students work with community partners in actions to promote health.

SURG 201 – Basic Cardiac Life Support
1 unit, Aut (Rebecca Smith-Coggins)

All medical students must be certified in Basic Cardiac Life Support before the end of the first (autumn) quarter. Students who provide documentation of certification received within six months prior to the date of matriculation will be exempted from the requirement. The course teaches one- and two-rescuer CPR, management of an obstructed airway, and CPR for infants and children. Upon completion of the course, students receive an American Heart Association certificate in BLS.

SURG 203A – Human Anatomy
11 units, Aut (John Gosling, Ian Whitmore)

Introduction to human structure and function presented from a medical perspective. Introduction to the physical examination and frequently-used medical imaging techniques. Students are required to attend lectures, actively participate in seminar groups, and engage in dissection of the human body in the anatomy laboratory. Surgery 203A presents structure of the thorax, abdomen, pelvis and limbs.

YEAR ONE, Q1: AUTUMN – WEEKS 1-5

BIOC 205 – Molecular Foundations of Medicine
3 units, Aut (Gilbert Chu, Mark Krasnow, Patrick Brown)

Topics include DNA structure, replication, repair, and recombination; gene expression, including mechanisms for regulating transcription and translation; chromosome structure and function; and methods for manipulating DNA, RNA, and proteins. Patient presentations and journal clubs illustrate how molecular biology affects the practice of medicine.

INDE 216 – Cells to Tissues
3 units, Aut (Julie Theriot, Andrew Connolly)

Focuses on the cell biology and structural organization of human tissues as self-renewing systems. Topics include identification and differentiation of stem cells, regulation of the cell cycle and apoptosis in normal and cancerous cells, cell adhesion and polarity in epithelial tissues, intracellular transport, and cell migration. Histology laboratory sessions examine normal and abnormal samples of blood, epithelia, skin, connective tissue, muscle, bone and cartilage. Patient presentations and small group discussions of current medical literature illustrate how cell biology influences medical practice.

YEAR ONE, Q1: AUTUMN – WEEKS 6-13

BIOC 200 – Applied Biochemistry
1 unit, Aut (Pehr Harbury, Julie Theriot, Tina Cowan)

Fundamental concepts of biochemistry as applied to clinical medicine. Topics include thermodynamics, enzyme kinetics, vitamins and cofactors, metabolism of carbohydrates, lipids, amino acids and
nucleotides, and the integration of metabolic pathways. Clinical case studies discussed in small-group, problem-based learning sessions.

**DBIO 201 – Development and Disease Mechanisms**  
*4 units, Aut (Ellen Porzig, David Kingsley, Seung Kim)*

Mechanisms that direct human development from conception to birth. Conserved molecular and cellular pathways regulate tissue and organ development; errors in these pathways result in congenital anomalies and human diseases. Topics: molecules regulating development, cell induction, developmental gene regulation, cell migration, programmed cell death, pattern formation, stem cells, cell lineage, and development of major organ systems. Emphasis on links between development and clinically significant topics including infertility, assisted reproductive technologies, contraception, prenatal diagnosis, multiparity, teratogenesis, inherited birth defects, fetal therapy, adolescence, cancer, and aging.

**GENE 202 – Human Genetics**  
*4 units, Aut (Kelly Ormond, Louanne Hudgins)*

Theoretical and experimental basis for the genetics of human health and disease. Molecular, chromosomal, biochemical, developmental, cancer, and medical genetics, emphasizing the last. Clinical case discussions. Prerequisites: biochemistry; basic genetics.

**YEAR ONE, Q2: WINTER – 9 WEEKS**

**INDE 202 – Practice of Medicine II**  
*8 units, Win (Preetha Basaviah)*

Medical interview and physical examination skills, information literacy, nutrition principles, evidenced-based practice, health policy, and population health are covered. At the end of this quarter, students participate in a performance-based assessment of their medical interview and physical examination skills. See INDE 201 for a complete description of the Practice of Medicine course series.

**INDE 220 – Human Health and Disease I**  
*3 units, Win (Don Regula, Robert Siegel, James Whitlock)*

This course establishes the foundation for the Human Health and Disease block which spans Q3 (Spring quarter Year One) through Q5 (Winter quarter Year Two). The Human Health and Disease block presents organ system-based histology, pathology, physiology, pharmacology, and infectious disease in a sequence of interdisciplinary courses. Each organ-specific integrated course includes a review of the anatomy and related histology, normal function of that organ system, how the organ system is affected by and responds to disease including infection, and how diseases of that organ system are treated (therapeutics). Clinical correlates and clinical skills related to that organ system are presented in special afternoon sessions in the Practice of Medicine block.

**IMMUNOL 205 – Immunology in Health and Disease**  
*4 units, Win (David Lewis)*

Concepts and application of adaptive and innate immunology and the role of the immune system in human diseases. Case presentations of diseases including autoimmune diseases, infectious disease and
vaccination, hematopoietic and solid organ transplantation, genetic and acquired immunodeficiencies, hypersensitivity reactions, and allergic diseases. Problem sets based on lectures and current clinical literature. Laboratory in acute and chronic inflammation.

**NBIO 206 – The Nervous System**  
*8 units, Win (Ricardo Dolmetsch)*

Introduction to the structure and function of the nervous system, including neuroanatomy, neurophysiology, and systems neurobiology. Topics include the properties of neurons and the mechanisms and organization underlying higher functions. Framework for general work in neurology, neuropathology, clinical medicine, and for more advanced work in neurobiology. Lecture and lab components must be taken together.

**SURG 203B – Human Anatomy**  
*4 units, Win (John Gosling, Ian Whitmore)*

Structure and function from a medical perspective, the physical examination, and frequently-used medical imaging techniques. Students are required to attend lectures, actively participate in seminar groups, and engage in dissection of the human body in the anatomy laboratory. Surgery 203B presents structure of the head, neck and back.

**YEAR ONE, Q3: SPRING – 9 WEEKS**

**INDE 203 – Practice of Medicine III**  
*8 units, Spr (Preetha Basaviah)*

Medical interview and physical examination skills, biomedical literature retrieval and appraisal, nutrition principles, evidence-based practice, biomedical ethics, and population health are covered. Students begin clinical problem-solving sessions to learn the approach to common and important clinical problems. Cases integrate other course themes of population health, evidence-based practice, clinical ethics, nutrition, health policy, and behavioral medicine. Students begin to transition from comprehensive to problem-focused patient encounters. Students also gain exposure to geriatrics, initial exposure to pediatrics, and practice mental health interview skills. At the end of this quarter, students participate in a performance-based assessment of their medical interview and physical examination skills. See INDE 201 for a complete description of the Practice of Medicine course series.

**INDE 221 – Human Health and Disease II**  
*12 units, Spr (Don Regula, Brian Kobilka, Peter Kao, James Whitlock, Andrew Connolly)*

Structure, function, disease, and therapeutics of the respiratory system and the cardiovascular system. See INDE 220 for a description of the Human Health and Disease block.

**YEAR TWO, Q4: AUTUMN – 13 WEEKS**

**INDE 204 – Practice of Medicine IV**  
*10 units, Aut (Preetha Basaviah)*

In second-year POM, there are two major educational categories: clinical reasoning and clinical exam skills. These two components are taught within five curricular components that include clinical reasoning teaching rounds and small group, clinical practicum, clinical procedures / Introduction to the Management
of the Ill Patient simulation (IMIP), advanced clinical skills, and psychiatry. Within Clinical Reasoning Sessions, students work in a problem-based learning format, analyzing cases that integrate course themes described above with clinical medicine scenarios. Within Practicum, students spend alternate one-half day(s) per week in a clinical setting with a supervising faculty member, practicing medical interview and physical examination skills. Advanced Clinical Skills sessions provide hands-on practice working with faculty and patients on particular clinical themes that correlate with the basic science curriculum as well as the clinical curriculum. Specialists often co-teach these sessions, providing a focused didactic followed by small group practice with patients, cases, and simulation exercises. Students also gain experience with oral presentations, writing clinical notes, and other practical aspects of patient care.

INDE 222 – Human Health and Disease III
15 units, Aut (Don Regula, Vivek Bhalla, Andrew Connolly, Neil Gesundheit, Paula Hillard) Anson Lowe, Alan Pao, Robert Siegel

Structure, function, disease, and therapeutics of the renal/genito-urinary system, the gastrointestinal system, the endocrine system, male and female reproductive systems, and women's health. See INDE 220 for a description of the Human Health and Disease block.

YEAR TWO, Q5: WINTER – 9 WEEKS

INDE 205 – Practice of Medicine V
8 units, Win (Preetha Basaviah)

In second-year POM, there are two major educational categories: clinical reasoning and clinical exam skills. These two components are taught within five curricular components that include clinical reasoning teaching rounds and small group, clinical practicum, clinical procedures / Introduction to the Management of the Ill Patient simulation (IMIP), advanced clinical skills, and psychiatry. Within Clinical Reasoning Sessions, students work in a problem-based learning format, analyzing cases that integrate course themes described above with clinical medicine scenarios. Within Practicum, students spend alternate one-half day(s) per week in a clinical setting with a supervising faculty member, practicing medical interview and physical examination skills. Advanced Clinical Skills sessions provide hands-on practice working with faculty and patients on particular clinical themes that correlate with the basic science curriculum as well as the clinical curriculum. Specialists often co-teach these sessions, providing a focused didactic followed by small group practice with patients, cases, and simulation exercises. Throughout, students gain experience with oral presentations, writing clinical notes, and other practical aspects of patient care. Students also participate in the psychiatric and behavioral medicine curriculum as part of a combined Brain and Behavior block with the Human Health and Disease (HHD) course. At the end of this quarter, students participate in a comprehensive four-station objective structured clinical examination (OSCE) performance-based assessment of their medical interview, physical examination, and clinical problem-solving skills (called the Mini-CPX).

INDE 223 – Human Health and Disease IV
11 units, Win (Don Regula, James Ferrell, Robert Siegel, Bertil Glader, Hannes Vogel, Neil Schwartz)

Structure, function, disease, and therapeutics of the central nervous system, hematologic system and multi-systemic infectious disease. See INDE 220 for a description of the Human Health and Disease block.
**YEAR TWO, Q6: SPRING – 4 WEEKS**

**INDE 206 – Practice of Medicine VI**  
*9 units, Spr (Preetha Basaviah)*

Prep for the Clerkships is a month-long curriculum focused on preparing students with skills, knowledge, and approaches directly applicable to their upcoming clinical rotations. The experience provides hands-on workshops, simulated sessions, patient encounters, small group sessions, and a few large group sessions comprising a capstone for the two-year longitudinal curriculum in POM. In general, the individual sessions are tied to clinically relevant themes, including: procedural skills (cadaver lab, EMED, IMIP); clinical skills (Mini-CPX, bedside rounds, advanced presentations, SOAP notes, patient safety); clinical specialty sessions (dermatology, palliative medicine, ophthalmology); clinical essentials (EKG, general radiology, interventional radiology, fluid and electrolytes, order writing); and professionalism.
3.3 STUDENT PATHWAYS THROUGH HUMAN HEALTH AND DISEASE (HHD) AND PRACTICE OF MEDICINE (POM)

1. All quarters of HHD and POM must be done in the established curricular sequence:

   **HHD (Human Health and Disease)**
   
   Q2 – INDE 220  
   Q3 – INDE 221  
   Q4 – INDE 222  
   Q5 – INDE 223  

   **POM (Practice of Medicine)**
   
   Q1 – INDE 201  
   Q2 – INDE 202  
   Q3 – INDE 203  
   Q4 – INDE 204  
   Q5 – INDE 205  
   Q6 – INDE 206 (four weeks)
• Students wishing to take a quarter (or more) off will be expected to reenter the curriculum sequence one year later from where he/she left off.

• Students wishing to split the two-year curriculum over three years must do so by splitting the morning HHD and the afternoon POM curriculum in one of two ways:

  **Option #1: Split curriculum begins following Q2:**
  HHD (mornings) only: Q3 (Spr) → Q4 (Aut) → Q5 (Win)

  followed by

  POM (afternoons) only: Q3 (Spr) → Q4 (Aut) → Q5 (Win) → Q6 (Spr)

  **Option #2: Split curriculum begins following completion of Q3:**
  HHD (mornings) only: Q4 (Aut) → Q5 (Win) → [Q3 Spring quarter no classes]

  followed by

  POM (afternoons) only: Q4 (Aut) → Q5 (Win) → Q6 (Spr)

• Students with compelling reasons for taking courses out of order may submit a petition to the Committee on Curriculum and Academic Policy.

• Students should understand that such approval will be rare and granted only under very unusual circumstances.

2. Taking a year (or more) out for full-time research or joint degree programs.

Students can step out of the curriculum following any quarter to do full-time research, picking up the curriculum at the point they left off except after Q6, as stipulated below.

Students wishing to take a year out after completing the basic science curriculum and before beginning clerkships are strongly encouraged to do so by completing Q1-Q5, and then re-entering to complete Q6 after their year out. Alternatively, they may complete the entire Q1-Q6 curriculum and re-enter directly into clinical clerkships.

All students taking a year (or more) for full-time research or joint degree programs are required to develop and document an individualized Clinical Skills Maintenance Plan before they step out from the MD curriculum, in order to maintain and refresh clinical skills. This plan will be developed in consultation with a faculty mentor, Advising Dean, and E4C mentor. The plan will include a) activities drawn from a menu of existing options, as well as options to be developed over time; b) specific competencies to be maintained; and c) specific metrics to demonstrate those competencies prior to re-entry into clinical clerkships.

3. Splitting the two-year curriculum over three years

Students wishing to split the two-year pre-clerkship curriculum over three or more years should consult with their Advising Dean to develop a personalized proposed plan. This plan will then be reviewed by all affected course directors, and then be referred to CCAP for final review and approval.
3.4 SCHOLARLY CONCENTRATION REQUIREMENT

The Scholarly Concentration (SC) program provides medical students with faculty-mentored scholarly experiences in areas of individual interest combined with structured coursework to support this scholarship. This required component of the MD curriculum develops critical thinking, skills in evaluating new data, and hands-on experience with the methods by which new scholarly information is generated.

Building these essential skills for leadership in medicine and research supports the institutional goals of innovation and scholarship, and fosters lifelong enthusiasm for the field of medicine.

The SC program offers 13 areas of study, including Foundation areas and Application areas. The typical SC program of study consists of work in one Foundation area and one Application area. There are seven Foundation areas, designed to develop skills and tools that can be applied to important problems in health care:

- Bioengineering
- Biomedical Ethics and Medical Humanities
- Biomedical Informatics
- Clinical Research
- Community Health
- Health Services and Policy Research
- Medical Education
- Molecular Basis of Medicine

In many cases students may find it advantageous to apply the skills developed in their Foundation area to a particular area of medicine. These students may choose to pursue an SC Application area in addition to their Foundation area. The six available Application areas are:

- Cancer Biology
- Cardiovascular Pulmonary
- International Health
- Immunology
- Neuroscience, Behavior, and Cognition
- Women’s Health

This choice of whether to pursue a Foundation area or a Foundation in combination with an Application is based on many factors, including past academic background, current interests, and future goals.

Students with interests in areas that are not well served by the available Foundation and Application areas may develop an independently designed SC. Students interested in this option should consult with Dr. Baker or Mara Violanti.

FIRST STEPS IN DECLARING AN SC

During the first year, students are encouraged to explore and compare the palette of Scholarly Concentrations by:

- talking with SC Directors and others, such as research mentors
- taking introductory courses
- attending seminars
- examining the SC and MedScholars Web sites
- reviewing course requirements
- looking at type of scholarship carried out by the faculty advisors in different SC areas

The exploration phase includes a comparison of the academic appeal of different foundation and application areas, as well as research opportunities.

**Mapping a Route to an SC**

1. Examine course requirements and opportunities for research.

2. Create a course plan of how to incorporate the SC requirements into your standard core and clerkship schedule
   
   a. key courses may be offered as early as Autumn or Winter quarter of the first year
   
   b. summer after the first year can be used for independent scholarship

*Each student situation is unique and SC Directors are willing to consider other paths tailored by their students.*

Students should meet with SC Directors and Advising Deans to craft a plan to allow successful completion of course, clerkship, and research/scholarship requirements. Students have the opportunity to adjust core class or clerkship schedules to accommodate more SC pursuits.

Students deciding to do one year of full-time research may take classes (up to four units per quarter) concurrently with the research. Courses must be approved by the mentor and the SC Director.

**Declaring an SC**

It is recommended that four-year students declare by April 1 of the first year. *ALL students MUST declare by October 1 of their second year.*

Each student must declare a Scholarly Concentration by submitting a completed Declaration Form along with a course plan, learning objectives, and general project description. Turn in the signed form, course plan, learning objectives, and scholarship description to SC Program Administrator, Mara Violanti (MSOB X3C25).

**Foundations**

**Bioengineering**

This Foundation’s required course work is designed to expose students to the intersection between engineering and medicine – from molecular to systems bioengineering – and includes technologies such as computer methods, medical imaging, biosensors, and minimally invasive therapeutic devices. Mirroring the intent of the Department of Bioengineering, this Scholarly Area looks to attract students who are enthusiastic about combining biology-based research with engineering technology and clinical applications.
Biomedical Ethics & Medical Humanities

This Foundation’s required course work is designed to explore the moral, social, and humanistic dimensions of medicine and biomedical science. Using cross-disciplinary methods such as those from philosophy, social science, film, literature, art, and law, students examine the meaning and implications of medicine and medical research.

Biomedical Informatics

This Foundation’s required course work is designed to explore information management and analysis along the biomedical research pipeline, from the analysis and interpretation of new biological datasets to the integration and management of this information in the context of clinical care.

Clinical Research

This Foundation’s required course work is designed to introduce students to the critical concepts that underpin clinical research. In addition to didactic instruction, students participate in the conduct of faculty-mentored, hypothesis-driven, clinical research projects. The projects may be descriptive (observational) or interventional in design.

Community Health

This Foundation’s curriculum empowers future physicians to improve the health of diverse communities and reduce health inequities through innovative scholarship and direct community engagement. Students learn the means to effect change through reflective service-learning, rigorous community-responsive scholarship, advocacy, and civic leadership.

Health Services and Policy Research

This Foundation’s required course work is designed to explore the ways that health care systems, governments, doctors, and patients interact to deliver health care. From regulatory policy and market forces to financial incentives and the costs and benefits of new technologies, students study ways to improve the efficiency and effectiveness of health care systems at delivering high quality care in the U.S. and abroad.

Medical Education

This Foundation’s required course work is designed to prepare students for engagement and leadership in the field of medical education. This concentration aims to promote excellence in the areas of curriculum development and delivery; evaluation and assessment; and educational technology and simulation.

Molecular Basis of Medicine

This Foundation’s required course work is designed to serve future practicing physicians by training them in how scientific data are generated and evaluated in the research laboratory, with a focus on the molecular mechanisms that underlie fundamental biological processes. Medical students participate in coursework and laboratory research side-by-side with graduate students and MSTP students pursuing the PhD and are exposed to the rigor and structure that support first-rate scientific investigation.
APPLICATIONS

Cancer Biology

This Application aims to educate medical students in the complex nature of cancer from the molecular mechanism of cancer etiology, to evaluation of the efficacies of various cancer treatments. Through this extension of the Stanford Comprehensive Cancer Center students will have access to faculty, fellows, and residents who represent molecular, cellular, genetic and pathological approaches used to develop effective medical tools for cancer diagnosis, treatment, and prevention.

Cardiovascular Pulmonary

This Application provides an opportunity to understand the heart and the lungs as an integrated system, and utilize this system to develop a multidisciplinary approach to design more effective diagnostic tools and more selective treatments. Through the Stanford Cardiovascular Institute medical students have access to an educational structure provided by key faculty in this area. Its mission is to train a new generation of basic and clinician investigators who will have a broad understanding of cardiovascular and pulmonary medicine and biology and who will be able to apply cutting-edge technology to clinically relevant questions.

Immunology

This Application introduces students to immunology research and scholarship. Working with internationally recognized experts, students can become involved in projects in any of the major areas of immunology, from basic cellular and molecular immunology, to translational areas, including allergy, autoimmunity, microbial immunity, tumor immunology, transplantation immunology, and vaccine development.

Global Health

This Application give students an understanding of the spectrum of challenges—from political to sociological to biomedical—that limit provision of health care to the world’s poorest people, provides insights into problem-solving for complex global health issues and fosters mentored hands-on experience in the field that applies knowledge attained to real world problems of the world’s poorest people.

Neuroscience, Behavior, and Cognition

This Application promotes investigation in all areas of neuroscience: systems and behavioral, molecular and cellular, developmental, clinical, and computational. This field seeks to understand both neurological disease and the normal functioning of the central nervous system, from individual molecules to the circuits and computational aspects involved in generating behavior. In conjunction with the Neuroscience Institute at Stanford, a broad range of faculty interests support students in research in any of these areas of neuroscience. The ultimate purpose of this work is to improve care of the patient with neurological disease.

Women’s Health

This Application addresses the wide scope of women's health issues and sex-based medicine and biology. This Concentration trains students in basic, translational, epidemiologic, health policy, and clinical research in women's health and comparative biology and medicine. It integrates diverse disciplines, such as
molecular biology, genetics, autoimmunity, epidemiology, environmental science, with abnormal development and diseases that are unique to or more prevalent in females.

Any questions regarding clerkship policies may be directed to the Director of Clerkship Education, Elizabeth Stuart, MD, MSEd, at aestuart@stanford.edu, or to the Assistant Director of Clerkship Administration, Caroline Cheang, at cheang@stanford.edu or (650) 498-7619.
4.2 CLERKSHIP REQUIREMENTS (TABLE)

Students must have successfully completed all pre-clerkship courses prior to beginning clerkships. A total of 93 clinical units (15.5 months) are required for graduation.

NOTE: Graduation requirements for clinical training are subject to change.

These clerkships must be completed within the student’s first 12 months of clinical rotations:

<table>
<thead>
<tr>

4.3 CLERKSHIP SCHEDULING

1. Clerkship scheduling occurs through the online FishBowl system at

http://medfishbowl.stanford.edu

2. Students must begin Internal Medicine, Surgery, Pediatrics, and OB/GYN no later than Period 7 of the final clerkship year and Neurology and Psychiatry no later than Period 9 of the final clerkship year.

3. In order to facilitate optimal management of finite clerkship capacity, requests to reschedule core clerkships from Clinical Year 1 to Clinical Year 2 require review and approval by the Clerkship Petitions Committee.
4. More information about the clerkship scheduling process, including the Clerkship Scheduling Draw Handout, may be found at

http://medfishbowl.stanford.edu

4.4 REQUIRED CLERKSHIP DESCRIPTIONS

CLERKSHIPS TO BE COMPLETED WITHIN THE STUDENT’S FIRST 12 MONTHS OF CLINICAL ROTATIONS (MUST BE COMPLETED AT STANFORD):

- **MED 300A – General Medicine Core Clerkship (SUMC, PAVAMC, SCVMC, KPMC)**
  Teaches the natural history, pathophysiology, diagnosis, and treatment of medical illness. Emphasis is placed on acquiring the understanding, skills, and attitudes desirable in a scientific and compassionate physician. Students record histories, physical examinations, and laboratory data for patients for whom they are responsible and present their findings, together with their diagnoses and treatment plans, at rounds and conferences. Developing sound clinical reasoning skills is continuously emphasized. An essential aspect of the clerkship is the students’ gradual assumption of direct responsibility for, and full-time involvement in, patient care with the house staff and faculty team. To take advantage of the differences in patient populations and teaching staffs of the four hospitals, students spend four weeks at either SUMC or PAVAMC, and four weeks at either SCVMC in San Jose or KPMC in Santa Clara. The resulting eight-week experience is an integrated curriculum designed to cover the essentials of internal medicine. The Department of Medicine supervises a random draw-based assignment to two of the four locations shortly before the beginning of each odd-numbered clerkship period. A passing grade will require both a satisfactory performance at both clinical sites and passing the NBME Subject Exam at the end of 8 weeks. Director: Abraham Verghese

- **SURG 300A – General Surgery Core Clerkship (SUMC, PAVAMC, SCVMC, KPMC)**
  Provides students with clinical experience in the evaluation and treatment of a wide variety of surgical diseases. Emphasis is placed on teaching students to recognize and manage basic clinical problems. Students function as active members of the surgical team, and follow patients throughout their in-patient course. Outpatient clinics provide the student with the ability to participate in the initial work-up and care plan of pre-op patients. Didactic lectures are given by faculty during the clerkship, which cover pathophysiology of various diseases and principles of surgical management. Basic surgical skills are taught in the operating room and in the emergency department setting. The clerkship offers an opportunity for students to integrate their knowledge of anatomy, physiology and physical diagnosis into a treatment plan for patients with surgical diseases. Each student spends one four-week rotation at SUMC or the PAVAMC and one four-week period at SCVMC or KPMC, Santa Clara. Rotation assignments are made on the first day of the clerkship. A one-day orientation is held at the beginning of the eight-week period. The NBME Subject Exam is a required component of the clerkship. Director: Fritz Bech

TWO OF THE FOLLOWING CLERKSHIPS MUST BE COMPLETED WITHIN THE STUDENT’S FIRST 12 MONTHS OF CLINICAL ROTATIONS (MUST BE COMPLETED AT STANFORD; TO BE ASSIGNED BY LOTTERY):

- **ANES 306A or P 306A - Critical Care Core Clerkship (SUMC, PAVAMC)**
Provides experience managing adult patients in a critical care unit. Students learn how to optimize care for the acutely ill patient and the multidisciplinary approach to complex patients. Teaching emphasizes the review of basic organ physiology, the ability to determine the pathophysiologic mechanisms involved in critical illness, and the formulation of a physiologic based treatment plan. Students gain experience with the implementation of monitoring and therapeutic devices used in the intensive care units and begin to become adept at the evaluation, stabilization and management of the most critically ill patients expected to be encountered in today's acute care hospitals. Ward rounds, bedside evaluation and treatment, and individual interactions with attending, fellows and residents are part of the educational process. Assignments will be made either to the Stanford Medical-Surgical ICU Service, Stanford Surgical ICU Service, or the Palo Alto Veterans Administration Hospital Medical-Surgical ICU Service.

Student preferences for a particular adult ICU site will be given consideration but cannot be guaranteed. Absences during the 306A clerkship: Students must contact the 306A Clerkship Director to obtain explicit advance approval for any planned absence from the clerkship. Unanticipated absences for illness or emergency must be communicated to the Clerkship Director as promptly as possible. Students with more than 2 days of unexcused absences (i.e., 3-5 days) will be required to make up one week at a later date. If the absence is longer than this, the time would be proportionately increased. Taking extra night or weekend call will not be considered a suitable substitute for missing weekdays during the clerkship. Arrangements to make up missed time must be made by the student with the 306A Clerkship Director. Students who anticipate missing a week (i.e., 5 weekdays) or more of the 306A Clerkship are encouraged to reschedule this clerkship during a different period. Students who miss either of the day-long ICU Medical Student Simulator courses will need to make these experiences up at a later date in order to receive a passing grade for this clerkship. Director: Juliana Barr

306P – Neonatal and Pediatric ICU Core Clerkship (LPCH)

During this rotation, students provide care for critically ill children at Packard Children’s Hospital. The rotation is organized into 2-week blocks as follows: • 2-weeks: Pediatric ICU • 2-weeks: Neonatal ICU or Cardiovascular ICU Or • 4-weeks: Pediatric ICU or Neonatal ICU should the student have a special interest to spend all their time in one unit.

The Pediatric Intensive Care Unit (PICU) is a busy 20-bed academic unit that teaches students to recognize and care for critically ill children. The patients are comprised of medical, surgical, and trauma patients both from within LPCH and referred from other hospitals throughout Northern California. The medical admissions cover a broad range of disease processes including respiratory failure, shock and multi-system organ dysfunction. Surgical patients present with diverse pathologies varying from solid organ transplants to various types of neurosurgical procedures. Students will learn the pathophysiology of critical illness in children, understand the many monitoring devices used in the ICU, and become familiar with the various treatment modalities available for organ failure. The differences in pathophysiology and management of critically ill children as compared to adults will become apparent. The Neonatal Intensive Care Unit (NICU) offers an intensive experience in the management of premature as well as ill term neonates. The focus is on training future physicians to anticipate and recognize the newborn in distress, perform appropriate resuscitation and ongoing assessment and stabilization of such neonates, and deliver optimal continuing care and follow-up. The NICU patient population is diverse, including 23 week estimated gestational age 500 gram premature newborns; post-dates neonates with pulmonary hypertension; infants with varied cardiac, gastrointestinal, urologic and central nervous system surgical lesions; and newborns with a myriad of chromosomal and metabolic abnormalities. Exposure to therapies such as extracorporeal membrane oxygenation, nitric oxide, high frequency ventilation, surfactant and human recombinant erythropoietin
occurs on a daily basis. The NICU is supported by an active Maternal-Fetal Medicine Service, pediatric surgical subspecialty services, and pediatric radiologists. Education in both units will occur via daily morning rounds, direct patient care, scheduled didactic sessions, and frequent interactions with ICU attendings, fellows, and residents. Absences during the 306P clerkship: Students must contact the 306P Clerkship Director to obtain explicit advance approval for any planned absence from the clerkship. Unanticipated absences for illness or emergency must be communicated to the Clerkship Director as promptly as possible. Students with more than 2 days of unexcused absences (i.e., 3-5 days) will be required to make up one week at a later date. If the absence is longer than this, the time will proportionately increase. Taking extra night or weekend call will not be considered a suitable substitute for missing weekdays during the clerkship. Arrangements to make up missed time must be made by the student with the 306P Clerkship Director. Students who anticipate missing a week (i.e., 5 weekdays) or more of the 306P Clerkship are encouraged to reschedule this clerkship during a different period.

Students who miss either of the day-long ICU Medical Student Simulator courses will need to make these experiences up at a later date in order to receive a passing grade for this clerkship. Directors: Lou Halamek, Saraswati Kache

- FAMMED 301A – Family Medicine Core Clerkship (SUMC, Community sites)
  Teaches the management of diseases commonly encountered in the ambulatory care setting. Emphasis is placed on patient-centered, efficient, cost-effective medical care of men, women and children of all ages in a variety of settings. Prevention, managed care, and cultural competence will be stressed. Didactic workshops will be conducted at SUMC and clinic sessions will be spent attending patients at ambulatory sites. Director: Tracy Rydel

- MED 313A – Ambulatory Medicine Core Clerkship (SUMC, PAVAMC, SCVMC)
  The Ambulatory Medicine clerkship (AMC) combines clinic sessions in both general internal medicine and subspecialty medicine. It includes assigned readings, small group discussions, computer-assisted drills, posing and answering clinical questions with critical appraisal of the literature, and problem-based cases to reinforce principles and complexities of diagnosis and management. The didactics emphasize preventive medicine, cardiovascular, respiratory, and endocrinological disorders, and common clinical presentations in outpatient practice. Directors: Jacqueline Tai, Mitchell Wong

- NENS 301A – General Neurology Core Clerkship (SUMC, PAVAMC, SCVMC)
  The Neurology Core Clerkship trains students in the execution of the neurology history and physical, and in the evaluation and management of neurological diseases. Students will be assigned to one of the following locations for Neurology training: Stanford Hospital inpatient wards; Stanford Hospital outpatient clinic; Stanford Hospital Neurology Intensive Care Unit; Stanford Neurosurgery Service; Santa Clara Valley Medical Center consultation and clinic service; the Palo Alto Veterans Administration Ward/Consultation/Clinics service; Lucile Packard Children's Hospital Consultation and Clinics; or the Palo Alto Medical Foundation Clinic (not available all months). All these venues will satisfy the core graduation requirement for Neurology. Responsibilities will differ among the different clerkship venues, but a common core of teaching will be presented to all students. All participating students will be expected to attend the common core of teaching, except for Santa Clara Valley students, where teaching will be performed locally. By the end of the clerkship, the students will know how to perform a neurological exam and will have increased practical knowledge of clinical conditions affecting the nervous system. The NBME Subject Exam in Neurology is a required component of the clerkship. Director: Jeffrey Dunn
- **OBGYN 300A – Basic Gynecology and Obstetrics Clerkship (SUMC, SCVMC, KPMC)**
  Provides the student with skills and knowledge needed to care for patients with common gynecological
  problems, the well-woman examination, and pregnancy from prenatal care through delivery and
  postpartum. The clerkship is a full-time, 6-week rotation at one of the 3 sites: Stanford University
  Medical Center & satellite clinics, Santa Clara Valley Medical Center, and Kaiser Santa Clara.
  Emphasis is placed on history and physical examination skills in the evaluation and management of
  pregnancy, vaginal delivery, and both office gynecology and gynecologic surgical procedures through
  exposure to patients in the outpatient clinics, Labor and Delivery, and the operating room. The student
  participates in all the academic functions of the department including conferences, grand rounds,
  lectures, and weekly case studies. A one day orientation is held at the beginning of the clerkship, and
  students attend a simulation session for OB and Surgical skills during the first week. All students on the
  clerkship meet for once weekly didactic session at Stanford. The NBME Subject Exam in Obstetrics and
  Gynecology is a required component of the clerkship. Directors: Cynthia DeTata, Kimberly Harney,
  Wilma Lee, Melanie DeGuzman

- **PEDS 300A – Child Health Core Clerkship – Rotating (SUMC)**
  An eight-week experience divided into four weeks on an inpatient service and four weeks in an
  ambulatory pediatric setting. Students spend four weeks at Lucile Packard Children’s Hospital, Packard
  El Camino or Kaiser Santa Clara and four weeks at Santa Clara Valley Medical Center. The clerkship is
  designed to offer students an introduction to a wide range of clinical problems in pediatrics and a
  handful of basic skills needed to work with children and families. The NBME Subject Exam in
  Pediatrics is a required component of the clerkship. Directors: Elizabeth Stuart, Noelle Johnstone

- **PSYC 300A – Psychiatry Core Clerkship (SUMC, PAVAMC)**
  The clerkship is designed to solidify the knowledge of psychiatry students have acquired in the Practice
  of Medicine courses, as students gain practical skills in the application of this knowledge to clinical
  situations. The focus is on interviewing skills, psychiatric evaluations, on refining diagnostic skills, and
  offers an overview of psychosocial and biological treatment modalities for the major psychiatric
  disorders. The clerkship consists of clinical work on inpatient units under the
  supervision of academic and clinical faculty, a weekly lecture series by academic faculty, interviewing
  seminars taught by voluntary clinical faculty, and attendance at Grand Rounds. Students are assigned to
  patient care settings at one of the six affiliated sites: a comprehensive medical psychiatry unit (G2), an
  inpatient general psychiatry ward (H2), a geriatric psychiatry unit, the consult-liaison service at
  Stanford Hospital, an inpatient research psychiatric ward specializing in the study of schizophrenia or
  an acute locked psychiatric ward at the PAVA. In addition, students participate in the specialty
  outpatient clinics at Stanford including OCD, Child, bipolar, geriatric and general psychopharmacology
  clinics. Students will be given the opportunity to express their preferences regarding assignment. The
  final rotation assignment will be determined by the department based on availability of sites. Students
  will be informed about the specific clerkship requirements at the orientation offered at the start of each
  clerkship period. They receive a course syllabus, several study guide books and a psychopharmacology
  textbook. Students are encouraged to visit the Psychiatry clerkship site on Coursework which lists all
  information, the syllabus and teaching materials. Students are expected to complete five cases on the
  CaseTool site and to record cases seen by diagnostic category. Requirements include mandatory
  attendance at seminars, weekly inpatient case history presentations and Emergency room experiences
  with residents/attending psychiatrists. The NBME Subject Exam in Psychiatry is a required component
  of the clerkship. Director: Charles DeBattista
4.5 SELECTIVE CLERKSHIP REQUIREMENT

Students will complete one month of clerkships in two categories chosen from a designated list. Qualifying clerkships are approved by the Committee on Curriculum and Academic Policy (CCAP) and may be removed from the list of approved clerkships at any time. Additions to the approved lists of clerkships take effect immediately for all students; deletions from the lists take effect for the students who begin clerkships in the next clerkship year.

Students wishing to substitute another clerkship not on the list may petition the CCAP for approval prior to enrolling in (i.e. beginning) the clerkship. Students should know that approval of substitutions for selective clerkships is rarely given. Retroactive approval of selective clerkship substitutions will not be granted. See Section 4.10 for the process of requesting to substitute an away clerkship for a selective.
SELECTIVE I: FUNDAMENTALS OF CLINICAL CARE

Students complete one month of clerkship(s) from the Selective I List (see page 66).

Goals:

Through experiences that broaden their general professional education in areas not covered in a core clerkship, students will:

- Achieve excellence in command of the fundamentals of clinical medicine with emphasis on skills required of all physicians
- Gain a solid foundation in general medicine as a basis for understanding and treating disease

Requisites:
- Emphasizes common problems in an area essential for a generalist
- Provides knowledge, skills and attitudes that will enhance development as a well-rounded physician

OR

Goals:

Through an intensive ambulatory experience, students will:

- become competent at managing problems in an ambulatory setting
- strengthen ability to perform a directed history and physical examination
- appreciate longitudinal management of chronic disease
- develop time management skills during patient encounters
- develop a sense of obligation to the health of the public

Requisites:
- At least 75% of experience should be in an ambulatory/outpatient setting
- Accepts direct responsibility for patients including first to encounter patient, performs procedures, counsels patients, writes notes and orders
- Provides opportunities for patient follow-up
## SELECTIVE I LIST: FUNDAMENTALS OF CLINICAL CARE

*Two-week rotation; student must complete an additional two-week rotation to receive credit as a selective.*
Selective II: Subinternship

Students complete one clerkship from the Selective II List (see page 73)

**Goals:**

Through an intensive inpatient experience, students will:

- Assume a high level of patient care responsibility in preparation for residency.
- Strengthen their clinical and procedural skills.
- Improve their ability to manage complex, acutely ill patients.
- Learn to work as team members.

**Requisites:**

- Student is responsible for direct management and care of patients with a significantly higher level of responsibility than during core clerkships.
- Builds upon knowledge and skills learned during the core clerkship.
- Internship-like responsibilities, e.g., primary workup of new patients, writes orders, performs procedures, participates in daily care, takes night call, writes notes and dictates discharge summary.

*Two-week rotation; student must complete an additional two-week rotation to receive credit as a selective.*
4.6 REFLECTIONS, RESEARCH, AND ADVANCES IN PATIENT CARE – INDE 297

4 units – Course Directors: Laurence Baker, Lars Osterberg, Charles Prober, Audrey Shafer

The curriculum for Reflections, Research and Advances in Patient Care is designed to provide structured time to “step back” from clerkships, in order to promote both reflection on and reinforcement for learning in the clinical environment. Reflections, Research and Advances is structured as a two-year curriculum to span the clinical years. Sessions occur every 8 weeks, on the third Friday of even-numbered clerkship periods (see dates below), and incorporate the curricular components outlined below.

Goals:

1. To discuss and reflect upon critical experiences in clerkships.
2. To provide continuity of instruction in translational science topics across the curriculum.
3. To reinforce and extend the study of behavioral, cultural, ethical, social and socioeconomic topics introduced in the Practice of Medicine course sequence.
4. To expose students to recent advances in medical discoveries, emphasizing their application in clinical practice (translational medicine), with focus on the perspective of patients.
5. To develop research and critical thinking skills, acquire new topical information in areas related to Scholarly Concentrations, and receive advice and counseling on Scholarly Concentration curricular issues and research projects.

PART ONE: DOCTORING WITH CARE SESSIONS

Doctoring with CARE sessions each consist of a small group debriefing/discussion, in which students on their core clerkship rotations have the opportunity to discuss and reflect on critical experiences in a non-threatening setting. Key objectives include the development of lifelong reflective practice skills and coping strategies essential to maintaining humanism and professionalism. Facilitated by Educators for CARE faculty, these sessions are a continuing avenue to guide students’ development of four core values of the medical profession: Compassion, Advocacy, Responsibility, and Empathy.

Sessions occur from 10:30 am – 12:00 pm on designated Fridays. Students will receive email notification of their group number, facilitator, and session location.

PART TWO: TRANSLATING DISCOVERIES LECTURE/SEMINAR SERIES

The overarching goal of these sessions is to underscore the value of understanding basic science principles, translating them into evidence-based, patient-centered practice of medicine, and gaining cognizance of their broader social and ethical implications. The perspective of patients is emphasized, through their frequent participation with session lecturers.

Sessions occur from 1:00 – 3:00 pm on designated Fridays. Students will receive email notification of lecture/seminar topic and location.
PART THREE: SCHOLARLY CONCENTRATION BREAKOUT SESSIONS

These breakout sessions develop themes related to Scholarly Concentrations. Topics may include student research projects, issues of interest to students in a given SC area, or other matters related to Scholarly Concentrations.

Sessions occur from 3:15 pm – 5:00 pm on designated Fridays. Students will receive email notification of breakout group location.

Course Completion Requirement:

To receive the 4 units of credit for INDE 297, students must:

1. Attend all Doctoring with CARE sessions that occur when a student is enrolled in one of the nine core (required) clerkships. Attendance will be taken at all sessions.

2. Attend at least six Translating Discoveries sessions over the two clinical years, including all Translating Discoveries sessions that occur when a student is enrolled in one of the nine core (required) clerkships. Thus, if a student is not enrolled in one of the nine core clerkships during an even-numbered period at least six times during the clinical years, the student must attend additional Translating Discoveries lecture sessions for a minimum of six sessions. Students are encouraged to attend more than the required six sessions.

3. Sign into E*Value and submit an evaluation for each Translating Discoveries lecture session attended (minimum of six). Any student who attends fewer than six sessions will be required to submit ten online evaluations in E*Value after viewing the missed session videos online.

Once a student has attended all Doctoring with CARE sessions that occur when the student is enrolled in one of the nine core clerkships; and has attended and evaluated at least six Translating Discoveries lecture sessions; the School of Medicine Registrar’s Office will enroll the student in INDE 297 for four units for the quarter in which the student’s attendance and evaluations are completed. A student who has not attended six Translating Discoveries lecture sessions will not receive credit for the course until ten online evaluations are completed.

Dates for INDE 297 Sessions:

4.7 ADVANCED CARDIAC LIFE SUPPORT (ACLS) – MED 295

Certification in ACLS (Advanced Cardiac Life Support) is a requirement for graduation. Students may register for ACLS in the first or second clinical year. Training courses are offered at the Palo Alto VA Medical Center under the direction of Dr. John Giacomini. All training sessions (up to four) will be held on Friday/Saturday. Each session can accommodate a maximum of 25 students. Registration is on a first-come, first-served basis. Because advance planning is necessary to arrange instructors, registration is closed two weeks before each session. When the training is completed, students receive a certification card valid for two years.

To enroll, first sign up with Gay Wittenberg at the VA, then register for MED 295 on Axess. An information packet with training materials will be mailed to your home address two weeks before the course begins. Be prepared to do some reading before the first session.

Contact person: Gay Wittenberg, VA Medical Center, gayw@stanford.edu, (650) 493-5000, ext. 65153

NOTE: Occasionally a student who is preparing to graduate is unable to attend one of the ACLS training sessions offered at the Palo Alto VA Medical Center because he or she is out of town interviewing for residency, or for other legitimate reasons. If this is the case, the student may make arrangements to complete ACLS training at another facility. The student would then need to bring his/her certificate of completion to the School of Medicine Registrar’s Office to verify completion of the course. For ACLS training outside Stanford, call (650) 725-9938, http://www.cecenter.stanfordhospital.com, or the American Heart Association. There will be a charge to take this training outside the School of Medicine.

4.8 SUBJECT EXAMINATIONS IN REQUIRED CLERKSHIPS

Standards for performance on final written examinations apply in the following required clerkships:

- Ambulatory Medicine
- Critical Care
- Family Medicine
- Internal Medicine*
- Obstetrics and Gynecology*
- Pediatrics*
- Psychiatry*
- Neurology*
- Surgery*

1. Written exam requirements are set by the clerkship director.

2. Clerkships may use either the NBME Subject Exam or an alternative departmental exam. Clerkships using the NBME Subject Exam are marked with an asterisk above.

3. Written examinations must be passed with a minimum score as established by the clerkship.

4. Students who do not pass the written exam receive an “N” (continuing) grade for the clerkship and must retake either the NBME Subject Exam or the departmental exam.
5. Students who do not pass the written exam on the second attempt must take an oral exam or a suitable alternative, to be determined by the clerkship director.

6. After the third attempt at satisfying the exam requirement, the “N” grade converts to either “pass” or “fail.”

7. “N” grades must be corrected within 12 months of the end of the clerkship. Uncorrected “N” grades will convert to “fail” after 12 months.

8. Failure generally results in focused remediation.

So that required remediation may be accomplished prior to graduation, students must enroll in (i.e. begin) Internal Medicine, Surgery, Pediatrics, and OB/GYN no later than Period 7 of the final clerkship year, and must begin Neurology and Psychiatry no later than Period 9 of the final clerkship year.

Students needing to retake two or more NBME subject exams may contact their Advising Deans or the Assistant Dean of Student Affairs to request exam accommodations outside the regular exam schedule.

Professional standards require that students attend all scheduled educational activities, including examinations. In the case of unavoidable schedule conflicts, students must obtain advance permission from the clerkship director to miss and reschedule the final exam. Except in case of emergency, failure to attend the final exam session without prior permission from the clerkship director will result in referral to the Committee on Performance, Professionalism and Promotion (CP³) for unprofessional behavior.

Students with documented disabilities may require special examination accommodations. The Office of Accessible Education determines if and what accommodations to recommend. The MD Advising Office receives the recommendation and conveys the request to the Clerkship Director prior to the examination. It is the responsibility of the student to notify the Advising Office at least one week in advance of his/her scheduled examination.

4.9 CLINICAL PERFORMANCE EXAMINATION (CPX)

The Clinical Performance Examination (CPX) is a multi-station standardized patient clinical skills assessment that must be taken no later than the summer of the student’s last clinical year prior to graduation. It is designed by a consortium of clinicians and medical educators from all eight California medical schools to assess clinical skills essential to the practice of medicine regardless of specialty. Over 1,000 students throughout the state take this exam each year. Demonstration of at least minimum competency on the Clinical Performance Examination (CPX) is a requirement for graduation.

The purposes of the exam are:

1. To evaluate students’ level of competency in clinical and interpersonal skills;

2. To provide individual feedback on these skills;

3. To prepare for the USMLE Step 2 Clinical Skills Examination (CS – the standardized patient portion of the boards).

The CPX may be taken at the end of the first year of clerkships, but must be taken NO LATER THAN one year prior to graduation. The CPX is only administered at Stanford once per year, typically in June or July.
Students planning away rotations should make sure their plans do not conflict with test administration dates, since failure to participate in and pass the CPX would prevent the student from graduating.

The exam involves a five-hour block of time. Each student’s exercise is videotaped and made available to the faculty for review. Following the exam, students receive detailed feedback from the patient encounters and a set of scores with comparison standards.

During the CPX, students see at least eight patients with a broad range of problems, which may encompass subject material from any core clerkship. Students are expected to perform a focused history and usually a physical examination as well. Students are also expected to communicate their thinking and preliminary plans to the patients. Students must demonstrate at least minimum competency in each of four skill areas:

- History taking
- Physical examination
- Communication Skills
- Clinical reasoning
- Overall Total Score

Passing the CPX is a requirement for graduation. Students who do not attain an overall passing score on the exam, or who fail individual skill domains, will be required to successfully complete a remediation program, including individualized feedback, self-reflection, and working with a faculty mentor in the School of Medicine to develop the skills necessary for improvement. Following this remediation, students will undergo reassessment to ensure minimum proficiency with all categories of clinical skills. Successful completion of this reassessment will be required for graduation.

The CPX examination requirement is meant to ensure that all students receiving the MD degree from Stanford have demonstrated competency in fundamental clinical skills.

For more information, see the Standardized Patient Program Web site at

http://med.stanford.edu/ome/spp/

**4.10 HOW TO TAKE ELECTIVE CLERKSHIPS AT OTHER INSTITUTIONS**

Students wishing to take elective clerkships in the United States or Canada should apply about six months in advance. Students who wish to take clinical clerkships abroad should apply to the international hospital or medical school one year in advance. Catalogs of elective clerkships available at U.S. medical schools and information about electives in International Health are located in the Lane Library. Additional information is available from individual departments at Stanford. Correspondence should include the following information:

1. Your name and address
2. Expected graduation date from Stanford University School of Medicine
3. The clerkships you are interested in taking, including alternates if possible
4. Approximate dates available (be as flexible as possible)
5. A statement that the student’s Advising Dean will be pleased to write a letter of reference if required
6. A request for housing information

If the away institution requires a letter of good standing, with proof of malpractice coverage, the student should see the Assistant Director of Clerkship Administration in the School of Medicine Registrar’s Office. The Assistant Director of Clerkship Administration provides the letter, has the application signed, and returns these documents to the student for mailing to the away institution along with any application fees, transcripts, or proof of immunization.

It is recommended that away clerkships be taken for credit. When the elective with the away institution is confirmed, credits can be requested by filling out a Faculty Authorization Form, which can be obtained from the Assistant Director of Clerkship Administration. When the Assistant Director of Clerkship Administration receives both the approved Faculty Authorization Form from the student’s Advising Dean and an acceptance notification from the other institution, the away clerkship will be added to the student’s Fishbowl schedule. The student should register for the away clerkship on Axess; course numbers for away clerkships are identified with the suffix “W.” An evaluation of clerkship work done at the away institution is required. The student should take to the away institution a Clerkship Evaluation Form to be filled out by the attending at the end of the clerkship and mailed back to the School of Medicine Registrar’s Office.

Students who choose to take the away clerkship for no credit should check with the School of Medicine Registrar’s Office to determine if malpractice insurance will apply.

4.11 REQUESTS TO COMPLETE CORE OR SELECTIVE CLERKSHIPS AT OTHER INSTITUTIONS

Students wishing to substitute an away clerkship for a core or selective clerkship and use it to satisfy the core or selective clerkship graduation requirement must petition the Committee on Curriculum and Academic Policy (CCAP) for approval prior to enrolling in the clerkship. Retroactive approval of required clerkship substitutions will not be granted.

A written petition must be submitted using the Faculty Authorization Form, which can be obtained from the Assistant Director of Clerkship Administration. The petition will be reviewed according to the following process:

1. Review by the student’s Advising Dean; after review and discussion with the student, the Advising Dean’s approval and signature is required on the petition prior to its moving forward.

2. Review by the Assistant Director of Clerkship Administration to determine if:
   a. Clerkship length is equal to clerkship length at Stanford.
   b. NBME subject exam is included as a requirement for passing (if NBME exam is used in the corresponding Stanford clerkship).

Upon review and approval, the Assistant Director of Clerkship Administration will sign and forward the petition to the relevant Stanford clerkship director.
3. The Stanford clerkship director will then review the outside clerkship content, and confirm that the off-site clerkship can provide a reasonably comparable experience to that at Stanford. The Stanford clerkship director will sign the petition to indicate approval of the request.

4. The Director of Clerkship Education will then review and sign the petition to confirm that appropriate review and approval has taken place.

5. The Director of Clerkship Education then presents the petition for review at CCAP; CCAP will render the final decision.

6. If so approved, the student then enrolls in the clerkship with the Stanford number and the letter “W” following to indicate it was done at another location.

4.12 ABSENCES DURING CLERKSHIPS

Students must contact the clerkship director to obtain explicit advance approval for any planned absence from the clerkship. Unanticipated absences for illness or emergency must be communicated to the clerkship director as promptly as possible.

Students who are absent more than two days during a four- or six-week rotation or more than three days during an eight-week rotation will be required to make up missed time.

Students who will miss more than 20% of the total duration of a clerkship – for any reason – will be asked to reschedule the clerkship.

Excessive or unexcused absences or failure to communicate with the clerkship director about unavoidable absences are considered reasons for failing the clerkship.
4.13 POLICY ON DROPPING CLERKSHIPS LESS THAN FOUR WEEKS BEFORE THE START OF THE PERIOD

There have been occasions when a Stanford medical student enrolled in a clerkship fails to report for the first day of that clerkship or provides late notification to the clerkship director that he or she plans to drop the clerkship. Students are required to make clerkship scheduling changes a minimum of four weeks prior to the beginning of the clerkship period. This ensures that students on the waitlist for that period can be accommodated and that clerkship directors can plan patient care and educational activities. Failure to adhere to this policy raises concerns about the professional conduct of a student.

Students who have a valid reason for wishing to drop a clerkship within four weeks of the beginning of the clerkship period may do so only by contacting their academic advisor. The advisor will review the reason, consult with the clerkship director, and, if permission to drop is granted, will contact the Assistant Director of Clerkship Administration in the School of Medicine Registrar’s Office to finalize the request. If the advisor and clerkship director disagree as to whether permission should be granted, the request to drop will be referred to the Senior Associate Dean for Medical Education for a final decision.

Students who fail to report for the first day of a clerkship, or drop a clerkship within four weeks prior to the start date without permission, will be asked to appear before the Committee on Performance, Professionalism and Promotion. Among other potential consequences, if there is a second occurrence of a late drop or other evidence of unprofessional conduct, a notation to that effect will be included in the student’s Medical School Performance Evaluation (MSPE, or Dean’s Letter).

4.14 DEFINITION OF MEDICAL STUDENT PRACTICE ROLE

The Medical Board of California requests that medical students be carefully instructed about what they may and may not do in terms of writing orders or prescriptions for patients. Thus, Educational Programs and Services, in collaboration with the clinical department chairs, Stanford-affiliated hospitals, and nursing offices, has prepared the following description of the appropriate role of the Stanford medical student on a patient care team.

California state law allows specific exceptions for medical students to the general code, which requires that all medical acts must be performed by licensed physicians. The exception specifies that a student may do all things that a physician may do with the following two provisos:

1. That any medically-related activity performed by students be part of the course of study of an approved medical school; and

2. That any medically-related activity performed by students be under the proper direction and supervision of the faculty of an approved medical school.

Medical students may therefore write orders for drugs, treatments, etc., provided that:

- the provisions of number 2 above are observed;
- the students are assigned to or are consultants to the service on which the order pertains; and
- a licensed physician countersigns all orders before the orders are executed. Telephone orders of counter-signatures will be accepted from licensed physicians (including licensed housestaff). Medical students may
locate and solicit the licensed physician’s verification by telephone, but the licensed physician must speak
directly to the registered nurse and must actually sign the order before going off duty. The counter-signature is
recorded as a telephone order. Routine admission orders are not exempted from the above provisions.

Medical students may act as subinterns, but they are still subject to the above provisions.

Medical students will identify their signatures with CC (Clinical Clerk), just as licensed physicians identify their
signatures with MD. Medical students will also wear badges identifying them as medical students.

Medical students are not to be involved in any portion of the medical care of other medical students.

Students functioning in a preceptorship away from the Stanford University Hospital and Clinics and its affiliates
are likewise subject to the above limitations. If a preceptorship is an out-of-state one, other state regulations may
govern the role of the student in the preceptorship, and students should ascertain the provisions of these
regulations.

For security and confidentiality reasons, medical students will not have remote access to the Electronic Medical
Record (EMR) at either SHC or LPCH.

4.15 STUDENT DUTY HOURS AND THE WORK ENVIRONMENT

Providing students with a sound academic and clinical education must be carefully planned and balanced with
concerns for patient safety and student well-being.

1. Supervision of students
   a. All patient care must be supervised by qualified residents or faculty.
   b. Faculty, residents and students must be educated to recognize the signs of fatigue, and adopt and apply
      policies to prevent and counteract the potential negative effects.

2. Duty hours
   a. Duty hours are defined as all clinical and academic activities related to the students, i.e., patient care (both
      inpatient and outpatient), administrative duties related to patient care, the provision for transfer of patient
care, time spent in-house during call activities, and scheduled academic activities such as conferences. Duty
hours do not include reading and preparation time spent away from the duty site.
   b. Duty hours must be limited to 80 hours per week, averaged over a four-week period, inclusive of all in-
      house call activities.
   c. Students must be provided with one day in seven free from all educational and clinical responsibilities,
      averaged over a four-week period, inclusive of call. One day is defined as one continuous 24-hour period
      free from all clinical, educational, and administrative activities.

3. In-house call activities
The objective of all call activities is to provide students with continuity of patient care experiences throughout a 24-hour period. In-house call is defined as those duty hours beyond the normal workday when students are required to be immediately available in the assigned institution.

a. In-house call must occur no more frequently than every third night, averaged over a four-week period.

b. Continuous on-site duty, including in-house call, must not exceed 30 consecutive hours.

4.16 MALPRACTICE LIABILITY FOR MEDICAL STUDENTS

Stanford assumes the financial responsibility for medical malpractice liability incurred by registered medical students when participating in any clinical activities as part of their formal educational program at the Stanford University Medical Center, or at other Stanford-approved medical facilities. However, it is very important that Stanford medical students be certain they are protected when participating in clinical work in special situations. Therefore, students should consult the School of Medicine Registrar’s Office if they will be:

1. taking a clinical clerkship at another hospital or medical school in the United States while not paying tuition and not registered as a medical student at Stanford.

2. taking a clinical experience in a foreign country while not paying tuition and not registered at Stanford.

3. participating in any volunteer clinical work away from Stanford.

4. working in a private physician’s office.

5. participating in any clinical activities not at Stanford that are not covered in (1) through (4) above.

Stanford reserves the right without prior notice to modify its practices with regard to financial responsibility for medical malpractice liability.

4.17 STUDENT PARTICIPATION IN CLINICAL ACTIVITIES INVOLVING PERSONAL RISK

(Endorsed by the School of Medicine Faculty Senate on May 17, 2000)

The Stanford University School of Medicine has long had the policy that medical students learn to be physicians by participating in the care of patients under faculty supervision. Some of these patients may have an infectious or other disease that provides some risk to caretakers, including students. While every effort will be made to provide appropriate training and safeguards for students so that these risks are minimized, they cannot be totally eliminated.

Students are required to participate in patient care as one of their fundamental responsibilities during a clinical clerkship. Students are expected at all times to follow universal safety precautions in order to safeguard their own health. Under certain rare and extenuating circumstances where the risk to the student significantly outweighs either the educational benefit to the student or the health-care benefit to the patient, a supervising physician may suggest that a student be exempted from, or a student may ask permission from the supervising physician to be excused from, participation in certain aspects of patient care.

The clerkship director is responsible for providing clarification of this statement and resolving any disputes. In the event a dispute is unsatisfactorily resolved from the standpoint of either the student or the supervising physician, the matter may be referred to an Advising Dean for final review.
4.18 UNIVERSAL PRECAUTIONS AND NEEDLESTICK PROTOCOL

Universal Precautions apply to the handling of all blood, body fluids, and human tissue. Body fluids, also known as other potentially infectious materials (OPIM), include: semen, vaginal secretions, cerebrospinal, synovial, pleural, peritoneal, pericardial, and amniotic fluids, feces, urine, sputum, nasal secretions, saliva, tears, vomitus or any other body fluid or tissue that is visibly contaminated with blood. Appropriate protection including gloves, mask and gown should be worn to protect oneself from exposure.

If you believe you have had a significant exposure to blood or OPIM, IMMEDIATELY wash wound or exposed tissue thoroughly with soap and water. Rinse copiously. Then call the Needlestick Hotline 650-723-8222 then pager 1-STIX (222 then 1-STIX from hospital or medical school phone) to talk to a staff person 24/7 who is trained and on call specifically for this purpose. This hotline has been set up for medical students and Stanford employees. Records are strictly confidential. There is no charge for blood tests, medications, or follow-up care following a blood or OPIM exposure. If you have any problem using this hotline, please call Dr. Smith-Coggins immediately - regardless of time of day or night. Dr. Smith-Coggins can be reached through hospital page system 650-723-6661 on pager 1-3481
5. REGISTRATION AND STUDENT RECORDS

5.1 Registration Instructions

5.2 Add and Drop Deadlines for Courses

5.3 Leaves of Absence

5.4 Reinstatement

5.5 Academic Records

5.6 Privacy of Student Records

5.7 Student Identity and Identification at Stanford

   • Stanford University ID Number
   • SUNet ID
   • Identification Cards
5.1 REGISTRATION INSTRUCTIONS

Medical students must register for all terms of each academic year (Autumn, Winter, and Spring quarters) from the admission term until conferral of the degree. The only exception to this requirement occurs when the student is granted an official Leave of Absence. Failure to enroll in courses for a term during the academic year without taking a Leave of Absence results in denial of further enrollment privileges unless and until reinstatement to the degree program is granted and the reinstatement fee paid. Registration in the Summer Quarter is not required for pre-clerkship students and does not substitute for registration during the academic year.

Please note that first-year medical students may take up to 45 units during Autumn Quarter and subsequently take no more than 35 units per quarter. All other students may take no more than 35 units per quarter. Students who exceed these limits will accrue additional tuition charges.

The preliminary study list deadline is the first day of classes of each quarter during the academic year. As early as possible, but no later than this deadline, students (including those with TMR status) must submit to the Office of the University Registrar via Axess (see URL below), a study list to enroll officially in classes for the quarter. Students are expected to be enrolled "at status" by the preliminary study list deadline:

http://axess.stanford.edu

Students must enter their study lists by the first day of each quarter in order to avoid late fees. Students will be charged a $200 late study list fee for submitting their study lists after the quarterly deadline. Students registering for pre-clerkship courses should include the appropriate information from the time schedule on their study lists. Students cannot receive credit for any pre-clerkship coursework done in unregistered quarters. Clinical students are responsible for checking the clerkship schedule prior to completing their study lists. Students may not attend clerkships without having completed their registration.

Students with problems caused by holds on their registration may seek special consideration with approval of the School of Medicine Registrar.

The University reserves the right to withhold registration from, and to cancel the advance registration or registration of, any student having unmet obligations to the University.

Full registration procedures are described at: http://studentaffairs.stanford.edu/registrar/help/enrolling

5.2 ADD AND DROP DEADLINES FOR COURSES

Students may add courses or units to their study lists through the end of the third week of classes. Courses may be dropped through the end of the third week of classes, without any record of the course remaining on the student’s transcript.

After the add and drop deadline, appropriate course instructor approval must be obtained. The penalty for dropping a course after the deadline without permission of the course instructor is a failure in the course.
All add/drop petitions after the deadline must be submitted to the School of Medicine Registrar’s Office; they may not be submitted to the University Registrar. Course instructors can exempt (from the above add/drop rule) courses for which they are responsible.

### 5.3 LEAVES OF ABSENCE

A Leave of Absence is required for any term of the academic year (Autumn, Winter, Spring) for which a student does not wish to enroll in classes. Students wishing to take a Leave of Absence should first obtain the proper paperwork from the School of Medicine Registrar’s Office or online at

Leave of Absence Request forms with required signatures must be submitted in advance of the requested quarter to the School of Medicine Registrar’s Office.

Leaves of Absence are granted at the discretion of the School of Medicine, and are granted for a maximum of one calendar year. Leaves requested for a longer period are approved only in exceptional circumstances. Extension requests must be made to the Committee on Performance, Professionalism and Promotion before the expiration of the original Leave of Absence.

Leaves of Absence may not exceed a cumulative total of two years. New students may not take a Leave of Absence during their first quarter. However, new students may request a deferment; whether to grant or deny the requested deferment is at the discretion of the School of Medicine.

Students on Leave of Absence are not registered at Stanford, and therefore do not have the rights and privileges of registered students.

**NOTE:** Students taking an approved Leave of Absence have not ended their relationship with the University. If students have not entered a waiver through Axess by 9/15 of each academic year, they will be enrolled in Cardinal Care for entire year 9/1-8/31. Should they take a leave of absence during that year, students will still be enrolled and cannot opt out of this coverage. Students accessing services at Vaden Health Center will still be charged the Campus Health Fee of $167. Students with questions about this process can contact the Insurance Referral Office at Vaden Health Center at 723-2135. Under some circumstances, students on Leave of Absence may be able to make special arrangements to continue their university housing; students will need to deal directly with the relevant university offices involved to do so.

### CHILDBIRTH ACADEMIC ACCOMMODATION PERIOD

Women graduate students anticipating or experiencing the birth of a child may formally request a one-quarter extension of University and departmental academic requirements and a Childbirth Academic Accommodation Period. The Childbirth Policy (see Section 11.8) is administered by the Office of the Vice Provost for Graduate Education (VPGE) through a petition process. In that petition, the woman student specifies the dates on which the Academic Accommodation Period begins and ends, with the requirement that it must fall within at most two consecutive quarters. A letter from the student's health-care provider stating the anticipated delivery date must accompany the petition. If the childbirth occurs prior to filing the petition, the accommodation period begins on the birth date.
The petition is available online at

For complete information on the Childbirth Accommodation Policy for Women Graduate Students visit:

5.4 REINSTATEMENT

Students who fail to be either registered or approved for a Leave of Absence by the start of a term are required to apply for reinstatement through the School of Medicine Registrar’s Office before they can return to the same degree program. The decision to approve or deny reinstatement is a discretionary one made by the Committee on Performance, Professionalism and Promotion, which is not obliged to approve reinstatements of students.

Reinstatement decisions may be based on the applicant’s academic status when last enrolled, activities while away from campus, the length of the absence, and the perceived potential for successful completion of the program, as well as any other factors or considerations regarded as relevant by the school. Reinstatement information is available from the School of Medicine Registrar’s Office.

Reinstatement applications must be submitted 60 days prior to the first day of the term for which reenrollment is requested. A fee is required.

5.5 ACADEMIC RECORDS

TRANSCRIPTS

The notations used on official University transcripts are pass (+), incomplete (I), continuing (N), exempt (EX) and grade not reported (GNR). Note: Beginning in Clerkship Period 1, 2010, all students taking required clerkships will be evaluated using the CBEI model and will be eligible for a Pass With Distinction (PWD) notation on the MSPE (the PWD notation applies only to required clerkships; does not apply to elective clerkships or pre-clerkship courses). PWD will be noted in the MSPE for students who entered clerkships Period 1, 2010 or later. For students who entered clerkships prior to Period 1, 2010, the PWD notation will be assigned for formative evaluation purposes only and will not appear in their MSPE’s. Also noted is the passage of Steps 1 and 2 CK of the United States Medical Licensing Examinations (USMLE). Students may order transcripts through Axess.

EDUCATION RECORDS

The School of Medicine Registrar’s Office establishes a file for each student to collect data and to provide assistance to Advising Deans in counseling and in preparing the Medical Student Performance Evaluation (MSPE). The file contains confidential information, which is available to the following parties with legitimate educational interests without prior permission from the student:
1. Dean of the School of Medicine, Senior Associate Dean for Medical Student Education, Associate and Assistant Deans for Medical Education, Associate and Assistant Deans for Advising;

2. Committee on Performance, Professionalism and Promotion, whenever the Committee is reviewing a student’s performance;

3. Chair of the Clerkship Evaluation Committee

4. Chair of the Committee on Admissions;

5. Executive Committee of the Faculty Senate when asked by the Dean of the School of Medicine or the Committee on Performance, Professionalism and Promotion to review a case;

6. A duly appointed grievance or grievance appeal officer, or a duly appointed ad hoc committee on the Suitability for the Practice of Medicine;

7. Other university officials on a need-to-know basis;

8. Staff of the Office of Student Services

5.6 PRIVACY OF STUDENT RECORDS

NOTIFICATION OF RIGHTS UNDER FERPA

The following is quoted from the Stanford Bulletin.

The Family Educational Rights and Privacy Act of 1974 (FERPA) affords students certain rights with respect to their education records. They are:

1. The right to inspect and review the student's education records within 45 days of the date the University receives a request for access.

   The student should submit to the Registrar, Dean, chair of the department, or other appropriate University official, a written request that identifies the record(s) the student wishes to inspect. The University official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

2. The right to request the amendment of the student's education records that the student believes are inaccurate, misleading, or otherwise in violation of the student's privacy rights under FERPA.

   A student may ask the University to amend the record that he or she believes is inaccurate or misleading. The student should write the University official responsible for the record (with a copy to the University Registrar), clearly identify the part of the records he or she wants changed, and specify why it should be changed.
If the University decides not to amend the record as requested by the student, the University will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment.

Additional information regarding the hearing procedures is provided to the student when notified of the right to a hearing.

3. The right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent.

FERPA contains various exceptions to the general rule that the University should not disclose education records without seeking the prior written consent of the student. The following circumstances are representative of those in which education records (and information drawn from education records) may be disclosed without the student's prior written consent:

a. Upon request, the University may release Directory Information (see Directory Information below).

b. School officials who have a legitimate educational interest in a student's education record may be permitted to review it. A school official is: a person employed by the University in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.

c. The University may disclose education records without consent to officials of another school, in which a student seeks or intends to enroll, upon request of officials at that other school.

d. The University may choose to disclose education records (and information drawn from education records) to either supporting parent(s) or guardian(s) where the student is claimed as a dependent under the Internal Revenue Code.

e. The University may inform persons including either parent(s) or guardian(s) when disclosure of the information is necessary to protect the health or safety of the student or other persons.

f. For students under the age of 21, the University may notify either parent(s) or guardian(s) of a violation of any law or policy relating to the use of alcohol or controlled substances.

g. The University must provide records in response to lawfully issued subpoenas, or as otherwise compelled by legal process.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA.

The name and address of the office that administers FERPA is: Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202-5920.
PROCEDURES FOR INSPECTING RECORDS AND FOR CORRECTING INACCURACIES
OR MISLEADING INFORMATION

Students wishing to inspect and review their transcripts and academic files should consult with any of the Advising Deans. If a student believes any information in the file is inaccurate or misleading (other than the evaluation of performance in clerkships), he or she should consult with the person who provided the information. If the matter remains unresolved, the student should contact any of the Advising Deans. If the matter still cannot be resolved, the student may consult the Associate Dean for Medical Student Life Advising or the University Ombudsperson, or may pursue paths as set forth in the Privacy of Student Records section of the Stanford Bulletin.

DIRECTORY INFORMATION

The University regards the following items of information as "directory information," that is, information that the University may make available to any person upon specific request (and without student consent):

- Name
- Date of birth
- Place of birth
- Directory addresses and telephone numbers
- E-mail addresses
- SUNet ID (as opposed to Stanford Student ID Number)
- Mailing addresses
- Campus office address (for graduate students)
- Secondary or permanent mailing addresses
- Residence assignment and room or apartment number
- Specific quarters or semesters of registration at Stanford
- Stanford degree(s) awarded and date(s)
- Major(s), minor(s), and field(s)
- University degree honors
- Student theses and dissertations
- Participation in officially recognized sports or activities
- Weight and height of members of athletic teams
- Institution attended immediately prior to Stanford
- ID card photographs

For more information, see Stanford's FERPA Web page at

http://registrar.stanford.edu/students/pers_info/student_record_privacy.htm

Students may prohibit the release of many of the items listed above (other than name and SUNet ID) by designating which items should not be released on the Privacy function of Axess. Students may prohibit the release of their SUNet ID and/or name (and consequently all other information) after an appointment with the Office of the University Registrar to discuss the ramifications of this action.
Students, faculty, and others with questions regarding student records should contact the Office of the University Registrar.

**CONSENT TO USE OF PHOTOGRAPHIC IMAGES**

Registration as a student and attendance at or participation in classes and other campus and University activities constitutes an agreement by the student to the University's use and distribution (both now and in the future) of the student's image or voice in photographs, video or audio capture, or electronic reproductions of such classes and other campus and University activities.

If any student in a class where such photographing or recording is to take place does not wish to have his or her image or voice so used, the student should raise the matter in advance with the instructor.

**5.7 STUDENT IDENTITY AND IDENTIFICATION AT STANFORD**

**Stanford University ID Number**

The Stanford University ID Number is assigned to each student's academic record for unique identification. It is printed on the Stanford University ID card and on documents distributed by the Office of the University Registrar and other administrative offices. It is a violation of University policy to use another's Stanford University ID Number to misrepresent yourself in any way; such use can result in loss of student privileges or other disciplinary action.

**SUNet ID**

The SUNet ID provides access to the Stanford University Network (SUNet) and its services, and identifies authorized users of these services. Each member of the Stanford electronic community creates a unique SUNet ID and SUNet ID password for him/herself. SUNet IDs provide:

- Axess services
- E-mail service
- Storage space within Stanford's distributed file system
- Usenet newsgroups
- World Wide Web services, including serving of personal Web pages on the Leland system and access to Stanford Web Resources

The SUNet ID together with SUNet ID password may serve in place of a signature on electronic forms. The SUNet ID password must remain confidential. It is a violation of University policy to use another's SUNet ID or SUNet ID password to misrepresent yourself in any way; such use can result in loss of student privileges or other disciplinary action.

**Identification Cards**

ID cards are available to registered students, faculty, and regular staff through the Stanford ID Card Office. The ID card serves as an identification card, an electronic key, and a debit card, allowing cardholders to use services for which they have privileges, to enter certain facilities, and to make purchases.
Married students or students with a domestic partner (same or opposite sex) may obtain a courtesy identification card for their spouse/partner through the Stanford Card ID Office. The spouse/partner card enables use of some campus services during terms for which the student is registered.

Similar courtesy cards are also available to the spouses and same-sex partners of faculty and regular staff.

ID cards bear a photograph of the cardholder. This photograph is maintained in an online database and, as stated above in Directory Information, is available for classroom use and for certain other uses upon specific request and without student consent unless the student has designated that the photograph not be released. Photographs can be designated as private using the Privacy function of Axess.

The Stanford ID Card Offices are located:

**For students:**
Tressider Union
459 Lagunita Drive, 2nd Floor
Open Monday – Friday, 9:00a.m. - 5:00p.m.
(650) 498 – CARD
on campus dial: 8-2273

**For faculty and staff:**
George Forsythe Hall
275 Panama Street, room 190
Open Monday – Friday, 8:00a.m. – 5:00p.m.
(650) 498 – CARD
on campus dial: 8-2273

For more information, see:

http://www.stanford.edu/services/campuscard/

**Hospital Photo ID**

To obtain a Hospital Photo ID, students must present a signed form from the Office of Student Life to the Security Office located in the basement of the Hospital. This ID grants students access into secured areas of the Hospital based on enrollment in clerkships, etc. It also provides access to many of the secured teaching and study spaces within the School including small group study rooms, the Li Ka Shing Center for Learning and Knowledge (including the student-only fourth floor), Fleischmann Laboratories, and the 24-hour computing spaces.
6. ASSESSMENT OF STUDENT ACADEMIC PERFORMANCE

6.1 Evaluation of Performance in Courses

- Grading System
- End-Quarter Policy Statement
- Final Examinations
- Correction of Deficiencies in Pre-clerkship Courses
- Evaluation of Performance in Human Health and Disease (Q3-5): Statement on Feedback, Grading and Examinations
- Evaluation of Performance in Practice of Medicine (Q1-Q6): Statement on Feedback, Grading and Examinations

6.2 Evaluation of Performance in Clinical Clerkships

- Expectations of Student Performance in Clinical Clerkships
- Clerkship Performance Evaluation Form
- Standardized Patient Teaching and Assessment Activities
- Correction of Deficiencies in Clinical Clerkships

6.3 Medical Student Performance Evaluation (MSPE)
6.1 EVALUATION OF PERFORMANCE IN COURSES

All pre-clerkship MD program courses are graded on a pass/fail basis. It is the prerogative of each course director to determine the best method for assessing student performance for his or her course. Learning activities such as quizzes, short papers, laboratory exercises, problem sets, presentations, and group discussions, may be offered on a graded or ungraded basis at the discretion of the course director. Attendance and participation may be required where small group interaction is essential to mastery of material in the course. Course directors are expected to announce criteria for passing a course by the end of the second week of the quarter, with any subsequent modification only upon approval of a majority of students in the class.

GRADING SYSTEM

The following grading system is used to report on the official transcript the performance of students in all courses and clerkships taken while an MD degree candidate:

- **Pass (+)** indicates that a student has demonstrated to the satisfaction of the responsible department or teaching group that he/she has mastered the material taught in the course. A marginal passing grade in pre-clerkship courses is internally reported by the faculty to the student and the School of Medicine Registrar’s Office, but does not appear in the official transcript.

- **Incomplete (I)** indicates that extenuating medical or personal circumstances beyond the student’s control have prevented completion of course requirements. Following approval by an Advising Dean (in his or her discretion in light of the circumstances presented) of the taking of the incomplete, the course director is notified prior to the final examination. An incomplete can be corrected in a manner specified by the department or teaching group and must be corrected within one year (unless the Committee on Performance, Professionalism and Promotion specifies an earlier date). When a student takes a final or makeup examination following an incomplete, it becomes a pass, marginal pass or fail. If the student does not attempt to correct the incomplete within the agreed-upon time, it becomes a fail.

- **Continuing (N)** indicates that the course has not concluded and that the student is continuing the course, that a minor component of a course, as defined by the course director, is pending.

- **Exempt (EX)** indicates that a course has been exempted by the course director. No units are granted. The student should register for “0” units so that the course appears on the transcript.

- **Grade Not Reported (GNR)** indicates that a grade has not been reported by the instructor.

A student may not receive credit for repeating a course unless the content has changed significantly, as determined by the course director. In addition to these transcript-related grades, additional designations are used internal to the School of Medicine to report on academic progress:

- **Marginal Pass (MP)** indicates that a student has fallen short of meeting minimal performance standards for a pass but has done better than a fail at the end of the academic quarter, and that additional work or remediation is necessary to achieve a pass.

- **Fail (-)** indicates that a student has not met the minimum performance standards for the course, despite attempts at remediation, as described below. A course in which a student has received a fail grade does not show up on the official transcript. A course in which a student has received a fail grade must be
repeated, and the student must achieve a passing grade within one year of the failure or prior to beginning clerkships, whichever is sooner.

**End-Quarter Policy Statement**

The End-Quarter Period is a time of reduced social and extracurricular activity preceding final examinations. Its purpose is to permit students to concentrate on academic work and to prepare for final examinations. In Autumn, Winter, and Spring quarters, End-Quarter starts seven full days (to begin at 12:01 a.m.) prior to the first day of final exams. In Spring Quarter, final examinations begin on Friday; no classes are held on Thursday, the day before. In Summer Quarter, this period consists of the weekend and the four class days preceding the final examinations, which take place on Friday and Saturday of the eighth week. (See the Time Schedule for dates.)

During the End-Quarter Period, classes are regularly scheduled and assignments made; this regular class time is used by instructors in whatever way seems best suited to the completion and summation of course material. Instructors should neither make extraordinary assignments nor announce additional course meetings in order to “catch up” in course presentations that have fallen behind. They are free, however, and even encouraged to conduct optional review sessions and to suggest other activities that might seem appropriate for students preparing for final examinations.

No graded homework assignments, mandatory quizzes, or examinations should be given during the End-Quarter Period except:

1. In classes where graded homework assignments or quizzes are routine parts of the instruction process.

2. In classes with laboratories where the final examination will not test the laboratory component. In such a case, the laboratory session(s) during the End-Quarter Period may be used to examine students on that aspect of the course.

Major papers or projects about which the student has had reasonable notice may be called due in the End-Quarter Period. Take-home final examinations, given in place of the officially scheduled in-class examination, may be distributed in the End-Quarter Period. Although the instructor may ask students to return take-home examinations early in the final examination period, the instructor may not call them due until the end of the regularly scheduled examination time for that course. Such a policy respects the principle that students’ final examinations are to be scheduled over a period of several days. End-quarter examinations may not be held during this period. This policy preserves the instruction time for courses and protects the students’ opportunities for extensive review and synthesis of their courses.

**Final Examinations**

Final examinations are scheduled by the Office of Medical Education, which posts tentative dates and times by the end of the previous quarter and final schedules by the end of the second week of the quarter. Students anticipating conflicts in examination schedules should seek to resolve them with course instructors.

Final examinations are governed by the regulations below:
1. Students are expected to take the final examination unless at least 24 hours prior to the examination they have received formal written approval for either dropping the course from the course director or for obtaining an incomplete from an Advising Dean. Incompletes are given for significant personal or medical reasons beyond the student’s control. If a student does not appear for the examination and has not been granted a drop or an incomplete, the student will receive a fail.

2. Students are expected to report for their examinations at the time and place designated by the Office of Medical Education or the course director, unless the course director has made alternative arrangements. While examinations are not “proctored” as such, students must take the examination in the designated location within the prescribed examination time. Students are expected to adhere to the Honor Code at all times during examinations.

3. When the final examination or its appropriate substitute is not an in-class examination (e.g., when an instructor assigns a take-home examination, paper, or project in lieu of an in-class examination), the schedule and format of the final examination, or its substitute, will be determined no later than the end of the second week of the quarter and, if changed subsequently, may be only a modification approved by a majority of the students in the class.

4. Students with documented disabilities who have been determined by the Office of Accessible Education to require special examination accommodations (see Section 9.6) are responsible for notifying the Assistant Dean of Student Affairs prior to the examination. Such notification by the student should be made at least one week in advance of his/her scheduled exam. The Assistant Dean for Student Affairs coordinates with the Course Director for the accommodation to be made. Students do not request (and should not seek to arrange) accommodations directly from faculty members or course directors.

5. Feedback on written examinations is to be as complete as practicable; correct answers should be distributed or posted promptly after the examination at a previously announced place, and students should receive their numerical score and its relationship to the class distribution curve in a manner that ensures student privacy. Students have the right to see their final examination and discuss it with a faculty member.

**CORRECTION OF DEFICIENCIES IN PRE-CLERKSHIP COURSES**

The faculty of every course must identify those students whose performance is marginal or failing. A Deficiency Report Form for Marginal or Failing Performance in Pre-clerkship Courses is sent to the School of Medicine Registrar’s Office and to each student so identified.

Students receiving notification of a marginal pass should meet with the appropriate faculty and discuss the requirements for achieving an unqualified passing grade. Once a student achieves a “pass,” the performance will no longer be recorded as “marginal” in the student’s record. Students who receive a marginal pass in a course of eight or more units (i.e. HHD or POM) must correct the marginal pass within 12 months of receipt of the marginal pass and prior to beginning any clinical clerkship, and will be required to take USMLE Step 1 examination prior to beginning any clinical clerkship. No student having more than one marginal pass in courses of fewer than eight units may begin any clerkship. If two uncorrected marginal performance grades accumulate in pre-clerkship courses of fewer than eight units, the student is required to correct at least one of the within 12 months of receipt of the second marginal pass and prior to beginning clinical clerkships. Students with one or more marginal passes will be counseled by an Advising Dean and reviewed by the Committee on Performance, Professionalism and Promotion (CP3).
Students who fail a pre-clerkship course must achieve a passing grade within one year of the failure or prior to beginning clerkships, whichever is sooner. If this cannot be achieved through remediation (as determined by the Course Director) then the student must retake and pass the course when it is next offered. Only the CP3 has the power to change this requirement. The requirements for achieving a passing grade are determined by the responsible faculty. Students with a failing grade will be counseled by an Advising Dean and reviewed by the Committee on Performance, Professionalism and Promotion.

Academic deficiencies in pre-clerkship courses must be rectified prior to the beginning of clerkships or by a date specified by the CP3 (which has the power in an appropriate case to modify any of the requirements in this paragraph). Please see Section 7.5 for further detail on marginal pass and failure policies.

Departments are encouraged to provide educational assistance to students failing required courses on the first-year grid, preferably during the first summer quarter following receipt of a failing grade, and to reexamine such students prior to autumn quarter registration. Students failing courses on the autumn and winter quarter grids for the second year should, as a general proposition, be given the opportunity to correct these deficiencies prior to July 1 of that academic year. Students who receive an incomplete grade because of extenuating medical or personal circumstances should, once again as a general rule, be given the opportunity to correct the incomplete grade within one (1) year or prior entering clerkships, whichever comes first, in a manner specified by the department or responsible teaching group. Courses such as those in the Practice of Medicine sequence, where hands-on activities and small group interactions constitute a significant portion of the course, may require retaking of the course the following year.

**EVALUATION OF PERFORMANCE IN HUMAN HEALTH AND DISEASE (Q3-5): STATEMENT ON FEEDBACK, GRADING AND EXAMINATIONS**

**Grading**

Students receive a Pass or Fail assessment (reported in Axess) after each quarter. The grade is based on the individual scores in the scheduled end-block examinations and the integrated final exam. Students must achieve an overall equally-weighted-average passing score of at least 70% on all exams (all block exams plus the integrated final exam). In addition, students must achieve a passing score of at least 65% on the integrated final exam in order to pass the course.

A student with an average block and final exam combined score less than 70% or an integrated final exam score less than 65% must take the scheduled course remedial examination. A failing score on this remedial examination will earn a grade of “fail” for the course. The “marginal pass” grade is not used in the HHD course.

**Policy for Missed Exams**

Every student is expected to sit for each end-block examination and each end-quarter integrated examination in the Human Health and Disease course.

A formal Advising Dean's excuse is required to make-up any missed course examination. (The 2010-2011 Advising Deans are Neil Gesundheit, Susan Knox, Oscar Salvatierra, and Terry Blaschke).

An Advising Dean's excuse may be issued before a regularly scheduled exam to accommodate some essential extracurricular event or after an examination for illness.
A score of zero will be credited towards a student’s final score if an examination is missed without an Advising Dean's excuse.

If an Advising Dean's excuse is issued before a regularly scheduled block exam to accommodate some essential extracurricular event, the student will be expected to take the scheduled makeup exam at Stanford, which is offered once two to three days after the regularly scheduled exam. If the Advising Dean's excuse extends beyond the second date because of some essential activity away from Stanford, then the examination will be faxed to the student and must be completed and returned within 24 hours. No other block exam will be arranged for students with excuses granted before a scheduled exam. Failure to make such an arrangement will result in a score of zero on that exam. A student who misses an exam with an Advising Dean's excuse for illness should contact the HHD course coordinator and appropriate arrangements will be made.

Policy for Remediation of a Fail Grade in an HHD Course

A student who receives a Fail in any quarter of the HHD series (INDE 220, INDE 221, INDE 222 or INDE 223) will be required to take a special remedial examination after the inter-quarter break, on the day before classes start in the next academic quarter. This examination will be offered ONCE. Vacation plans do not dictate when the exam will be taken. The course directors agree that a non-passing grade in HHD indicates a need for in-depth review of the entire quarter and have scheduled the remedial exam to allow such additional study. Correction of a Fail grade in HHD requires a full passing score (≥70%).

A student who fails a quarter of HHD (and who then fails the special remedial examination) will be required to re-take that quarter the following year, including all required exercises and examinations. A student must petition the Committee on Curriculum and Academic Policy to be allowed to continue in the HHD sequence.

**EVALUATION OF PERFORMANCE IN PRACTICE OF MEDICINE (Q1-Q6): STATEMENT ON FEEDBACK, GRADING AND EXAMINATIONS**

**Grading**

Students receive a Pass (+), Continuing (N), Marginal Pass (MP), Fail (-), or Incomplete (I) grade after each quarter. The grade is based on completion of quarter course requirements, satisfactory performance on end-of-quarter assessments, and professional behavior. Following are the guidelines for each grade option in the course:

- **Pass (+):** Students have completed all course requirements, performed satisfactorily on the final Standardized Patient assessment and each section of the written final examination, and exhibited professional behavior in the course.

- **Continuing (N):** Students have not completed all course requirements and/or did not perform satisfactorily on any individual section of the written final examination.

- **Marginal Pass (MP):** Students have not performed satisfactorily on the final Standardized Patient assessment and/or the overall written final examination; there may be some concern about the student’s professional behavior in the course; and/or the student’s performance in in-class activities has raised some concerns about knowledge and competence.
Fail (-): Students have performed poorly on the final Standardized Patient assessment and/or the overall written final examination (using the criteria above for N Grade or Marginal Pass); there may be serious concerns about the student’s professional behavior in the course; and/or the student’s performance in in-class activities has raised serious concerns about knowledge and competence.

Incomplete (I): Student has satisfactorily completed a substantial part (but not all) of the course work. Students must request an incomplete grade by the last class meeting. Incomplete grades must be made up within one (1) year, or prior to entering clerkships, whichever comes first.

A grade of Continuing (N), Marginal Pass (MP), or Fail (-) will require notification to the Committee for Professionalism, Performance, and Promotion (please see Section 7 for more information about this committee).

Students who do not perform satisfactorily on either the final Standardized Patient assessment and/or the written final examination (less than 65%) must complete a plan of remediation tailored to student needs and course resources. Students who do not satisfactorily complete this plan of remediation will earn a “Fail” grade for the course.

Policy for Missed Assessments
Every student is expected to be present for each final Standardized Patient assessment and each end-quarter integrated examination in the Practice of Medicine course.

A formal Course Director's excuse is required to make-up any missed course examination. It is recommended that students meet with their Advising Deans prior to submitting a formal request for any missed course examination. (The 2010-2011 Advising Deans are Neil Gesundheit, Susan Knox, Oscar Salvatierra, and Terry Blaschke).

A Course Director's excuse may be issued before a regularly scheduled assessment or examination to accommodate some essential extracurricular event or after an examination for illness.

A score of zero will be credited towards a student’s final score if an assessment or examination is missed without an Advising Dean's excuse.

If a Course Director's excuse is issued before a regularly scheduled assessment or examination to accommodate some essential extracurricular event, the student will be expected to take the scheduled makeup examination or assessment at Stanford. If the Course Director's excuse extends beyond the second date because of some essential activity away from Stanford, then appropriate arrangements will be made within the resources of the course. Failure to make such an arrangement will result in a score of zero on that exam. A student who misses an assessment or examination with a Course Director's excuse for illness should contact the POM course coordinator and appropriate arrangements will be made.

Policy for Remediation of a Continuing, Marginal Pass, Fail Grade in POM
A student who receives a Continuing (N) in any quarter of the POM series (INDE 201-206) must complete outstanding course requirements to correct the grade to a Pass (+). The student will be allowed to continue through the POM sequence. The Committee on Professionalism, Performance, and Promotion will be notified. Students who do not satisfactorily complete this plan of remediation will earn a Marginal Pass (MP) grade for the course.
A student who receives a Marginal Pass (MP) in any quarter of the POM series (INDE 201-206) must successfully complete a course of remediation tailored to student needs and course resources to correct the grade to a Pass (+). The student will not be allowed to continue through the POM sequence, unless provided special permission from the course director. The Committee on Professionalism, Performance, and Promotion will be notified. Students who do not satisfactorily complete this plan of remediation will not be allowed to continue to clerkships.

A student who receives a Fail in any quarter of the POM series (INDE 201-206) will be required to re-take that quarter the following year, including all required exercises and examinations. The student will not be allowed to continue through the POM sequence, unless provided special permission from the course director (please see various five-year “split” schedules from the Office of Medical Education). The Committee on Professionalism, Performance, and Promotion will be notified.

6.2 EVALUATION OF PERFORMANCE IN CLINICAL CLERKSHIPS

Evaluation of performance in required clinical clerkships is accomplished through a combination of direct observation, multiple choice examinations, and/or standardized patient examinations. The clerkship director is responsible for providing a written evaluation of the student’s performance based on data provided by faculty, housestaff, and others who have observed the student’s work. Written evaluations of clerkship performance should be completed four to six weeks after the end of the clerkship.

**MID-ROTATION FEEDBACK:**
All clerkships of four weeks or longer must provide students a formal mid-clerkship assessment of performance. Mid-clerkship feedback must be provided early enough to allow a student to improve his or her performance before the end of the clerkship. Clerkships must maintain written documentation that mid-rotation feedback has been provided to each student.

**FINAL GRADES**

**Required Clerkships:**
Students who started clerkships before Period 1, 2010 may earn an official final grade of Pass, Marginal Pass, or Fail in required clerkships. They may also earn the notation of Pass with Distinction (see criteria below); however, this notation will not be reported on the student’s Medical Student Performance Evaluation (MSPE). The Pass with Distinction notation will in this case only be used for formative purposes and will not be included in the official record nor on the official transcript.

Students starting clerkships Period 1, 2010 or later may earn a final grade of Pass, Marginal Pass, or Fail in required clerkships. They may also earn the notation of Pass with Distinction (see criteria below), which will be reported in the student’s MSPE.

**Electives, Selectives:**

During the 2010-11 academic year, students on elective and selective clerkships may earn a final grade of Pass, Marginal Pass, or Fail.
Criteria for Pass and Pass With Distinction in Required Clerkships

Note: Beginning in Clerkship Period 1, 2010, all students taking required clerkships will be evaluated using the CBEI model and Pass With Distinction (PWD) criteria. As noted above, the notation of Pass with Distinction will only be reported in the MSPE for students who entered clerkships Period 1, 2010 or later. For students who entered clerkships prior to Period 1, 2010, PWD will be noted for formative evaluation purposes only and will not appear in their MSPEs.

- Pass With Distinction (PWD) indicates that a student has met a set of criteria for distinctive performance in a required clerkship. Domains assessed in determining PWD include professionalism, medical knowledge and clinical reasoning. For detailed information on the criteria used in this evaluation, see section 6.2. (PWD applies only to required clerkships; it does not apply to elective clerkships or pre-clerkship courses). Note: Beginning in Clerkship Period 1, 2010, all students taking required clerkships will be evaluated using the Criterion-Based Evaluation (CBEI model) and Pass With Distinction criteria. PWD grades will only reported in the MSPE for students who entered clerkships Period 1, 2010 or later. For students who entered clerkships prior to Period 1, 2010, PWD grades will be assigned for formative evaluation purposes only and will not appear in their MSPEs.

Criteria for Pass

Patient Care:
- Student has met requirements for direct observation of clinical skills (2 documented observations per clerkship)
- Student functions at the RIME Interpreter stage*

Professionalism/Interpersonal Communication:
- No significant or consistent concerns
- Patient logs, other assignments are complete.

Exam score falls above clerkship passing threshold.

Criteria for Pass with Distinction

All Passing criteria must be met AND

Patient Care:
- Student functions at the RIME Manager stage*

Professionalism/Interpersonal Communication:
- Student has gathered multisource feedback (forms requested from 1 non-MD staff member, 1 patient, 1 peer).
- Student has demonstrated evidence of Exceptional Professionalism/Interpersonal Communication.
Exam score falls above clerkship-specific threshold for Pass with Distinction.

* See the Criterion-Based Evaluation Initiative website (http://med.stanford.edu/md/curriculum/CBEI/index.html) for details.

CLERKSHIP PERFORMANCE EVALUATION APPEALS

Students who have questions or concerns about a performance evaluation in a clinical clerkship should contact the Clerkship Director or an Advising Dean to request a review. If a student’s disagreement remains unresolved, the student or his or her Advising Dean may request a review by the Clerkship Evaluation Committee (CEC) by contacting the CEC chair. A written request for a review must be received within eight weeks of the date that the final student performance evaluation was submitted in E*Value in order to be considered.

The CEC consists of the following members (or their designees) who will participate in each appeal or review:
- Director of Evaluation (CEC chair)
- Director of Clerkship Education
- An Advising Dean other than the appealing student’s advisor
- A Required Clerkship Director other than the director involved in the appeal
- One additional faculty member (not involved in clerkships or CP³)
- Associate Dean for Medical Education, as necessary

Upon receiving a request for review, the CEC will notify the clerkship team responsible for the performance evaluation and will gather data from the student and the clerkship team. The CEC will review the final evaluation and all submitted data, gather additional information as needed, and will generally reach a decision by consensus. The student and clerkship team will be notified in writing of the final decision. The CEC will attempt to complete each appeal within 45 days of the request. The CEC decision is considered final. Students with further concerns may choose to pursue the Stanford University student academic grievance procedure: http://www.stanford.edu/dept/registrar/bulletin/4988.htm, though they should recognize the limited scope of review inherent in that procedure.
STANDARDIZED PATIENT TEACHING AND ASSESSMENT ACTIVITIES

The Standardized Patient (SP) Program offers clinical skills training for medical students throughout the four-year curriculum. Its activities are designed to provide a simulated setting for the instruction and assessment of the clinical, cross-cultural and interpersonal skills of medical students. Real patients or actors are trained to consistently recreate the same clinical situation, findings, or problem with each student encounter. Practice of Medicine (POM) and several clerkships, including but not limited to Family Medicine, Ambulatory Medicine, Pediatrics, and Obstetrics/Gynecology, currently utilize the Standardized Patient Program in their curricula.

The SP Program also coordinates a series of Clinical Performance Exams (CPX) administered throughout the medical school curriculum:

1. The **CPX** (see section 4.9) is a standardized patient-based examination to assess the clinical skills of students towards the completion of medical school. It is administered at all eight medical schools in California on behalf of the California Consortium for the Assessment of Clinical Competency (CCACC). The exam is a half-day exercise, involving eight patient-based encounters. Successful completion of the CPX is a School of Medicine graduation requirement.

2. The **Mini-CPX**, a four-station examination, is offered in the spring of the second year of the medical school curriculum. This examination is similar in format to the CPX and serves both as a “final exam” for the pre-clerkship clinical skills curriculum and as a means for students to identify skill areas on which to focus prior to entering clinical clerkships. Students who do not attain an overall passing score on the exam will be identified for remediation.

3. The **Micro-CPX** is a two-station examination offered at the end of the first year of the medical school curriculum. Like the Mini-CPX, the Micro-CPX is similar in format to the CPX and serves as a means to assess student skills at the conclusion of the first year of medical training. Both the Mini-CPX and Micro-CPX are administered as part of the Practice of Medicine course.

In general, SP assessments may consist of two to eight stations or cases and are typically administered over approximately two to five hours. The encounters are digitally videotaped to allow faculty and students to review student performance. Following the encounters, feedback is provided in one of three parts, depending on the nature of the SP activity: didactic debriefings with the students, faculty and SP; numerical scores in the area of clinical and interpersonal skills; and narratives representing faculty and the standardized patient’s overall assessment of the student’s performance. For more information, see the Standardized Patient Program Web site at

http://med.stanford.edu/ome/spp/

CORRECTION OF DEFICIENCIES IN CLINICAL CLERKSHIPS

During the course of a clerkship, when a clerkship director becomes aware that a student’s performance may warrant a marginal pass or failing grade, the clerkship director must notify the student promptly that, in the absence of improvement, a non-passing grade is being considered. Once the director confirms the decision to assign a non-passing grade, the clerkship director must immediately notify the student about the final grade to be assigned. The clerkship director should also notify the student’s Advising Dean, who will arrange a meeting with the student.
Requirements for correcting a marginal pass or failure will be determined by the clerkship director. Students who receive a marginal pass or failing grade are required to meet with the clerkship director to set timely requirements for achieving an unqualified passing grade. Non-passing grades in clerkships, including N or “continuing” grades for failed NBME subject exams, must be corrected within one year of completing the clerkship. Students failing to correct a non-passing grade within one year will be reviewed and discussed by the Committee on Performance, Professionalism and Promotion.

Students cannot receive a Stanford MD degree with an uncorrected marginal pass or failure in a clerkship.

### 6.3 MEDICAL STUDENT PERFORMANCE EVALUATION (MSPE)

The Medical Student Performance Evaluation (MSPE), also known as the Dean’s Letter, will be compiled by the Advising Deans and sent to residency program directors as part of the application to obtain positions for postgraduate training. The letter is submitted to residency programs in the autumn of the student’s final year in the MD program. This letter is a narrative evaluation of the student’s accomplishments in the MD program. Achievements during clinical clerkships and attributes as potential house officers and physicians are major points of emphasis. Recognition is included in the letter for accomplishments in research, teaching, and community service.

For more information about the MSPE, refer to the student resources section of the MD Advising Web site:

7. COMMITTEE ON PERFORMANCE, PROFESSIONALISM AND PROMOTION (CP³)

7.1 Introduction

7.2 Standards for Performance and Satisfactory Progress

7.3 Promotion

7.4 Procedures for Addressing Performance, Professional and Technical Concerns

7.5 Appendix: Chart of CP³ Responses to Student Issues
7.1 INTRODUCTION

The Committee on Performance, Professionalism and Promotion (CP³) is a standing committee of the Stanford University School of Medicine Faculty Senate. The purpose of the CP³ is to provide all medical students with periodic and systematic reviews of their overall progress towards completion of the MD degree, as well as reviews on an as-needed basis. The committee will monitor student development and will provide guidance, recommendations, and remediation as appropriate.

Stanford University School of Medicine has an obligation to evaluate the performance of each student on an ongoing basis from matriculation until graduation with an MD degree, and to endorse each student as being suitable in terms of meeting the academic, professional, and technical standards for the practice of medicine. It is therefore the responsibility of the faculty – through this committee – to review any concerns regarding the ongoing satisfactory fulfillment of these standards.

A. Membership:

The CP³ is composed of 12 voting members, including its chair. A total of seven voting members is required for a quorum. Voting members are basic science or clinical faculty who have been appointed by the Stanford University School of Medicine Faculty Senate for three-year terms. A quorum of voting members of the CP³ is required to be in attendance (either physically or via speaker phone) for decision-making activities. Ex officio non-voting committee members may include (but are not limited to) the Advising Deans, the Assistant Dean for Student Affairs, and the Associate Dean of Minority Advising and Programs.

B. General Operating Procedures:

1. The primary responsibility of the committee is to review the development and performance of each student on an ongoing basis in the areas of the fulfillment of academic, technical, and professional standards. This includes:

   a. Evaluation of achievement of all requirements for promotion.

   b. Identification of students having difficulty meeting requirements and/or expectations for academic, professionalism, or technical performance, and recommendation of individualized learning plans that support academic and professional development, which may include academic support and required remediation, as necessary.

   c. Evaluation of achievement of required remediation.

   d. Taking such action (including dismissal from the Stanford University School of Medicine MD program) as the CP³ deems appropriate under the facts and circumstances.

2. The CP³ generally will meet once quarterly. The chair may call additional meetings if necessary.

3. Except for the CP³ chair, the Advising Deans, the Associate Dean of Minority Advising and Programs, and the Assistant Dean for Student Affairs, members of the committee will not discuss decisions or pending actions with students and should not be approached by students with inquiries.
4. The CP³ also considers student petitions on various matters, including for:
   a. An extension of medical education beyond six years as a registered student to complete the MD degree, and beyond eight years to complete MD/PhD degrees.
   b. Leaves of absence that either individually or cumulatively exceed a total of one year.
   c. Reinstatement.

5. The CP³ is staffed by a representative from MD Registrar’s Office/Student Services.

7.2 STANDARDS FOR PERFORMANCE AND SATISFACTORY PROGRESS

In order to make satisfactory progress towards the MD degree, each student must satisfy academic, professional, and technical standards on an ongoing basis.

A. Academic: Students are required to make satisfactory academic progress in terms of units taken and passed, courses and clerkships successfully completed, timely completion of other requirements, and correction of deficiencies.

1. Units

   a. Students must take and successfully complete a per-quarter number of general School of Medicine units (any units listed in the School of Medicine Course and Clerkship Catalog or included for Scholarly Concentration) as follows:

      (i) During Autumn, Winter and Spring quarters (except for the graduation quarter), at least 9 units.

      (ii) Summer quarter (if registered), at least 3 units.

      (iii) Students in Master’s or PhD programs that have required courses outside of the School of Medicine (either programs in another Stanford school or interdepartmental medical school programs) will be monitored for a per quarter unit requirement to be set by the appropriate program director.

   b. Students must take, and successfully complete, a cumulative number of required MD units by the end of August of each year as follows:

      (i) MD students: At least 35 required units by the end of the first year, 70 by the end of the second, 105 by the end of the third, 140 by the end of the fourth, and 252 by the end of the sixth.

      (ii) MD/PhD students: At least 23 required units by the end of the first year, 46 by the end of the second, 69 by the end of the third, 92 by the end of the fourth, 115 by the end of the fifth, 140 by the end of sixth, and 240 by the end of the eighth year.
(iii) The cumulative required number of units will be adjusted for those students who have been exempted by the course director from one or more required courses, or who are on an approved Leave of Absence

NOTE: Unit requirements for financial aid eligibility are not necessarily the same as for satisfactory academic progress for graduation. Students should also refer to financial aid policy, and consult with the School of Medicine Financial Aid Office.

2. Number of Years

a. If a student plans to take more than six years (MD) or eight years (MD/PhD), exclusive of time spent during an approved Leave of Absence, the student must petition for and receive approval by the CP3, preferably at the end of the fourth (MD) or sixth (MD/PhD) year, but no later than the fifth (MD) or seventh (MD/PhD) year, in order to facilitate academic and financial planning. The student’s petition must provide reasons for the requested extension and submit specific plans for completing the degree, which plans are subject to the review and approval by the student’s academic advisor.

b. The maximum time allowed does not include periods of approved Leave of Absence, but no combination of program extensions and approved Leaves of Absence shall exceed eight years (MD) or ten years (MD/PhD) without CP3 review and approval.

c. For transfer students, quarters completed prior to enrolling in Stanford University School of Medicine are subtracted from the maximum time frame.

3. Scholarly concentrations

Students must make satisfactory progress in meeting Scholarly Concentrations requirements, as those requirements are outlined in Section 3.4 of this handbook.

4. Examinations

Students must make satisfactory progress in meeting examinations requirements, such as the USMLE Step 1, Step 2 CK and Step 2 CS (see Section 2.8), and CPX (see Section 4.9).

5. Academic Deficiencies

a. All academic deficiencies must be corrected within one year (or otherwise within a time limit specifically set by the CP3 in the individual case).

b. Note that some deficiencies may be considered to be unable to be remediated and may result in immediate dismissal. Such circumstances may include (but are not limited to) when one or more of the following conditions apply:

   (i) two failures in clinical clerkships.

   (ii) three marginal passes in clinical clerkships.
(iii) failures in more than 20% of units of pre-clerkship required coursework in a given academic year or over the course of the pre-clerkship curriculum (whether or not remediated).

(iv) failures in more than 20% of units of combined pre-clerkship or clinical coursework (whether or not remediated) of USMLE Step 1 three times.

(v) failure of USMLE Step 2 CK (Clinical Knowledge) twice and failing the internal examination.

(vi) failure of USMLE Step 2 CK (Clinical Knowledge) three times.

c. A student’s failure to attend required meetings, comply with CP\textsuperscript{3} directives for remediation, or meet CP\textsuperscript{3} deadlines may preclude remediation and result in immediate dismissal from the Stanford University School of Medicine MD program.

B. Professionalism: Students are required on an ongoing basis to satisfy professionalism standards, as those standards are outlined in Section 2.9 of this handbook. A serious breach of professionalism may result in immediate dismissal from the Stanford University School of Medicine MD program.

C. Technical Standards: Students are required on an ongoing basis to satisfy technical standards, as those standards are outlined in Section 2.11 of this handbook. Continued fulfillment of such standards is a requirement for ongoing registration in the Stanford University School of Medicine.

### 7.3 PROMOTION

The CP\textsuperscript{3} will conduct a systematic review at three intervals of all students’ progress towards completion of the MD degree. Those reviews will encompass all areas of academic performance, professionalism, and technical standards. Students whom CP\textsuperscript{3} determines have met these standards will be eligible for formal promotion as follows:

B. Promotion to Clinical Medical Student: upon completion of pre-clerkship courses and other requirements, students will be reviewed for formal promotion. Criteria for promotion are:

1. Satisfactory completion of all required pre-clerkship courses with a passing grade by May 15 of the academic year. \textit{(NOTE: A maximum of one grade of “marginal pass” in a pre-clerkship course will be permitted, but only in a course of fewer than 8 units.)} MD/PhD students may be required to take an additional preparatory clinical course prior to entering clerkships.

2. Satisfactory fulfillment of the standards for professionalism of the Stanford University School of Medicine MD program.

3. Satisfactory fulfillment of the technical standards of the Stanford University School of Medicine MD program.

4. Satisfactory progress in a Scholarly Concentration, as certified by a student’s Scholarly Concentration Director.
5. Completion of USMLE Step 1 with a passing grade by February 1 of the first clinical year. Students receiving an overall failing grade on their first attempt at the Step 1 examination will have their provisional promotion rescinded and will be withdrawn from clerkships at the end of the current clerkship period, and may not begin any further clerkship (except Pathology) until the Step 1 examination is retaken and satisfactorily passed. The CP³ may determine, in its discretion, the circumstances under which Step 1 may be retaken.

Students who are determined by the CP³ as not fulfilling the standards for Promotion to Clinical Medical Student, or who do not satisfy the remediation measures required by the CP³, may be dismissed by the CP³ from the MD or MD/PhD program. Students who do not achieve successful promotion to Clinical Medical Student cannot continue as MD candidates in the Stanford University School of Medicine.

C. Promotion to Candidate for Residency: In January of the anticipated year of graduation, the CP³ will review students’ progress to certify formally those students who are eligible for the residency match. Criteria for promotion include:

1. Satisfactory completion of all required clinical clerkships, or acceptable documentation to the committee that the remaining required clerkships will be successfully completed by June of the graduation year.

2. Continued satisfactory fulfillment of the standards for professionalism of the Stanford University School of Medicine MD program.

3. Continued satisfactory fulfillment of the technical standards of the Stanford University School of Medicine MD program.

4. Completion of (or documented satisfactory progress in) a Scholarly Concentration, as certified by a student’s Scholarly Concentration Director.

5. Documentation that USMLE Step 2 CK will be taken by April 1 of the graduation year.

D. Promotion to Eligible for MD Degree: In May of the anticipated year of graduation, the CP³ will review students’ progress to determine their eligibility for promotion to “eligible for MD degree.” If promoted, a student will be included on the list to be transmitted to the Dean and Registrar of the University for Conferral of the MD degree. Criteria for promotion are:

1. Satisfactory completion of all degree requirements, including passing scores on the CPX exam and the USMLE Step 2 CK exam (or an institutionally-administered equivalency exam), and documentation of having taken the USMLE Step 2 CS (or be scheduled to take it) prior to June 1 of the graduation year.

2. Continued satisfactory fulfillment of the standards for professionalism of the Stanford University School of Medicine MD program.

3. Continued satisfactory fulfillment of the technical standards of the Stanford University School of Medicine MD program.
4. Completion of a Scholarly Concentration as certified by the Director of the student’s Scholarly Concentration.

5. No unresolved concerns regarding academic performance, professionalism or fulfillment of the technical standards.

7.4 PROCEDURES FOR ADDRESSING PERFORMANCE, PROFESSIONAL AND TECHNICAL CONCERNS

A. In general:

1. The CP³ will periodically review the record of all students; in addition it can place any student on its agenda for discussion and action if there is a concern about his or her performance or progress in fulfilling academic, professionalism or technical standards.

2. The CP³ can take any action it deems appropriate in its discretion under the facts and circumstances presented to address any concerns about academic, professional or technical standards issues, including (but not limited to):
   a. Requiring a student to correct a marginal pass or a failing grade in a specified manner and/or by a specified date.
   b. Placing a student on academic probation with a prescribed and restricted curriculum (including the discontinuation of activities such as extracurricular activities, RA-ships and TA-ships, laboratory research, community service, etc.) for a time period specified by the CP³.
   c. Requiring a student to take USMLE Step 1 or Step 2 CK at a specified time, requiring a passing score on such an exam, and/or restricting access to any clerkship until he or she has either taken or received an overall passing score.
   d. Placing the student’s enrollment on administrative hold for one or more quarters.
   e. Requiring a remedial curriculum, or that the student be referred for an assessment.
   f. Dismissing the student from Stanford University School of Medicine MD program under circumstances deemed by the CP³ to warrant such action.

NOTE: See “7.5 Appendix: Chart of CP³ Responses to Student Actions” of this chapter for examples of some of the actions that may be taken by the CP³ to address certain academic deficiencies.

B. Procedures regarding academic deficiencies:

1. As a general proposition, students will be notified in advance if they are to appear on the agenda of the CP³.

2. Students who appear on the CP³ agenda in regard to an academic deficiency will be accorded the following rights:
a. To ask for and receive from an Advising Dean a written explanation as to why they are receiving attention by the CP\(^3\).

b. To have an opportunity to discuss their academic progress and/or deficiencies with an Advising Dean and to participate in formulating for presentation to the CP\(^3\) a proposal for a remedial program (where appropriate).

c. To have an opportunity to submit a written statement to the CP\(^3\).

d. In any case involving dismissal from Stanford University School of Medicine MD program, to be invited to appear in person at the scheduled CP\(^3\) meeting during the presentation of their case prior to the closed deliberation of the committee.

NOTE: Students appearing before the CP\(^3\) may have a qualified advocate of their choice accompany them to the meeting; advocates may be either the student’s academic advisor or another faculty member of Stanford University School of Medicine. An attorney is not a qualified advocate.

e. Under ordinary circumstances, to receive a written report within 10 working days after the CP\(^3\) meeting detailing the committee action taken. The time frame may be extended for good cause at the discretion of the CP\(^3\) chair.

f. To have an opportunity to discuss the CP\(^3\) action and report with an Advising Dean and to submit a written request to the CP\(^3\) chair that the action be reconsidered. The request must be based on compelling new information not available at the time the action was taken, not on a complaint expressing dissatisfaction with the outcome or with an underlying University or Stanford University School of Medicine policy of general application. Such a request should be submitted within 14 working days of receipt of the report, but the time frame may be extended for good cause at the discretion of the CP\(^3\) chair.

g. To have the opportunity to file a formal grievance, as outlined in the Stanford University Bulletin (Student Academic Grievance Procedure). Grievances appealing a CP\(^3\) action are filed with the Dean of the School of Medicine.

C. Procedures regarding professionalism concerns:

1. In general:

a. The faculty of Stanford University School of Medicine endorses students as suitable to practice medicine based on maintenance of continuous satisfactory performance in the areas of meeting academic, professional, and technical standards.

b. The CP\(^3\) may address minor professionalism concerns at its discretion and as it sees fit, such as by referral to a student’s academic advisor or completion of a program of remediation.

c. As to serious professionalism concerns, such concerns will be addressed under a three step process as presented below.

NOTE: Alleged violations of Stanford’s student conduct codes (including the Honor Code and the Fundamental Standard) are adjudicated by a different University process. That conduct,
however, may also raise concerns regarding professionalism requiring review under this process.

2. The Three-Step Process

   a. Step 1: Personal Communication

      (i) A faculty member (including any of the Advising Deans) or any other individual should communicate a possible substantive deficiency in professionalism of a medical student to the Senior Associate Dean for Medical Education. The Senior Associate Dean will then inform the CP. This should be done as soon as practicable after the professionalism deficiency is identified.

      (ii) The Senior Associate Dean (or his or her delegate) should give the student a copy of these guidelines and arrange a meeting with the student and, as appropriate, the individual identifying the deficiency and/or any of the Advising Deans. If the alleged deficiency can be explained or corrected in a mutually satisfactory manner, the matter need go no further. The Senior Associate Dean should then communicate his or her conclusions or actions to the CP.

      (iii) To facilitate identification of students who may have professionalism deficiencies, student services personnel will maintain impermanent files separately from students’ permanent files as a repository for such concerns. If a serious professionalism concern is communicated to a student, a memorandum regarding the conversation should be sent to the student and a copy placed in the student’s impermanent file. By having a central repository for such information, students whose performance repeatedly provokes professionalism concerns can be identified. The impermanent file should also contain records on formal or informal hearings, and/or CP considerations of students regarding professionalism. Except as disclosure is necessary under this process, access to impermanent files will in general be restricted to those Stanford administrative personnel with a need to know (such as the Advising Deans and the CP) and the student. As a general proposition, the contents of any such impermanent file are to be destroyed within one year after the student graduates.

   b. Step 2: CP Informal Hearing

      (i) If the student, the identifier of the deficiency, the CP, or the Senior Associate Dean is not satisfied with the result of the personal communication described above, the CP will hold an informal private hearing upon being notified of that dissatisfaction. The informal CP hearing will involve the student, a quorum of the CP, the student’s Advising Dean, a student-chosen advocate (who must be a faculty member of Stanford University School of Medicine), and any other individual (e.g., the faculty member identifying the deficiency) whom the chair of the CP thinks pertinent to discuss the matter. The purpose of the informal private hearing will be to permit the student and any other involved individuals to present their versions of the alleged deficiency and work out, if possible, a mutually satisfactory remedy.

      (ii) The chair of the CP will communicate in writing the results of the hearing to the student and the Senior Associate Dean within ten working days of the meeting. At the discretion of
the Senior Associate Dean, the written communication or other summary of any mutually satisfactory remedy may also be placed in the student’s permanent file. If there is no mutually satisfactory remedy, the written communication and any other records of the informal hearing will be placed in the student’s impermanent file.

c. Step 3: Formal Hearing

(i) If the matter cannot be satisfactorily resolved at the CP\textsuperscript{3} informal hearing, or if the student or the Senior Associate Dean is not satisfied with the outcome of the hearing, or if there is a breakdown of (or failure to timely complete or adhere to) the mutually agreed-upon remedy, the CP\textsuperscript{3} chair will call a formal hearing.

(ii) A formal hearing is intended to provide an opportunity for the parties to present their positions in a process with the authority to decide on a remedy and/or an outcome, including dismissal from the Stanford University School of Medicine MD program. The Executive Committee of the School of Medicine Faculty Senate shall appoint, to hear the matter, an ad hoc Committee on Suitability for the Practice of Medicine. The Committee on Suitability will be composed of four members of the full-time faculty and one member of the adjunct clinical faculty. Each member of the Committee on Suitability must attend the formal hearing. The Committee on Suitability will hear the matter and make findings and recommendations to the Senate Executive Committee. Decisions of both committees will be made by majority vote.

(iii) The chair of the Committee on Suitability for the Practice of Medicine will conduct the formal hearing using the general procedural guidelines outlined below:

(a) The student will be informed in writing of the alleged deficiency to be considered, of the situation upon which the concern is based, and of the scheduled date of formal hearing (which shall be at least 10 days after the date of this written statement). The written statement will also include a copy of this process and any special rules and procedures to be followed in the hearing. The student may request a reasonable extension of the hearing if necessary to prepare his or her position.

(b) The student will be allowed to inspect his or her medical school education record to which he or she would be entitled under Stanford’s policy on the Privacy of Student Records, including material in such files concerning the alleged deficiency.

(c) No person who has first-hand information concerning this matter, who presents evidence at the hearing, or who otherwise is involved in this process may serve on the Committee on Suitability. A replacement, when necessary, will be appointed by the Senate Executive Committee.

(d) The student will be permitted to have a qualified advocate accompany him or her at the hearing, but that advocate may not participate directly in the hearing. The advocate must be a member of the Stanford University School of Medicine faculty; an attorney is not a qualified advocate. The student shall notify the chair of the Committee on Suitability at least five days prior to the hearing of the identity of any advocate.
(e) The student has a right to be present during the presentation of evidence supporting the alleged deficiency, to question any witness who presents evidence at the hearing, and to offer evidence or argument at the hearing to rebut that evidence. The student will be given a reasonable opportunity to present his or her version of the situation, and may present relevant evidence and witnesses on his or her behalf.

(f) The presentation of evidence and arguments will be recorded by a court reporter.

(g) Unless the student asks for an open hearing, the data and discussions of the hearing will be kept confidential, and no record will be placed in the student’s permanent file unless the charge of deficiency is substantiated.

(h) The findings and recommendations resulting from the formal hearing should be based upon the evidence presented at the hearing and on the contents of any pertinent Stanford University School of Medicine student records and files.

(iv) After the hearing, the Committee on Suitability for the Practice of Medicine will convey its findings and recommendations in writing to the Senate Executive Committee in a timely manner. The Senate Executive Committee will consider the findings and recommendations and issue a final decision in writing to the student in a timely manner. The Senate Executive Committee will also inform the CP3 chair and the Senior Associate Dean of Medical Education of the final decision.

(v) The student may appeal the decision of the Senate Executive Committee to the Dean of Stanford University School of Medicine as a formal written grievance under (and within the time limits of) the Stanford University Student Academic Grievance Procedure.

D. Procedures regarding technical standards concerns: If concerns arise as to a medical student’s continuing ability to fulfill the technical standards of Stanford University School of Medicine, the CP3 will appoint an ad hoc committee to review the matter and advise the CP3.
7.5 APPENDIX: CHART OF CP³ RESPONSES TO STUDENT ISSUES

Based on Stanford University School of Medicine academic policies, the following actions will or may be taken by the CP³ in the stated situations. The committee may, however, prescribe another course of action in its discretion, and depending upon the individual student circumstances.

**PRE-CLERKSHIP: MARGINAL PASS**

<table>
<thead>
<tr>
<th>Issue</th>
<th>Policy and/or Steps to Address Issue</th>
</tr>
</thead>
</table>
| One marginal pass in a course of eight or more units (e.g., HHD or POM) | - Students must correct the marginal pass within 12 months of receipt of the marginal pass and prior to beginning any clinical clerkship.  
- Students who receive a marginal pass in a course of eight or more units will be required to take the USMLE Step 1 examination prior to beginning any clinical clerkship.  
- NOTE: An unqualified pass is required to correct a marginal pass.                                                   |
| Two uncorrected marginal passes in courses fewer than eight units each | - No student having more than one marginal pass in courses of fewer than eight units may begin (defined as attend, enroll, or participate in) any clerkship.  
- If two uncorrected marginal performances accumulate, the student is required to correct at least one of them within 12 months of receipt of the second marginal pass and prior to beginning clinical clerkships.  
- NOTE: An unqualified pass is required to correct a marginal pass.                                                      |

**PRE-CLERKSHIP: FAILURE**

<table>
<thead>
<tr>
<th>Issue</th>
<th>Policy and/or Steps to Address Issue</th>
</tr>
</thead>
</table>
| One failure in a pre-clerkship course                           | - An unqualified pass is required to correct a failure in a pre-clerkship course.  
- This unqualified pass may be attained through remediation (as determined by the course director), or by retaking and passing the course when it is next offered.  
- If no remediation occurs prior to the next offering of the course, the student will be required to retake the course. |
**PRE-CLERKSHIP: FAILURE (CONTINUED)**

<table>
<thead>
<tr>
<th>Issue</th>
<th>Policy and/or Steps to Address Issue</th>
</tr>
</thead>
<tbody>
<tr>
<td>Failure of one required pre-clerkship course of eight units or more</td>
<td>• In addition to remediating a failure as noted above, students who fail a pre-clerkship course of eight units or more will be required to take and receive a passing score on the USMLE Step 1 examination before beginning any clerkship.</td>
</tr>
<tr>
<td>Failure of greater than 10% of pre-clerkship required units in any given academic year or over the course of the pre-clerkship curriculum</td>
<td>• Students will appear on the CP³ agenda for discussion and possible setting of a remedial curriculum.</td>
</tr>
<tr>
<td>Failure of greater than 20% of pre-clerkship required units in any given academic year or over the course of the pre-clerkship curriculum</td>
<td>• These students will be considered for dismissal from Stanford University School of Medicine MD program.</td>
</tr>
</tbody>
</table>

**PRE-CLERKSHIP: UNCORRECTED DEFICIENCY**

<table>
<thead>
<tr>
<th>Issue</th>
<th>Policy and/or Steps to Address Issue</th>
</tr>
</thead>
<tbody>
<tr>
<td>Uncorrected deficiency beyond the prescribed period of remediation time</td>
<td>• If a deficiency remains uncorrected for more than the prescribed period of time following its receipt, the student must appear before the CP³ and could be considered for dismissal.</td>
</tr>
<tr>
<td></td>
<td>• An administrative hold will be placed until the deficiency has been corrected.</td>
</tr>
<tr>
<td></td>
<td>• Students appearing on the agenda of the CP³ as a result of academic deficiency in one or more pre-clerkship courses will be required to take the USMLE Step 1 examination prior to beginning any clinical clerkship.</td>
</tr>
</tbody>
</table>
### Clerkships: Clerkship Scheduling

<table>
<thead>
<tr>
<th>Issue</th>
<th>Policy and/or Steps to Address Issue</th>
</tr>
</thead>
<tbody>
<tr>
<td>Failure to get written approval from his/her advisor to drop a clerkship during the four-week period prior to the commencement date of the clerkship</td>
<td>● This student’s professionalism issue will be reviewed and discussed by the CP³.</td>
</tr>
</tbody>
</table>

### Clerkships: N (Continuing) Grade

<table>
<thead>
<tr>
<th>Issue</th>
<th>Policy and/or Steps to Address Issue</th>
</tr>
</thead>
<tbody>
<tr>
<td>N (continuing) grade in any clerkship</td>
<td>● Students with an N grade in any clerkship are required to contact the clerkship director to set a timeline (within the parameters above) for retaking the final exam and achieving an unqualified passing grade.</td>
</tr>
<tr>
<td></td>
<td>● Students will appear on the CP³ agenda for discussion and possible setting of a remedial curriculum.</td>
</tr>
<tr>
<td></td>
<td>● Students with an N (continuing) grade in any clerkship must correct the N grade within 12 months of completing the clerkship. Students who receive an N grade within 12 months of graduation must correct the N grade by May 1st of the graduation year.</td>
</tr>
<tr>
<td></td>
<td>● Students cannot receive a Stanford MD degree with an uncorrected N (continuing) grade in any clerkship.</td>
</tr>
</tbody>
</table>

### Clerkships: Marginal Pass

<table>
<thead>
<tr>
<th>Issue</th>
<th>Policy and/or Steps to Address Issue</th>
</tr>
</thead>
<tbody>
<tr>
<td>One marginal pass in any clerkship</td>
<td>● Students with a marginal pass in any clerkship are required to meet with the clerkship director to set timely requirements for achieving an unqualified passing grade.</td>
</tr>
<tr>
<td></td>
<td>● Students will appear on the CP³ agenda for discussion and possible setting of a remedial curriculum.</td>
</tr>
<tr>
<td></td>
<td>● Students cannot receive a Stanford MD degree with an uncorrected marginal pass in a clerkship.</td>
</tr>
</tbody>
</table>
**Clerkships: Marginal Pass (continued)**

<table>
<thead>
<tr>
<th>Issue</th>
<th>Policy and/or Steps to Address Issue</th>
</tr>
</thead>
<tbody>
<tr>
<td>Two marginal passes in any clerkship.</td>
<td>• If a student receives marginal passes in any two clerkships, students will appear on the CP³ agenda for discussion and possible setting of a remedial curriculum.</td>
</tr>
<tr>
<td></td>
<td>• Students cannot receive a Stanford MD degree with an uncorrected marginal pass in a clerkship.</td>
</tr>
<tr>
<td>Three marginal passes in any clerkship.</td>
<td>• Three marginal passes in any combination of clerkships may be considered grounds for dismissal.</td>
</tr>
</tbody>
</table>

**Clerkships: Failure**

<table>
<thead>
<tr>
<th>Issue</th>
<th>Policy and/or Steps to Address Issue</th>
</tr>
</thead>
<tbody>
<tr>
<td>One failure in any clerkship</td>
<td>• If a student fails a required clerkship, remediation requirements will be set by the clerkship director.</td>
</tr>
<tr>
<td></td>
<td>• Students will appear on the CP³ agenda for discussion and possible setting of a remedial curriculum.</td>
</tr>
<tr>
<td></td>
<td>• Students cannot receive a Stanford MD degree with an uncorrected failure in a clerkship.</td>
</tr>
<tr>
<td>Two failures in any clerkships</td>
<td>• Two failures in any clerkships – either failing one clerkship twice or failing two different clerkships – ordinarily will be considered grounds for dismissal from Stanford University School of Medicine MD program.</td>
</tr>
</tbody>
</table>

**Clerkships: Uncorrected N, M+ or F**

<table>
<thead>
<tr>
<th>Issue</th>
<th>Policy and/or Steps to Address Issue</th>
</tr>
</thead>
<tbody>
<tr>
<td>Failure to correct a non-passing grade within one year of completing the clerkship</td>
<td>• A student who fails to correct a non-passing grade (e.g., continuing “N” grade, marginal pass, or failure) in a clerkship will be placed on the CP³ agenda and could be considered for dismissal.</td>
</tr>
<tr>
<td></td>
<td>• An administrative hold will be placed until the deficiency has been corrected.</td>
</tr>
</tbody>
</table>
**EXAMINATIONS: CPX**

<table>
<thead>
<tr>
<th>Issue</th>
<th>Policy and/or Steps to Address Issue</th>
</tr>
</thead>
<tbody>
<tr>
<td>Failure to participate in or demonstrate minimum competency in the Clinical Performance Examination (CPX)</td>
<td>• Students will meet with the Medical Director of the Standardized Patient program for debriefing, development of a remediation plan, and scheduling of a reassessment of clinical skills, to be completed prior to being certified for graduation, and appear on the CP³ agenda for discussion and possible setting of a remedial curriculum.</td>
</tr>
</tbody>
</table>

**EXAMINATIONS: USMLE Step 1**

<table>
<thead>
<tr>
<th>Issue</th>
<th>Policy and/or Steps to Address Issue</th>
</tr>
</thead>
<tbody>
<tr>
<td>An overall failure on Step 1 of the United States Medical Licensing Examinations (USMLE)</td>
<td>• Students receiving an overall failing grade on their first attempt at the Step 1 examination ordinarily will be withdrawn from clerkships at the end of the current clerkship period, and may not begin any further clerkship (except Pathology) until the Step 1 examination is retaken and satisfactorily passed.</td>
</tr>
<tr>
<td></td>
<td>• Students who receive an overall failure on their first attempt on the Step 1 examination but subsequently receive a satisfactory pass must take and satisfactorily pass the Step 2 CK examination no later than the first week of January prior to June of the expected graduation year.</td>
</tr>
<tr>
<td></td>
<td>• Failing the Step 1 examination twice may be considered grounds for dismissal from Stanford University School of Medicine MD program.</td>
</tr>
<tr>
<td></td>
<td>• Students who fail the Step 1 examination three times will be dismissed from Stanford University School of Medicine MD program.</td>
</tr>
</tbody>
</table>
# Examinations: USMLE Step 2

<table>
<thead>
<tr>
<th>Issue</th>
<th>Policy and/or Steps to Address Issue</th>
</tr>
</thead>
</table>
| An overall failure on Step 2 CK (Clinical Knowledge) of the United States Medical Licensing Examinations (USMLE) | ● Students who receive an overall failing grade on their first attempt at Step 2 CK (Clinical Knowledge) must retake and receive an overall pass no later than the first week of May of the expected graduation year.  
● If a student fails Step 2 CK in the quarter prior to expected graduation, he or she may have the option of taking, but must pass, an internal equivalency examination in order to graduate. |
| An overall failure on Step 2 CK (Clinical Knowledge) of the United States Medical Licensing Examinations (USMLE) (cont) | ● Students will not graduate and will be placed on administrative hold for a set period of time, after which they will be dismissed from Stanford University School of Medicine MD program if they:  
  ○ fail Step 2 CK (Clinical Knowledge) twice and fail the internal examination; or  
  ○ fail Step 2 CK (Clinical Knowledge) three times.                                                                 |
## Scholarly Concentration

<table>
<thead>

8. MEDICAL STUDENT SUPPORT SERVICES

8.1 Assistant Dean for Student Affairs
8.2 School of Medicine Registrar’s Office
8.3 School of Medicine Financial Aid Office
8.4 School of Medicine Office of Student Life
8.5 Academic Advising
8.6 Learning Specialist
8.7 Student Life Advising
8.8 Office of Medical Education
8.9 Educators-4-CARE (E4C)
8.10 Center of Excellence – Diversity in Medical Education
8.11 School of Medicine Career Center
8.12 School of Medicine Liaison to the Office of Accessible Education
8.13 School of Medicine Ombudsperson
8.14 Medical Center Chaplain
8.15 Security Services
8.1 ASSISTANT DEAN FOR STUDENT SERVICES

MSOB X309

The Assistant Dean for Student Services oversees the Office of Student Services (OSS). OSS includes the offices of:

- MD Admissions
- MD Academic Advising
- Financial Aid
- Student Life
- Registrar
- Learning Strategist

The Assistant Dean for Student Services is a resource for student services questions and special help, and is available to meet with students with a variety of concerns. As a School of Medicine liaison to the Office of Accessible Education (see Section 8.12), the Assistant Dean for Student Services also coordinates accommodations for students with documented disabilities.

Students with disabilities (including, but not limited to, temporary and permanent physical, psychological, or learning disabilities) who may need academic accommodations (including services and auxiliary aids), should register with the Office of Accessible Education (see Section 9.6) for assessment and approval of such accommodations. The School of Medicine Assistant Dean for Student Services coordinates with the Office of Accessible Education to facilitate accommodations. Students with documented disabilities are responsible for notifying the Assistant Dean of Student Services of their accommodation needs. Students should not request accommodations directly from faculty members or clerkship directors.

8.2 SCHOOL OF MEDICINE REGISTRAR’S OFFICE

MSOB X325

The School of Medicine Registrar’s Office serves the educational community of the Stanford University School of Medicine by maintaining the official records of each student and providing appropriate data to further the educational processes of the school. The office also coordinates the Visiting Student program that allows students from other medical schools to participate in clinical electives. The School of Medicine Registrar’s Office works closely with the University Registrar’s Office.

Among the services provided:

**ENROLLMENT SERVICES**

- Monitor student study lists
- Assist students with dropping and adding courses
- Handle graduate authorization petitions to add a program
- Process and track leaves of absence
• Track satisfactory academic progress

• Monitor tuition status

ACADEMIC RECORDS

• Create and maintain official student academic records

• Maintain student records with the American Association of Medical Colleges

• Respond to agency licensing requests

• Respond to medical education verification requests

• Respond to student verification of standing requests (e.g., student rates for conferences, student insurance rates, jury duty)

CLERKSHIPS

• Organize and run Clerkship Draw and weekly Shuffles

• Create informational materials on clerkship choices

• Conduct forums on clerkship and the clerkship process

• Assist students with entering clerkship choices

• Handle visiting clinical students

• Handle away clerkship paperwork

RESIDENCY MATCH

• Assist with producing the Medical Student Performance Evaluation (MSPE)

• Assist students with rank-order listing (strategizing and entering list online)

• Compile statistics for the Match

• Assist unmatched students with the Scramble for open programs

EXAMINATIONS

• Process student applications for the United States Medical Licensing Exam (Step 1, Step 2 CK, Step 2 CS)

• Serve as the National Board of Medical Examiners Chief Executive Proctor
8.3 SCHOOL OF MEDICINE FINANCIAL AID OFFICE

MSOB X383, X385, X387

The School of Medicine Financial Aid Office (FAO) is the central point of contact for MD students in the School of Medicine for assistance and questions about financial aid. The FAO strives to ensure that financial support is processed in a timely manner and that students are informed about the various sources of aid, timing of the disbursements, and anticipated refunds outlined in their awards. The FAO coordinates financial planning seminars, open to all students whether or not they are receiving need-based aid, and maintains Web-based information on financial resources and possible funding opportunities can be viewed at

8.4 SCHOOL OF MEDICINE OFFICE OF STUDENT LIFE

MSOB X323

The Office of Student Life provides services to all MD and PhD students in the School of Medicine. In general, the office is a clearinghouse for a variety of issues affecting both MD and PhD students, working with other university departments to help resolve issues ranging from housing to health insurance. The Office of Student Life serves as a liaison between the administration and students through its relationship with the student organizations – Stanford Medical Students’ Association (SMSA) and Biomedically Affiliated Stanford Students (BioMASS) – and through working with the student special interest organizations (approximately 40 in number). The support ranges from simple funding of meetings to helping plan major conferences. The office also serves as the conduit for information flow between sources internal and external to the university and students through the School of Medicine listserves, and through the daily electronic events calendar.

Events, large and small, for students in the School of Medicine are planned through the Office of Student Life, beginning with the Orientation program for entering students and culminating with the School of Medicine Commencement program when they graduate.

Medical Student compliance with Health and Safety Training Requirements (HIPAA, Bloodborne Pathogen, and General Lab Safety) is coordinated and tracked through the Office of Student Life, as are all required immunizations.

LOGISTICAL SERVICES PROVIDED

- White coats
- Hospital photo ID’s
- Stethoscopes
- Lockers
- Mailboxes
- FIT testing
- Copy codes
- SUNet IDs
- Assistance with housing issues
- Assistance with the Entrance Medical Requirements
- Assistance with Health and Safety Training requirements
- Assigning computer access to Stanford and Packard Hospitals
- Coordinating Call Room policy

PROGRAMS

- New MD Student Orientation
- Stethoscope Ceremony
- Match Day Breakfast
- Student Clinician Ceremony
- Ad hoc social events
- Commencement ceremony and luncheon

PUBLICATIONS

- *Full Code* (student-to-student guide to the clinical years)
- *Students in the MD Program* (student facebook)
- *Medipedia* (in conjunction with MD student editors)
- *H & P*, the medical student clinical journal (in conjunction with MD student editors and faculty advisors)

8.5 ACADEMIC ADVISING

Neil Gesundheit, MD, MPH  
*Associate Dean, Medical Student Advising*  
(650) 724-5454  
neil7@stanford.edu

MSOB X3C09

The advising system assigns each incoming student to an Academic Advising Dean in the School of Medicine. Incoming students are notified to whom they have been assigned and have the opportunity to meet with him/her as a group during orientation. Students may request from their advisor a consultation with any of the Advising Deans.

The Academic Advising Deans have primary responsibility for overall academic advising. They will get to know each student, assist in orienting new students, meet regularly with students individually, and help them throughout their MD training. The Advising Deans assist students in the following ways:

- Assist in orienting new students
- Meet regularly with students individually and track their progress throughout their MD training
  - Get to know each student
- Provide advice regarding courses, clerkships, and research activities
- Provide assistance as needed for individual students

- Facilitate small group discussion sessions with advisees
- Provide career counseling
- Refer students to community and faculty mentors
- Organize meetings with program directors
- Prepare MSPE (Dean's Letter) for graduating students

Career advising is provided by the Advising Deans. In addition, one member of each clinical department serves as the consultant for questions about careers in that specialty. The Internet also provides a wealth of information about careers and residency programs. For example, the Fellowship and Residency Interactive Database (FREIDA) Online provides information on approximately 7,800 accredited graduate medical education programs as well as over 200 combined specialty programs.

Detailed information about Academic Advising and student resources is available on the MD Advising Web site at

http://med.stanford.edu/md/advising/

### 8.6 LEARNING SPECIALIST

Sue Willows  
*Learning Specialist*  
Room S009, Stanford Medical Center  
(650) 387-0550  
willows@stanford.edu

1215 Welch Road, Modular B #23

The Learning Specialist provides support for medical students in the learning process, including cognitive assessments, diagnoses, and study strategies. Through individual assessments and/or workshops students become more aware of the learning process and are better able to use their own natural styles and preferences for learning. Referrals for individual meetings are through Advising Deans, professors, peers, or self-referrals. All meetings are confidential.

The Learning Specialist provides screening for possible learning disabilities and/or attention deficits. For students with disability documentation, the LS can provide and coordinate direct services and accommodations. Confidentiality is maintained.

Workshops and individual meetings may include but are not limited to:

- Metacognition – know how you learn
• Learning styles
• Establishing a study plan
• Organizing for a specific class
• Managing time at medical school
• Test-taking strategies and analyzing a test
• Memory strategies to decrease study time and enhance retention
• Changing a behavior via cognitive coaching
• Software and medical Web sites
• How to study in a pair or group
• When to use tutoring
• Active reading and better comprehension
• Prereading and visual organizers
• Creating a Step 1 study strategy calendar
• Information and community referrals pertaining to dyslexia, learning disabilities, attention deficits, and psychological disorders

8.7 STUDENT LIFE ADVISING

Dr. Rebecca Smith-Coggins
Associate Dean, Medical Student Life Advising
(650) 725-5066
Pager: 1-3481
smithcog@stanford.edu
Boswell Building A045

The Associate Dean for Medical Student Life Advising provides a resource for the medical student body that is confidential (within the limits provided by the law). This unique position is one of the first of its kind among medical schools through the nation. Dr. Rebecca Smith-Coggins has held this position since 2006, and is a point of contact for students who wish to discuss sensitive or personal topics or to obtain advice of a non-academic nature without concern about affecting their academic “reputation.” Students are encouraged to bring issues that impact their life decisions, well-being, and academic performance. Issues appropriate for Dr. Smith-Coggins include the following: interpersonal conflicts or misunderstandings;
struggles with the stresses of school, family or social life; uncertain career direction; questions regarding professionalism; and discussions about the possible need of REFERRAL for:

- Medical care
- Psychological therapy
- Drug/alcohol dependency treatment
- Tutoring
- Study skills improvement
- Harassment concerns
- Financial problems
- Legal advice

The Associate Dean for Medical Student Life Advising is available to represent and advocate for medical students, as appropriate, with regard to matters that affect student well-being.

The Associate Dean for Medical Student Life Advising works directly with the Academic Advising Deans in developing the Advising Program, is involved in programmatic development pertaining to student work-life balance, and has worked with student to develop the Transition to Clerkship Retreat, Peer to Peer Mentoring sessions, and other programs.

To book an appointment with Dr. Smith-Coggins, please send her an email at smithcog@stanford.edu.

If there is urgency to a student’s need, please call (650) 723-6661 and identify yourself as a medical student; the page operator will call Dr. Smith-Coggins’ cell phone.

For more information, please visit the Medical Student Life Advising Web site at

http://med.stanford.edu/md/student-development/

8.8 OFFICE OF MEDICAL EDUCATION

MSOB X333

The Office of Medical Education (OME) provides management and oversight of the medical school curriculum, including courses, clerkships, medical student scholarship, assessment, and evaluation. The Associate Dean for Medical Education directs OME and provides leadership for its programs, including:

- Educators-4-CARE
- Human Health and Disease (HHD)
- Practice of Medicine (POM)
The Associate Dean for Medical Education also chairs the Committee on Curriculum and Academic Policy (CCAP), a standing committee of the Faculty Senate. CCAP develops or recommends policies concerning the curriculum for the MD degree program, including structure of the curriculum and requirements for graduation, design and evaluation of courses and clerkships, adherence to LCME guidelines, and evaluation of program effectiveness. In addition, CCAP oversees the assessment of medical student academic performance in required courses, clerkships, and scholarly concentrations. CCAP sets academic policies, and reviews and approves requests for new required courses and clerkships (core and selective). Requests for elective courses and clerkships are reviewed and approved by the Chair of CCAP.

The Assistant Dean for Medical Education provides administrative leadership for all of the programs as listed above. In addition, the Assistant Dean works collaboratively with the Associate Dean for Medical Education, CCAP, and other key faculty on ongoing curriculum development and implementation.

8.9 DIVISION OF EVALUATION
The Division of Evaluation is housed in the Office of Medical Education and is charged with evaluating the required medical school curriculum at the clerkship and pre-clerkship level. Data of many types is collected by the division and used in order to assess how effectively the curriculum is being delivered, to identify aspects of the curriculum that can be strengthened, and to provide data to inform curricular planning and decision-making. Examples of the types of data collected and monitored include: course and clerkship evaluations, performance and exam data, qualitative comments from focus groups, alumni performance in residency programs, observations of classrooms, and uses of technology. In addition, School of Medicine faculty and staff may use evaluation data to conduct educational research for wider dissemination in medical education. Permission to conduct ongoing research related to evaluation of the Medical School curriculum is provided by the Institutional Review Board (IRB) through the Stanford University Research Compliance Office. All students are provided with an informational document which details this approved research (see Section 11.1). Students must participate in all School of Medicine assessment activities, but may “opt out” of having their data used for research purposes.

Division staff members ensure that monitoring and evaluation of the curriculum aligns with national accreditation standards set forth by the Liaison Committee For Medical Education (LCME). The Division also monitors, evaluates, and reports on new curricular initiatives and their impact on student learning and performance, including the Criterion Based Evaluation Initiative (CBEI) and Educators 4 Care (E4C). The Evaluation Director serves as the chair of the Clerkship Evaluation Committee (CEC), which is charged with reviewing appeals of student performance evaluations in clerkships. The Division also advises and supports faculty, staff and students who are engaged in medical education research.

8.10 EDUCATORS FOR C.A.R.E.(E4C)

The Educators for C.A.R.E. (E4C) Program was established in 2008 to enhance the development of medical students as skilled and compassionate physicians. E4C provides a formal curriculum aimed to foster the
development of some of our core values – Compassion, Advocacy, Responsibility, and Empathy – from the beginning and throughout medical school.

Each incoming medical student is matched with an E4C faculty, who will serve as a teacher, mentor, and colleague for the duration of the student’s time at the School of Medicine. Each E4C faculty teaches and guides five or six students per class year in the following ways:

- During the pre-clerkship years, precepts students once per week in the *Practice of Medicine (POM)* course, cultivating students’ acquisition and refinement of patient communication skills, physical diagnosis, clinical reasoning, and professionalism

- During the clerkship years, continues to provide guidance for students’ bedside clinical skills and professionalism through semi-monthly Doctoring with CARE sessions as part of the INDE 297 curriculum

- Provides mentoring and regular feedback throughout medical students’ tenure at Stanford University

- Works with other School of Medicine faculty, staff, and programs to ensure that all medical students’ graduate with mastery of core clinical skills

- Writes letters of recommendation as requested

- Collaborates with other E4C faculty, POM course directors, and Advising Deans to assist in students’ academic and professional development

- Participates in student milestone events and celebratory gatherings

More information about E4C, including faculty biosketches and program contacts, is available on the E4C Web site at

[http://med.stanford.edu/e4c/](http://med.stanford.edu/e4c/)

### 8.11 CENTER OF EXCELLENCE IN DIVERSITY IN MEDICAL EDUCATION

MSOB X361

The Center of Excellence in Diversity in Medical Education (COE) was established in 1993 with the assistance of a grant sponsored by the Health Resources and Services Administration. The goal of the COE is to prepare the next generation of medical leaders to address the issues of health disparities. The primary initiatives to address this goal include:

- Expanding the diversity of the health professional work force, especially in academic medicine

- Promoting cultural competence in medical education for all trainees

- Supporting scholarly projects in the area of health disparities
- Developing leadership skills in students from diverse backgrounds
- Working with faculty from throughout Stanford University to eliminate health disparities
- Enhancing the participation of alumni in the diversity activities of the School of Medicine

For more information on the Center and its activities, please visit the COE Web site at

http://coe.stanford.edu

8.12 SCHOOL OF MEDICINE CAREER CENTER (SOMCC)

Grant Building S005

The SoMCC is a comprehensive medical and life science career center, delivering educational curricula, providing one-on-one consultations, coordinating recruitment activities, and supporting the professional development of all School of Medicine trainees, alumni, and postdoctoral researchers in the biomedical sciences across the University. The SoMCC also serves as an on-campus portal for external organizations seeking to develop relationships with our research and clinical training community, providing a variety of ways to engage with and access the talents and technologies developed here at Stanford.

For more information about the SoM Career Center and its services, please visit online:

http://med.stanford.edu/careercenter/

8.13 STANFORD UNIVERSITY OMBUDSPERSON

David Rasch
University Ombuds
650-723-3682
rasch@stanford.edu

Ombuds Office
Mariposa House, Rm 210
585 Capistrano Way
Stanford, CA 94305-8200

The services of the Ombuds Office are available to all faculty, students, and staff. The Ombuds seeks fair and just resolutions of disputes and complaints through confidential, neutral and informal processes. The Ombuds sits apart from the usual administrative and decision making structures of the university and is authorized to talk to all persons at the university in order to resolve problems. The Ombuds can gather information, research relevant policies, coach and advise, offer options, refer to useful resources within the community, make inquiries, mediate and facilitate conversations. The Web site describing the Ombuds Office's services for faculty, staff and students is:

http://www.stanford.edu/dept/ombuds

The Ombuds is also available to speak to faculty, student and staff groups about the Ombuds Office's services or to speak on topics related to conflict resolution and communication.
8.14 MEDICAL CENTER CHAPLAIN

SUMC Ground/Basement Floor, HG004
(650) 723-5101

An on-call chaplain (pager 1-5683) is available 24 hours a day to provide personal counseling for medical students and spiritual support for patients and their families. Chaplains are responsible for Decedent Care at the time of any patient’s death and will help with support for the family of a patient who has died. The Chaplain’s office is located in the Stanford Hospital on the ground floor of the G wing. Office hours are Monday-Friday, 8:30 a.m. to 5:00 p.m.

8.15 SECURITY SERVICES

SUMC Ground/Basement Floor
(650) 723-7222

Stanford University Medical Center’s Security Services Department provides both walking and mobile escorts, vehicle jump-starts, facility door unlocks, photo identification access badges and key control. In addition they investigate thefts and crimes against persons, perform patient restraints, de-escalate violent situations, and coordinate Medical Center interaction with local police departments. Security Services also presents seminars on personal safety and Medical Center parking.

Security Services is staffed 24 hours a day, seven days a week, and is located on the ground floor of Stanford Hospital, just below the Emergency Department. Security Services is identified as location 2 on the SUMC floor map of the ground/basement floor:

http://stanfordhospital.org/directions/SHC_g.html
9. OTHER UNIVERSITY SERVICES

9.1 Department of Public Safety

9.2 Parking and Transportation

9.3 Housing

9.4 Student Health Services
   - Vaden Health Center
   - Health Insurance Information for Incoming Students
   - Entrance Medical Requirements
   - Annual Medical Requirements

9.5 Personal Support Services
   - Counseling and Psychological Services (CAPS)
   - Wellness and Health Promotion Services (HPS)
   - University Ombudsperson
   - The Bridge Peer Counseling Center

9.6 Disabilities: Office of Accessible Education
   - Schwab Learning Center
   - Assistive Learning Technology Center
   - Center for Universal Design in Education
9.1 DEPARTMENT OF PUBLIC SAFETY

711 Serra Street  
(650) 723-9633  
http://police.stanford.edu

Report suspicious activity or person immediately: call 9-911 from a campus phone, or call 911 or (650) 329-2413 from a cell phone.

9.2 PARKING AND TRANSPORTATION

340 Bonair Siding  
(650) 723-9362  
transportation@stanford.edu  
http://transportation.stanford.edu

Parking and Transportation Services is the one-stop shop for transportation in and around Stanford. If you drive onto campus, we help you find the best place to park, and sell you a parking permit that meets your needs and budget. If you use alternative transportation to commute to campus, we can assist you in planning your commute by public transportation, finding rideshare partners, taking advantage of incentive programs, using the real-time Marguerite bus schedule, or by getting you information on the best bike routes in the area.

The main office is located at 340 Bonair Siding on the main Stanford campus; hours are Monday-Friday, 7:30 a.m. to 5:00 p.m.

9.3 HOUSING

ON-CAMPUS HOUSING

http://studenthousing.stanford.edu

Over half of Stanford’s graduate students enrolled at the home campus live in on- and off-campus University housing. The residence program is based on the conviction that living and learning, social and intellectual life should be integrated, not separate. Graduate residences serve as focal points of intellectual, recreational, and social interchange.

Single graduate student accommodations consist mostly of shared one-to-four bedroom apartments. We also offer single occupancy studio apartments. All on-campus, single student housing is furnished. The costs vary greatly and are shown on the Student Housing Web site:

http://studenthousing.stanford.edu
Rates include all utilities and coin-less laundry services. There is a separate charge for the telecommunications fee and house dues.

Couples without children: housing is available to students who are married and to students who have a same-sex or opposite-sex domestic partner who will be occupying the apartment with them at least 50% of each week. At Stanford University, a domestic partnership is defined as an established, long-term partnership with an exclusive mutual commitment in which the partners share the necessities of life and ongoing responsibility for their common welfare. Couples are offered one-bedroom apartments in Escondido Village, either furnished or unfurnished, or studios or one-bedroom units in the Munger Graduate Residence, all of which are furnished. Couples who are both enrolled, matriculated, Stanford students may also apply for a limited number of one-bedroom units with dens or two-bedroom apartments in Escondido Village.

Students with children are housed in two or three-bedroom apartments in Escondido Village, depending on the number of children in occupancy. The child(ren) must live with the parent for a minimum of 50% time each week. Students with one or two children are eligible for a two-bedroom apartment. Eligibility for a three-bedroom apartment requires two or three children. Single parents with one child may choose to live in a one-bedroom apartment. These apartments are available either furnished or unfurnished.

Rents for these units are also shown on the above Web page.

First-year Housing: Housing assignments for new students are made through a quarterly, computerized lottery process. New, matriculated, graduate students (those enrolled in Stanford degree programs, including the MD program) are guaranteed housing if they apply by the first-round application deadline for autumn term and are willing to live in any residence for which they are eligible.

After the first year: Continuing, matriculated, graduate students are given priority for housing (but not guaranteed housing) for six years. The number of assignment priority years does not automatically increase cumulatively per degree. Students who live in residences that are open year-round and who remain in continuous occupancy in their rooms or apartments may renew their contracts annually if they meet certain eligibility requirements. Students who live in residences that are open only during the academic year or who desire to change residences re-enter the lottery each year. Since new students have priority in the Lottery, not all continuing student applicants are assigned housing each year. Students who have limited housing choices may not be assigned housing because space in each individual residence is limited. Web pages describing housing on campus in more detail and explaining application procedures and housing policies are updated on the Student Housing website by April for the following academic year.

Students indicate housing preferences by submitting an application in Axess, Stanford’s online information system:

https://axess.stanford.edu

A SUNet ID is required to login to Axess—for more information, please see

http://sunetid.stanford.edu

Housing applications for the following academic year are accepted beginning in mid-April each year—additional information on deadlines and procedures is available on the Student Housing website. After
taking occupancy of an assigned space, students are responsible for the room rent for the entire academic year. For additional information, visit the Student Housing website.

Off-Campus Housing

http://offcampus.stanford.edu

Many students live off campus. Complete and up-to-date information on obtaining suitable housing can be found at the Community Housing office. Community Housing maintains a rental listings database for the Stanford area, available to current Stanford affiliates.

The School of Medicine Office of Student Life will provide additional assistance as appropriate to students having difficulties finding housing.

9.4 STUDENT HEALTH SERVICES

VADEN HEALTH CENTER

866 Campus Drive, across from Wilbur Field
(650) 498-2336
http://vaden.stanford.edu

Vaden Health Center provides comprehensive, on-site health care on an appointment basis to Stanford students currently enrolled in the university. A wide variety of services are available, including medical care, confidential personal counseling, general health and nutrition education, HIV prevention, and alcohol and other drug abuse prevention. Specific service areas include medical appointments, Pharmacy, Physical Therapy, Travel Clinic (fees apply), specialty care—sports medicine, dermatology, eating disorders (by referral), Counseling and Psychological Services (CAPS), Sexual Health Peer Resource Center and Health Promotion Services.

REGULAR HOURS FOR AUTUMN, WINTER, AND SPRING QUARTERS
(see the Vaden Web site for hours during summer quarter, holidays, and breaks)

- Medical Services
  Monday through Thursday
  Telephone hours: 8:00 a.m. to 5:00 p.m.
  Appointments available: 8:15 a.m. to 7:30 p.m.

  Friday
  Telephone hours: 8:00 a.m. to 5:00 p.m.
  Appointments available: 9:15 a.m. to 4:30 p.m.

  Saturday and Sunday (for urgent problems only)
  Appointments available: 11:15 a.m. to 2:40 p.m.

- Counseling and Psychological Services (CAPS)
  Monday through Friday
  8:30 a.m. to 5:00 p.m.
  Limited evening hours (to be determined)

- Health Promotion Services (HPS)
  Monday through Friday
  9:00 a.m. to 5:00 p.m.
AFTER HOURS

Services are available to help in urgent situations when Vaden is closed.

- **Medical Services**
  Medical advice is available for urgent conditions that cannot wait until the clinic opens. Call (650) 498-2336, extension 1, and our answering service will page the on-call physician.

- **Counseling and Psychological Services**
  For crisis counseling for urgent situations, call (650) 723-3785.

- **YWCA Sexual Assault Center** at Stanford Hospitals and Clinics
  The center assists students, staff, faculty, and other campus affiliates who are victims of sexual assault. The center can be reached via a dedicated 24 hour telephone line (650) 725-9955.

ONLINE SERVICES

VadenPatient is the secure online service that allows users to:

- make medical appointments
- make appointments for allergy shots (excluding first appointment)
- make Travel Clinic appointments
- make women’s health exam health appointments
- cancel medical appointments
- communicate with your clinician
- complete entrance medical requirements for new students

To access VadenPatient you will need your SUNet ID.

Please use our online services ([http://vaden.stanford.edu/online/index.html](http://vaden.stanford.edu/online/index.html)) or call ahead to make an appointment with either a physician, nurse practitioner, or physician assistant. If you are in need of urgent
care during the day and if immediate attention is needed, call 650-498-2336 and ask to speak to an advice nurse, or come to Vaden and ask to see the triage nurse, who will refer you to the appropriate provider.

**MEDICAL EMERGENCIES**

If there is a medical or psychiatric emergency that does not require hospital emergency room facilities and staff, students should go to Vaden. If a medical emergency requires treatment in a hospital emergency department, students should go to the Stanford Hospital and Clinics Emergency Department.

**SERVICES COVERED**

Health services covered by the Vaden Health Center include routine visits to physicians, nurse practitioners, and physician assistants; necessary examinations, treatments and dressings; most laboratory and X-ray tests and noninvasive procedures.

In order to avoid unnecessary expenses, students are urged to consult first with the Vaden Health Center before consulting with other faculty and clinics for medical care (except for emergencies).

**SERVICES NOT COVERED**

Please also refer to the insurance section, for many services not covered by Vaden may be covered by one’s own health insurance policy.

Health Services not covered by the Vaden Health Center include in-hospital care (hospitalization, hospital emergency, or operating room care for an accident or injury); transportation by ambulance; outpatient surgical and fracture care; specialty consultation and related ancillary services; dental care, examination or X-rays; eyeglasses, contact lenses or examinations (eye disease and injury are covered); speech therapy; maternity care or complications of pregnancy; cosmetic surgery; special nursing service; extended psychiatric care; physical examination, chest X-rays and immunizations that are required for entrance to the University; radiation and laser therapy; surgery for sterilization or fertility studies; and conditions for which the student may desire treatment but that in the opinion of Vaden Health Center is not essential for the student’s welfare.

**OTHER FEE-FOR-SERVICES AVAILABLE**

Vaden, at a charge, can provide physical examinations for employment and scholarships, etc.; spouse/domestic partner care; physical therapy; allergy injections; travel immunizations; and immunizations required for the Entrance Medical Record (EMR).

**PHARMACY**

Vaden’s pharmacy provides prescription and over-the-counter medications. The costs are competitive with or lower than charges at neighboring pharmacies. You may also order pharmacy refills using online services.

**PREGNANCY CARE**

The following pregnancy care is available:

1. pregnancy tests: no charge at Vaden for students; a fee for spouses,
2. termination of pregnancy: by referral, and covered by the Stanford-sponsored health insurance (Cardinal Care) policy; or check for the benefit under one’s own insurance plan, and

3. prenatal care and normal delivery by referral.

**HEALTH INSURANCE INFORMATION FOR INCOMING STUDENTS**

- **Cardinal Care**

  While most services at Vaden are available to Stanford students without additional charge for students who have paid the Campus Health Service Fee, all students are required to have health insurance, either with Cardinal Care, the University-designated insurance policy paid with Stanford registration fees, or from an external carrier.

  If a student decides to use Cardinal Care, the fees will appear on his/her University bill. This Cardinal Care student health insurance provides year-round coverage for medical expenses for injuries and illnesses. The current fee schedule can be found on the Vaden Web site:

  Cardinal Care is an annual enrollment plan with coverage for all 4 quarters. For most students, the annual cost is billed over the 3 quarters of the academic year (Autumn, Winter, and Spring) for four quarters of coverage (summer is prepaid).

- **Outside Insurance**

  At the start of each academic year, domestic students will be automatically enrolled in Cardinal Care in their first registered quarter. At that time, and that time only, they will be able to waive Cardinal Care for the rest of the year by documenting equivalent health insurance in Axess by the **deadline**. The decision made at the start of each academic year will be applied to the remainder of that year.

  To assure that international students have sufficient health insurance coverage during their academic career at Stanford, the university will require, beginning September 2010, that all international students enroll in Cardinal Care, the University-sponsored student health insurance plan. International students may request an exception on an annual basis to the mandatory Cardinal Care insurance by having their insurance company complete an **Insurance Coverage Certification Form**. The insurance policy must cover the entire academic period of September 1 – August 31 with benefits that meet or exceed the minimum standards that can be found on the web at [http://vaden.stanford.edu/insurance/2010_cardinalcare.html#intlexception](http://vaden.stanford.edu/insurance/2010_cardinalcare.html#intlexception)

  To waive out of Cardinal Care a student must enter Axess and follow the health insurance waiver link and complete the steps indicated. A health plan name and group or policy number are required to complete the health insurance waiver. A student can waive health insurance for the entire academic year or for a quarter at a time.

- **Spousal Insurance**
Stanford University sponsors a cost-effective health insurance plan for students’ spouses, domestic partners and children. This optional dependent insurance plan is available for purchase by any Stanford student who is enrolled in Cardinal Care, Stanford’s student health insurance plan. For more details and the application form, please go to http://vaden.stanford.edu/insurance/2010_dependent.html#top

Medical services for spouses and domestic partners are available at Vaden on a fee-for-service basis, and charges typically are lower than at other clinics. Medical care for spouses is also available in the community or at the Stanford University Clinic, on a fee-for-service basis.

- **Disability Insurance**
  
  Disability Insurance is required of all MD students and costs $61 per year (billed through registration in Winter Quarter).

- **Malpractice Insurance**
  
  Malpractice Insurance is provided by the University for all MD students and covers them year round as long as they are enrolled (registration during the summer is not required as long as they are enrolled, matriculated students).

Dental care is not available on campus. Vital Savings is a voluntary, low-cost discount plan that provides coverage with preferred dentists. The plan offers discounted rates with no claims to file. You can sign up for Vital Savings through your Axess account.

For more information, call the Vaden Insurance Office at (650) 723-2135.

**ENTRANCE MEDICAL REQUIREMENTS**

Before you can begin your studies at Stanford you must complete certain health-related forms, immunizations, and tests. Failure to complete these requirements will result in a hold being placed on your Winter Quarter registration. For complete information, forms, and instructions see the Vaden Health Center Web site at:

http://vaden.stanford.edu

- **Immunizations:** All entering medical students must have had the following immunizations or provide proof of immunity: measles, mumps, rubella (MMR), or individual measles, mumps, and rubella; tetanus, diphtheria, pertussis (Tdap); hepatitis B; varicella (chicken pox); and polio. The hepatitis B vaccination series may be completed after arrival at Stanford within the first academic year.

- **Health History:** A health history is required of all students, regardless of their insurance or their intentions to utilize the services at Vaden Health Center. The information in your file is electronically secure and completely confidential. It cannot be released without your consent, except as required by law.

- **Tuberculosis Screening:** Tuberculosis testing (PPD or Quantiferon blood test) is required of all incoming medical students and annually thereafter. Tuberculosis screening is available at Vaden Health Center for a fee.
All entrance medical requirements are at the student’s expense. The one exception is that the Medical School will pay for completion of the hepatitis B and/or varicella series for students who started the series before matriculation.

**ANNUAL MEDICAL REQUIREMENTS**

The following are required for continuing medical students annually (see Section 2.3 of this Handbook):

- Tuberculosis testing (PPD or Quantiferon). Tuberculosis testing is available at Vaden Health Center. The expense is covered by the Medical School.

- Influenza immunization (given annually in the Stanford Hospital and at Vaden Health Center at no cost to medical students).

**9.5 PERSONAL SUPPORT SERVICES**

The School of Medicine Director of Student Life, Student Life staff, and the Student Life Advisor are always available to discuss personal concerns of students, and to recommend further counseling with the Advising Deans and/or one of the organizations or services below.

**COUNSELING AND PSYCHOLOGICAL SERVICES (CAPS)**

CAPS, located on the second floor of Vaden Health Center, offers, without charge, evaluations and brief counseling to any registered Stanford student who has paid the health fee, regardless of what insurance they have. Short-term counseling is defined as evaluation and treatment up to 10 visits a year. For couples counseling, only one person needs to be a registered student. Only students requesting or requiring longer, ongoing, psychotherapy incur fees. An initial assessment to determine whether medication is appropriate is free of charge; medication management is charged on a co-pay or fee for service basis.

Assistance is available for students experiencing personal problems or difficult situations while at Stanford, including stress, anxiety, depression, relationship distress, low self esteem, procrastination, sexual concerns, sexual assault/harassment, or family problems. Emergency response is available 24/7. Workshops and groups to support student adjustment at Stanford and to help with personal and social difficulties that interfere with academic and social functioning are also offered. African American, Asian American, Chicano/Latino, and gay counselors are available upon request. Services are confidential. The School of Medicine is not informed about students using CAPS without the student’s explicit permission.

If longer-term treatment is indicated it may be available through CAPS under certain circumstances or through community providers. The School of Medicine Financial Aid Office can assist students by helping to arrange for a special loan to meet the financial need for such treatment.

Students can be seen on an urgent basis the same day. A clinician is on-call 24 hours a day for emergencies and can be reached by calling (650) 723-3785; or, for sexual harassment and sexual assault counseling, (650) 725-9955.
**Wellness and Health Promotion Services (HPS)**

HPS helps students to make informed, healthy decisions about their lifestyle and behavior through education and support. Areas of expertise include alcohol, tobacco, and other drug use; nutrition, weight management, body image and eating disorders, sexual assault and harassment; sexual health, relationships, intimacy, and gender issues.

Services include individual preventive counseling and resource referral, speakers, programs, events and workshops at student residences, community centers, student organizations, and for new students. HPS also trains student volunteers and sponsors a variety of health outreach projects and events. Most services are free. Please call (650) 723-0821 for further information.

**University Ombudsperson**

David Rasch, Stanford University Ombuds
Mariposa House, 585 Capistrano Way, Room 210
(650) 723-3682
rasch@stanford.edu
http://www.stanford.edu/dept/ombuds/

The charge to the Ombuds office at Stanford is:

“The Ombudsperson’s task is to protect the interests and rights of members of the Stanford community from injustices or abuses of discretion, from gross inefficiency, from unnecessary delay and complication in the administration of University rules and regulations, and from inconsistency, unfairness, unresponsiveness, and prejudice in the individual’s experience with University activities. The Ombudsperson’s office exists to receive, examine, and channel the complaints and grievances of members of the Stanford community, and to secure expeditious and impartial redress.”

Any troublesome matter in the University community may be discussed in confidence with the University Ombuds. Services of the office are available to students, staff, and faculty. Although possessing no decision making authority, the Ombuds has wide powers of inquiry. The Ombuds can refer matters to the proper person or office expeditiously and also provides conflict resolution services.

**The Bridge Peer Counseling Center**

581 Capistrano Way
(650) 723-3392 (24 hours a day)
http://www.stanford.edu/group/bridge/

The Bridge is a group of trained student counselors providing free, confidential, 24-hour peer counseling services to Stanford and the neighboring community. As peer counselors, they are there to listen, to explore feelings or just to talk. Their goal is to help you to develop your own solutions to problems or uncertainties that you may be dealing with. All services are free and confidential. During the academic year, The Bridge takes calls 24 hours a day by phone, and is open for drop-in visitors from 9 a.m. to 12 a.m. midnight. The schedule may vary when classes are not in session.
9.6 DISABILITIES: OFFICE OF ACCESSIBLE EDUCATION (OAE)

The Office of Accessible Education (OAE) is the campus office designated to work with Stanford students with disabilities, at both the undergraduate and graduate levels (including the professional schools).

The OAE provides a wide array of support services, accommodations, and programs to remove barriers to full participation in the life of the university.

Working collaboratively, the student and OAE staff members develop and implement an accommodation plan tailored to the student’s disability-related needs.

Accommodations include, but are not limited to:

- Notetaking
- Oral or sign language interpretation
- Stenocaptioning
- Examination accommodations
- Modifications in course load
- Braille embossing
- Electronic text (e-text)
- Housing accommodations

For more information, visit our website: [http://studentaffairs.stanford.edu/oae](http://studentaffairs.stanford.edu/oae).

Students with disabilities for which they may need accommodations should call and register with the OAE as soon as possible by phoning the main office at (650) 723-1066. Medical students should also contact either the School of Medicine Medical Student Life Advisor or the Assistant Dean for Student Services, with whom the OAE works closely to facilitate accommodations. The Medical Student Life Advisor is located at Boswell Building A045, telephone (650) 725-5066. The School of Medicine Assistant Dean for Student Services is located at MSOB X313, telephone (650) 723-4462.

Each student bears the responsibility of initiating a disability-related request for accommodations with the OAE prior to the time such an accommodation is needed. In addition, it is the responsibility of the student to: as early as possible register with the OAE and submit documentation of disability as a prerequisite to receiving accommodation, and to notify the OAE immediately if an accommodation is not being provided correctly or in a timely fashion.

**DisGo**

The OAE operates a free Disability Golf Cart service, DisGo, for all members of the Stanford community. It is open to anyone with a disability or medical condition that makes it difficult to travel around campus.

For more information on hours of operation and how to arrange for on-campus rides, please visit our website: [http://studentaffairs.stanford.edu/oae/disgo](http://studentaffairs.stanford.edu/oae/disgo)

**Schwab Learning Center**

Through a generous endowment from Charles and Helen Schwab, the Schwab Learning Center (SLC) was established to provide Stanford students with Learning Disabilities and Attention Deficit Hyperactivity Disorder (ADHD) a supportive academic environment through enhanced programs and services.
SLC programs and services are offered on both the main campus and at the Stanford School of Medicine. Among the services offered are:

- Consultation and referral for students with suspected learning differences
- One-on-one learning strategies
- Academic tutoring

**Workshops at the Medical School**

In addition to individual services, the SLC offers group workshops to groups medical students related specifically to their educational and training needs. These include such topics as:

- Enhancing Your Study Style the Metacognitive Way – Know How You Study
- Test taking and Stress Management
- Memory Strategies to Decrease Study time
- Managing Your Time at Medical School
- Taking the United States Medical School Licensing Examination (Step 1)
- Making it through the clinical years

For more information visit our website: [http://studentaffairs.stanford.edu/oae/schwab](http://studentaffairs.stanford.edu/oae/schwab)

**Assistive Technology**

The OAE provides trainings and screenings on a variety of assistive computer technologies and software applications. Screenings create an opportunity for students and the OAE staff to review and discuss various assistive technologies and software applications that may prove useful. Services include:

- One-on-one training for assistive technology and adaptive software
- Software for speech recognition, text-to-speech applications, screen readers and screen magnification.
- Alternative input devices such as specialized keyboards and mouse substitutes
- Whiteboards capture devices to enhance studying
- Ergonomic computer workstations
- Refreshable Braille display
- CCTV video magnifiers

The Alternate Format Production Facility has the capacity to convert print text to electronic text (e-text), large print, or Braille using high-speed scanners, specialized software applications, and Braille embossers.

For more information, visit our website: [http://studentaffairs.stanford.edu/oae/at](http://studentaffairs.stanford.edu/oae/at).

10. TUITION AND FINANCIAL AID

10.1 Tuition and Fees

10.2 Financial Aid Policies

10.3 Quarterly Teaching Assistant and Research Assistant Salary and Tuition Allowances for 2010-2011
10.1 TUITION AND FEES

PER QUARTER TUITION RATES FOR 2010-11

Tuition (Courses)
- Entering Class, for class matriculating 2010-11
  $14,732 full-time 9-35 units
  Full-time for first year students, autumn quarter only, 9-45 units

- Research Rate, for class matriculating 2010-11 and after
  $2,874, is assessed after the first quarter of full-time research that is paid at full tuition ($14,732).
  Subsequent quarters of full-time research are assessed the Research Rate Tuition.

- Continuing Students, matriculating prior to 2010-11
  $15,531 Full-time 9-35 units

- Terminal Medical Registration (TMR) rate
  $2,330 is assessed for students who matriculated prior to 2010-11 and have paid for 13 full quarters of
  tuition (16 for joint MD/PhD candidates) pay the TMR tuition rate beginning the 14th quarter. The TMR
  tuition rate is approximately 15% of the full tuition rate. The TMR tuition rate is not available to
  student matriculating 2010-11 and after.

Units exceeding the full-time limit will be assessed an additional per unit fee. For the entering class of
2010-11, the per unit fee is $982; for students matriculated prior to 2010-11, the fee is $1,036. The cost of
units exceeding the full-time limit is not included in the budgets for students on financial aid.

Students who must repeat courses are required to pay tuition for the repeated courses.

Students enrolled in the dual degree MD/MBA program at Stanford University are required to pay 12
quarters of full MD tuition and 5 quarters of the MBA tuition. MD/MBA Dual Degree students are
admitted to the GSB after completing three years at the Medical School. Students are expected to complete
5 quarters in this program, one full year at the GSB and 2 quarters (winter and spring) in the following
academic year. GSB tuition will be billed accordingly.
FEES

In addition to tuition, students are required to pay other fees related to their enrollment in the School of Medicine:

- Health Insurance: All students registered at Stanford University must have health insurance, either with the Stanford-sponsored insurance, Cardinal Care, or with an external carrier. The fee for Cardinal Care will appear on the student’s University bill. Students choosing external insurance must notify the University and provide proof of health insurance coverage. If you choose not to enroll in Cardinal Care and decide to use your own health insurance, you must provide proof of health insurance coverage. To do this, complete the health insurance waiver on Axess at http://axess.stanford.edu.

  You must request waiver on a quarterly basis and no later than September 15, December 15, March 15, and June 15. If you miss these deadlines, you will be required to pay the health insurance fee. For additional information, see Health Insurance Information for Incoming Students (Section 9.4 of this handbook).

- Campus Health Service Fee: All students enrolled on the main Stanford campus are required to pay the Campus Health Service Fee of $167 per quarter. The Campus Health Service Fee covers most of the services provided by Vaden Health Center, including primary care medical visits, psychological evaluation and short-term counseling at Counseling and Psychological Services (CAPS), and health and wellness programs. The services provided by the Vaden Health Center are not covered by Cardinal Care or a student’s private health insurance.

- Medical Student Disability insurance is required of all students; the fee is currently $60 per year. This fee is assessed in the winter quarter term.

- Associated Students of Stanford University (ASSU) student activities fees are $85 per year; $28 autumn, $28 winter, and $29 in spring. No fees are paid for summer quarter enrollment.

- A Document fee of $200 is billed one time upon admission to Stanford University.

- Parking fees: University personnel, including staff and students, who wish to park a car or motorcycle on campus, either adjacent to on-campus housing or at the Medical Center, must pay a parking fee. The 2010-11 fees are available online at: http://transportation.stanford.edu/parking_info/ParkingInformation.shtml Parking fees are part of the transportation allowance which is included in the student budget.

  With the exception of ASSU and Document fees, all fees are included in the student budget and eligible for financial aid.

</table>

Tuition and fees charged in between the bill dates above are billed on the 20th of each month and due on the 15th of the following month. Tuition and fees not paid by the due date are subject to a late payment fee of 1%.

Stanford University's policy is to furnish timely and accurate billing information as well as effective payment options to students and authorized payers. Billing and payment services are delivered electronically through Stanford's online billing and payment service, Stanford ePay.

Bill notification is sent to each student's @stanford.edu email address as recorded in Axess. All students with balances will receive a bill notification via Stanford ePay. For more information, reference Quick Steps: View / Pay / Print University Bill.

A variety of methods are available for students to pay their University bill. We strongly recommend paying via Stanford ePay, the University's online billing and payment service, as it is the fastest, most convenient way for students or authorized payers to make payment to student accounts, 24 hours a day, seven days a week.

- eCheck via Stanford ePay
- Financial Aid and Student Permissions
- Checks via Mail
- Walk-in
- Wire Transfer

For detailed instructions, visit the Stanford’s Student Financial Services website at http://fingate.stanford.edu/students/universbill/payment_methods.html

ACCOUNT CREDITS AND REFUNDS

If a student’s account shows a credit balance, the student may request a refund. Refunds are always issued to the student, even when the tuition has been paid by an Authorized Payer. Refunds are either mailed to the student's current mailing address on record, or deposited electronically into the student's checking or savings account, providing the student has opted for Online Direct Deposit.

Refunds are only processed to student accounts. Refunds for graduate students are processed after the Study List submission deadline.

For questions about a refund, please contact the Student Services Center, Monday through Friday, 9 AM – 5 PM PST, or submit a HelpSU ticket.

Note: Some charges may still be present on the University bill even though a refund was sent. Students are responsible for reviewing their bill and ensuring that all charges are paid by the due date. See the Financial Aid and Student Permissions section on the Overview: University Bill Payment Methods page.
10.2 FINANCIAL AID POLICIES

CITIZENSHIP

U.S. citizenship or U.S. registered permanent residency status is a prerequisite for financial aid. Upon admission, those who are not U.S. citizens or U.S. registered permanent residents must be able to demonstrate, with appropriate financial statements, that they have sufficient funds available to meet all educational costs for the length of the program. Although assistantship earnings may become available to help such students meet their educational costs, they cannot be included as a resource in the documentation required prior to matriculation.

ENROLLMENT

To be eligible for financial aid, MD students must be enrolled at least half time; a minimum of nine School of Medicine units during the fall, winter, and spring quarters. During summer quarters, only three of the nine units must be School of Medicine units. Only students working on the MD degree are eligible for financial aid through the School of Medicine Financial Aid Office. Students working on other advanced degrees should apply for aid from their individual degree-granting departments. Questions concerning eligibility should be directed to the Financial Aid Director.

SATISFACTORY ACADEMIC PROGRESS FOR FINANCIAL AID

Federal law and regulations require that students receiving financial assistance from federal funds maintain satisfactory academic progress. The following policy presents the standards adopted by the Stanford University School of Medicine for students receiving financial aid.

1. Each student must maintain the following unit requirements:

   a. Per quarter (autumn, winter, spring): nine School of Medicine units each quarter; summer (if enrolled): a minimum of nine units that must include at least three School of Medicine units (any units listed in the School of Medicine Course and Clerkship Catalog or included for Scholarly Concentration). A student’s financial aid may be subject to cancellation for any quarter if the student’s enrollment falls below the minimum.

   b. Per academic year: minimum of 35 School of Medicine units each academic year. Students planning not to register for a quarter, or to register for summer and take only three School of Medicine units, must be careful that during each academic year they complete a minimum of 35 School of Medicine units. No financial aid will be disbursed to a student who completes fewer than the minimum. Units for a course dropped will not be included.

   c. For students enrolled in the dual degree MD/MBA program at Stanford University, the GSB will fund financial aid for the full academic year that the student is in attendance at the GSB and award for the two quarters the student is registered at the GSB in the second year.
2. Academic deficiencies must be corrected within the time frame established by the Committee on Performance, Professionalism and Promotion.

3. Maximum Financial Aid Eligibility:
   
a. For students in the MD program: five years (i.e., 20 quarters)
   
b. For MD students working on a Master’s degree at the School of Medicine: six years (i.e., 23 quarters)

   Funding beyond the maximum time frames will be provided only if approved by an Advising Dean (in his or her discretion) because of significant mitigating circumstances.

   The maximum time allowed does not include periods of approved Leaves of Absence. For transfer students, quarters completed prior to entering are subtracted from maximum financial aid eligibility.

4. A student who has completed degree requirements, with the exception of the ACLS, will not be eligible for financial aid funding.

5. The School of Medicine Registrar’s Office monitors all student records and apprises the School of Medicine Financial Aid Office and the Committee on Performance, Professionalism and Promotion of those students whose academic progress may be in question.

**FINANCIAL NEED**

The financial aid offered by the School of Medicine Financial Aid Office (FAO) is based on demonstrated financial need, not academic achievement. The premise of need-based financial aid is that the student and family have the primary responsibility for financing their medical education. Grant eligibility is determined after family resources are assessed.

The financial aid program requires that students, their parents (if the student is under 30 years of age and is applying for Stanford-based financial aid), and their spouse provide all financial information fully and accurately. Students who are 30 years of age or older as of the first day of the autumn term (August 23, 2010) are considered independent and are not required to provide parental data. All students, regardless of age, must notify the FAO promptly, in writing, of any change in their financial circumstances during the year. Failure to report changes such as marital status, parental income, assets, scholarship aid, work income, etc., could result in a total loss of assistance, a revision of past awards, serious disciplinary action, or all three.

**THE APPLICATION PROCESS**

The School of Medicine FAO uses the Free Application for Federal Student Assistance (FAFSA), the Need Access Need Analysis Application, and a paper supplemental application, to
collect the data used in preparing the financial aid award. The sources of aid awarded (federal grant and loan, institutional grant and loan) are based on these data. The FAO will take action on applications for loans and grants only when all required documentation and materials are received and processed. Priority is given to students whose applications are complete and ready for review by June 15. Students should start the application process six to eight weeks before this date. No Stanford-based aid (Stanford Grant and Loan) will be awarded to applicants who submit application materials after December 31. For students on or returning from a leave of absence, this deadline does not apply.

Students must reapply and submit all required documents each year. Application forms become available in early February.

**FINANCIAL AID AWARD LETTER**

Financial aid award letters are prepared after the FAO staff has completed a need-analysis of the student’s completed application/file. The initial award letters are placed in student mailboxes and are also available to be viewed through the Student Services portal in Axess. Students should review their award letters carefully and request clarification as needed.

As new sources of financial support become available, the financial aid award may change. Students are notified of these changes in “revised” award letters.

**THANK-YOU LETTER AND ANNUAL DINNER**

Most of our institutional grant, loan, and medical scholars’ funds exist because of generous gifts from alumni or friends of Stanford. If you are awarded such funds, you may be required to write the donor(s) a thank-you letter and attend the annual dinner, tentatively scheduled to be held in early March 2010. Your cooperation is needed and expected, since maintaining the good will of Stanford's donors helps assure the availability of funds for the future. Aid recipients who fail to comply with these requirements by the specified date will lose eligibility for Stanford grants or loans — or both — the following year.

**DISBURSEMENT OF FINANCIAL AID**

Based on your financial aid application and other supporting documents, your financial aid package will appear on your university bill each quarter as “anticipated aid.” Anticipated aid is defined as any grants, scholarships, stipends, fellowships, or student loans and other aid which has not yet been applied to charges on the University bill. Anticipated aid allows students and authorized payers to calculate what they need to pay to satisfy their bill. Anticipated aid is not always the amount of aid a student will receive; it is an estimate of what they MAY receive.

The following rules apply to release of anticipated aid:

- The student must be enrolled on at least a half-time basis (minimum of nine medical school units).
For Federal Direct Student Loans (Subsidized, Unsubsidized and Grad PLUS loans), students must complete a Master Promissory Note and an Entrance Interview. To complete, go to StudentLoans.gov.

For Stanford Institutional Loans (SU Loans), students must complete and submit a Self-Certification Form and complete a promissory note. Students will receive email notification from signmyloans.com to review and accept these.

When you have satisfied all requirements for aid eligibility and funds have been received, the “anticipated aid” will be applied to your account.

**Appeals Process**

A student who feels that exceptional personal or familial circumstances have not been fully considered in the review of his/her application may discuss those concerns with the Financial Aid Director. The Director will use the professional judgment provision under the Federal financial aid guidelines in review of these exceptions. If a satisfactory resolution cannot be achieved through this meeting, the student may petition for a formal hearing of his/her appeal by the Financial Aid Committee. The committee consists of the Financial Aid Director, the Assistant Dean for Student Services, and the Student’s Academic Advisor. Changes in circumstances and income must be fully documented. Students may also be required to submit a detailed personal expense budget.

Increases to the standard student budget are rarely granted. When this is the reason for the appeal, the student expenses above the standard budget must be well-documented; receipts are required. Students planning to file appeals should present their petitions in writing to a Financial Aid Director. The Financial Aid Director will present the petition to the Financial Aid Committee, and the Committee will then render a decision on the appeal. The Committee's action will remain confidential and final.

**10.3 QUARTERLY TEACHING ASSISTANT AND RESEARCH ASSISTANT SALARY AND TUITION ALLOWANCES FOR 2010-2011**

Students employed as Research or Teaching Assistants must be enrolled in 8-10 units to be eligible for the tuition allowance (TAL) portion of the assistantship. To be eligible for financial aid, a student must enroll in at least nine units. The unit basis registration privilege is not available to students appointed as pre-doctoral fellows on training grants.

The units of work attempted must be in agreement with the tuition paid by the student. Regulations and guidelines applicable to graduate student assistantships can be found in the Stanford University Administrative Guide http://adminguide.stanford.edu/24_2.pdf

See % above for salary amounts

*Schedule for required courses approved by the Dean's Office for 61% tuition supplementation.

All appointments should be on a quarterly basis and appointed in 5% increments. The minimum appointment at the Med School has been set at 10%.

Tuition rates are based on full MD tuition of $14,732 per yr.

There is a 4.5% staff benefit rate applied on student RA/TA salaries.

Departments' cost equals the Dept's tuition cost plus student salary for percentage appointed.

Departments must pay the tuition for students on TMR tuition, $2,330 per quarter.

Students' with TA salary funded with Federal Work Study, tuition split is 50/50; adjustments done upon entry into GFS.

*Schedule for required courses approved by the Dean's Office for 61% tuition supplementation.

Director of Financial Aid

All appointments should be on a quarterly basis and appointed in 5% increments. The minimum appointment at the Med School has been set at 10.

Tuition rates are based on full MD Tuition of $15,531 per yr.
There is a 4.5% staff benefit rate applied on student RA/TA salaries.
Department’s cost equals the Dept’s tuition cost plus student salary for percentage appointed.
Departments must pay the tuition for students on TMR tuition, $2,530 per quarter.
Student’s with TA salary funded with Federal Work Study, tuition split is 50/50; adjustments done upon entry into GFS.

*Schedule for required courses approved by the Dean’s Office for 81% tuition supplementation.

11.1 STANFORD UNIVERSITY SCHOOL OF MEDICINE MEDICAL EDUCATION RESEARCH INITIATIVE

We have an ongoing initiative at Stanford University School of Medicine to conduct institutional research in medical education. Our primary goal is to use research study results to further develop, enhance and strengthen the new medical school curriculum in order to best serve the needs of our students. Through our research, we also aim to contribute to the wider discourse on innovations and best practices in medical education across the country and around the world. Research findings will be presented at conferences and published in academic publications, including journals and books.

As part of this initiative, we will be asking you to complete assessments to help us understand the impact of learning activities and new curricular initiatives. We will be collecting information using a variety of tools and methods as part of the overall evaluation plan for the medical school. Types of data we will collect and use include performance data, responses to evaluations, individual interviews, focus groups, questionnaires, observation of video- or audio-taped classroom lectures and activities, tracking and monitoring of technology usage, attendance, and participation in learning activities.

Curricular evaluation data is currently being collected and is integrated into the evaluation plan for monitoring curriculum in the Medical School. Data collection and evaluation of the curriculum is necessary in order to meet national accreditation standards and ensure the ongoing accreditation of the Medical School. Data is monitored throughout the entirety of a student’s educational career at Stanford and may include post-graduate continuing education (e.g. residency evaluations).

Maintaining confidentiality and anonymity in the data collection process is a top priority. Individual performance data or responses to surveys will be de-identified (names removed) before results are reported out. Data will only be used in aggregate form; it will never be published or reported in connection with a student’s identity. Evaluation data will be kept in a secure location with access strictly limited to research personnel through password-protected computers and file servers.

Participation in the research component of the integrated medical education evaluation process is entirely voluntary. Your participation in this process will vary but rarely exceed one hour, such as for a focus group, or 15 to 30 minutes for a survey. The risks associated with this institutional research study in medical education are minimal to none.

If you would like to withdraw your participation in this educational research initiative, please contact Jennifer Deitz at (650) 498-4954 or jdeitz@stanford.edu with your intent to withdraw. Withdrawing your participation will not affect your grade or standing in the medical school. You have the right to withdraw your consent or discontinue participation at any time without penalty.

If you have any questions or concerns, please do not hesitate to contact us.

Thank you for your help in this important work.

Regards,
Clarence Braddock, III MD, MPH
Associate Dean, Medical Education
Stanford University School of Medicine
cbrad@stanford.edu

Jennifer Deitz, MA
Interim Director, Division of Evaluation
Office of Medical Education
Stanford University School of Medicine
jdeitz@stanford.edu
11.2 STANFORD UNIVERSITY POLICIES

As students at Stanford University, medical students are governed by the applicable rules, regulations and policies of the University. Many of these are set forth in the Stanford Bulletin, available online at:

http://www.stanford.edu/dept/registrar/bulletin/

Certain particularly important policies are set forth below.

11.3 NONDISCRIMINATION POLICY

Stanford University admits qualified students of any race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, and gender identity to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. Consistent with its obligations under the law, it prohibits discrimination, including harassment, against students or applicants for admission, or employees or applicants for employment on the basis of race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity, or any other characteristic protected by applicable law in the administration of its educational policies, admissions policies, scholarships and loan programs, and athletic and other University-administered programs. The following person has been designated to handle inquiries regarding this policy: the Director of the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford, CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), equal.opportunity@stanford.edu (email).

11.4 JUDICIAL AFFAIRS AND STUDENT CONDUCT

The primary codes of conduct for students are the Fundamental Standard and Honor Code. The Student Judicial Charter of 1997 was approved by the Associated Students of Stanford University, the Senate of the Academic Council, and the President of the University during Spring Quarter 1996-97 and Autumn Quarter 1997-98, replacing the earlier charter and becoming effective in January 1998. Cases of alleged violations of the University’s Honor Code, Fundamental Standard, and other student conduct policies now proceed through an established student judicial process based upon the Student Judicial Charter of 1997, which can be found in its entirety at the University’s Office of Judicial Affairs Web site at http://judicialaffairs.stanford.edu. The Web site also contains the policies, rules, and interpretations, as well as the University’s Student Conduct Penalty Code, applicable to those students found responsible for violating the Honor Code, the Fundamental Standard, or other University policy or rule.

When a violation of the Fundamental Standard, Honor Code, or other University policy or rule governing student conduct is alleged, or whenever a member of the University community believes such a violation has occurred, he or she should contact the Office of Judicial Affairs, at Tresidder Memorial Union, 2nd floor, (650) 725-2485 (phone), (650) 736-0247 (fax), or judicial.affairs@stanford.edu (e-mail).

THE FUNDAMENTAL STANDARD

Students at Stanford are expected to know, understand, and abide by the Fundamental Standard, which is the University’s basic statement on behavioral expectations articulated in 1896 by Stanford’s first President, David Starr Jordan, as follows:
“Students are expected to show both within and without the University such respect for order, morality, personal honor, and the rights of others as is demanded of good citizens. Failure to do this will be sufficient cause for removal from the University.”

Actions that have been found to be in violation of the Fundamental Standard include:

- Physical Assault
- Property Damage
- Forgery
- Theft
- Sexual harassment or other sexual misconduct
- Misrepresentation in seeking financial aid, University housing, University meals, or other University benefits
- Driving on campus while under the influence of alcohol
- Misuse of computer equipment or e-mail
- Sending threatening or obscene messages

There is no standard penalty which applies to violations of the Fundamental Standard. Penalties range from a formal warning to expulsion. Each case is fact specific; considerations include the nature and seriousness of the offense, the motivation underlying the offense, and precedent in similar cases.

**THE HONOR CODE**

The Honor Code is the University’s statement on academic integrity. It is essentially the application of the Fundamental Standard to academic matters. Provisions of the Honor Code date from 1921, when the honor system was established by the Academic Council of the University Faculty at the request of the student body and with the approval of the President. The Honor Code reads:

“A. The Honor Code is an undertaking of the students, individually and collectively:

1) that they will not give or receive aid in examinations; that they will not give or receive unpermitted aid in class work, in the preparation of reports, or in any other work that is to be used by the instructor as the basis of grading;

2) that they will do their share and take an active part in seeing to it that others as well as themselves uphold the spirit and letter of the Honor Code.

“B. The faculty on its part manifests its confidence in the honor of its students by refraining from proctoring examinations and from taking unusual and unreasonable precautions to prevent the forms of dishonesty mentioned above. The faculty will also avoid, as far as practicable, academic procedures that create temptations to violate the Honor Code.
“C. While the faculty alone has the right and obligation to set academic requirements, the students and faculty will work together to establish optimal conditions for honorable academic work.”

Examples of conduct that have been found to be in violation of the Honor Code include:

- Copying from another’s examination paper or allowing another to copy from one’s own paper
- Unpermitted collaboration
- Plagiarism
- Revising and resubmitting a quiz or exam for regrading without the instructor’s knowledge and consent
- Representing as one’s own work the work of another
- Giving or receiving aid on an academic assignment under circumstances in which a reasonable person should have known that such aid was not permitted

For more information, see the Interpretations and Applications of the Honor Code at:

http://stanford.edu/dept/vpsa/judicialaffairs/guiding/honorcode

The standard penalty for a first offense is a one-quarter suspension from the University and 40 hours of community service. In addition, many faculty members issue a “No Pass” for the course in which the violation occurred.

11.5 POLICY ON SEXUAL HARASSMENT AND CONSENSUAL SEXUAL OR ROMANTIC RELATIONSHIPS

Following are excerpts that are most applicable to School of Medicine MD students. For the complete text of the currently applicable version of this policy, see Administrative Guide Memo 23.2, Policy on Sexual Harassment and Consensual Sexual or Romantic Relationships at

It is also available from the Sexual Harassment Policy Office home page:

http://harass.stanford.edu

SUMMARY

Stanford University strives to provide a place of work and study free of sexual harassment, intimidation or exploitation. Where sexual harassment is found to have occurred, the University will act to stop the harassment, prevent its recurrence, and discipline and/or take other appropriate action against those responsible.

POLICY

The following is quoted from the policy:
“1. In General

a. **Applicability and Sanctions for Policy Violations**—This policy applies to all students, faculty and staff of Stanford University, as well as to others who participate in Stanford programs and activities. Its application includes Stanford programs and activities both on and off-campus, including overseas programs. Individuals who violate this policy are subject to discipline up to and including discharge, expulsion, and/or other appropriate sanction or action.

b. **Respect for Each Other**—Stanford University strives to provide a place of work and study free of sexual harassment, intimidation or exploitation. It is expected that students, faculty, staff and other individuals covered by this policy will treat one another with respect.

c. **Prompt Attention**—Reports of sexual harassment are taken seriously and will be dealt with promptly. The specific action taken in any particular case depends on the nature and gravity of the conduct reported, and may include intervention, mediation, investigation and the initiation of grievance and disciplinary processes as discussed more fully below. Where sexual harassment is found to have occurred, the University will act to stop the harassment, prevent its recurrence, and discipline and/or take other appropriate action against those responsible.

d. **Confidentiality**—The University recognizes that confidentiality is important. Sexual harassment advisers and others responsible to implement this policy will respect the confidentiality and privacy of individuals reporting or accused of sexual harassment to the extent reasonably possible. Examples of situations where confidentiality cannot be maintained include circumstances when the University is required by law to disclose information (such as in response to legal process) and when disclosure is required by the University’s outweighing interest in protecting the rights of others.

e. **Protection Against Retaliation**—Retaliation and/or reprisals against an individual who in good faith reports or provides information in an investigation about behavior that may violate this policy are against the law and will not be tolerated. Intentionally making a false report or providing false information, however, is grounds for discipline.

f. **Relationship to Freedom of Expression**—Stanford is committed to the principles of free inquiry and free expression. Vigorous discussion and debate are fundamental to the University, and this policy is not intended to stifle teaching methods or freedom of expression generally, nor will it be permitted to do so. Sexual harassment, however, is neither legally protected expression nor the proper exercise of academic freedom; it compromises the integrity of the University, its tradition of intellectual freedom and the trust placed in its members.

“2. What Is Sexual Harassment?

Unwelcome sexual advances, requests for sexual favors, and other visual, verbal or physical conduct of a sexual nature constitute sexual harassment when:

a. It is implicitly or explicitly suggested that submission to or rejection of the conduct will be a factor in academic or employment decisions or evaluations, or permission to participate in a University activity;
or

b. The conduct has the purpose or effect of unreasonably interfering with an individual’s academic or work performance or creating an intimidating or hostile academic, work or student living environment.

Determining what constitutes sexual harassment depends upon the specific facts and the context in which the conduct occurs. Sexual harassment may take many forms—subtle and indirect, or blatant and overt. For example,

- It may be conduct toward an individual of the opposite sex or the same sex.
- It may occur between peers or between individuals in a hierarchical relationship.
- It may be aimed at coercing an individual to participate in an unwanted sexual relationship or it may have the effect of causing an individual to change behavior or work performance.
- It may consist of repeated actions or may even arise from a single incident if sufficiently egregious.

The University’s Policy on Sexual Assault (see Guide Memo 23.3, Sexual Assault, (http://adminguide.stanford.edu/23_3.pdf) may also apply when sexual harassment involves physical contact.

3. What To Do About Sexual Harassment

Individuals seeking further information are directed to the following resources:

- The Sexual Harassment Policy Office at Mariposa House, 585 Capistrano Way, Room 209; (650) 723-1583 or 327-8259; e-mail: harass@stanford.edu -- for information, consultation, advice, or to lodge a complaint. Note that anonymous inquiries can be made to the SHPO by phone during business hours.

- Any designated Sexual Harassment Adviser or resource person listed in 3.a. or 5.a.

The following are the primary methods for dealing with sexual harassment at Stanford. They are not required to be followed in any specific order. However, early informal methods are often effective in correcting questionable behavior.

a. Consultation—Consultation about sexual harassment is available from the Sexual Harassment Policy Office, Sexual Harassment Advisers (including residence deans), human resources officers, employee relations specialists, counselors at Counseling and Psychological Services (CAPS) or the Help Center, chaplains at Memorial Church, ombudspersons and others. A current list of Sexual Harassment Advisers is available from the Sexual Harassment Policy Office and at http://harass.stanford.edu/SHadvisers.html. Consultation is available for anyone who wants to discuss issues related to sexual harassment, whether or not “harassment” actually has occurred, and
whether the person seeking information is a complainant, a person who believes his or her own actions may be the subject of criticism (even if unwarranted), or a third party.

Often there is a desire that a consultation be confidential or “off the record.” This can usually be achieved when individuals discuss concerns about sexual harassment without identifying the other persons involved, and sometimes even without identifying themselves. Confidential consultations about sexual harassment also may be available from persons who, by law, have special professional status, such as:

- Counselors at Counseling and Psychological Services (CAPS), http://caps.stanford.edu
- Chaplains at Memorial Church
- The University Ombudsperson, http://www.stanford.edu/dept/ombuds/
- The Medical Center Ombudsperson, http://med.stanford.edu/ombuds/

In these latter cases, the level of confidentiality depends on what legal protections are held by the specific persons receiving the information and should be addressed with them before specific facts are disclosed. For more information see http://harrass.stanford.edu/resources.html

For further information on confidentiality, see Section 1.d above.

b. Direct Communication—An individual may act on concerns about sexual harassment directly, by addressing the other party in person or writing a letter describing the unwelcome behavior and its effect and stating that the behavior must stop. A Sexual Harassment Adviser can help the individual plan what to say or write, and likewise can counsel persons who receive such communications. Reprisals against an individual who in good faith initiates such a communication violate this policy.

c. Third Party Intervention—Depending on the circumstances, third party intervention in the workplace, student residence or academic setting may be attempted. Third party intervenors may be the Sexual Harassment Advisers, human resources professionals, the ombudspersons, other faculty or staff, or sometimes mediators unrelated to the University.

When third party intervention is used, typically the third party (or third parties) will meet privately with each of the persons involved, try to clarify their perceptions and attempt to develop a mutually acceptable understanding that can insure that the parties are comfortable with their future interactions. Other processes, such as a mediated discussion among the parties or with a supervisor, may also be explored in appropriate cases.

Possible outcomes of third party intervention include explicit agreements about future conduct, changes in workplace assignments, substitution of one class for another, or other relief, where appropriate.

d. Formal Grievance, Appeal, and Disciplinary Processes—Grievance, appeal, or disciplinary processes may be pursued as applicable.
1) **Grievances and Appeals**—The applicable procedure depends on the circumstances and the status of the person bringing the charge and the person against whom the charge is brought. Generally, the process consists of the individual’s submission of a written statement, a process of fact-finding or investigation by a University representative, followed by a decision and, in some cases, the possibility of one or more appeals, usually to Stanford administrative officers at higher levels. The relevant procedure (see below) should be read carefully, since the procedures vary considerably.

If the identified University fact-finder or grievance officer has a conflict of interest, an alternate will be arranged, and the Director of the Sexual Harassment Policy Office or the Director of Employee and Labor Relations can help assure that this occurs.

In most cases, grievances and appeals must be brought within a specified time after the action complained of. While informal resolution efforts will not automatically extend the time limits for filing a grievance or appeal, in appropriate circumstances the complainant and the other relevant parties may mutually agree in writing to extend the time for filing a grievance or appeal.

A list of the established grievance and appeal procedures is located at http://elr.stanford.edu/grievance.html. Copies may also be obtained from the Sexual Harassment Policy Office, http://www.stanford.edu/group/SexHarass.”

“2) **Disciplinary Procedures**—In appropriate cases, disciplinary procedures may be initiated. The applicable disciplinary procedure depends on the status of the individual whose conduct is in question. For example, faculty are subject to the Statement on Faculty Discipline http://www.stanford.edu/dept/provost/faculty/policies/handbook/ch4.html#statementonfacultydiscipline and students to the Fundamental Standard. For additional information related to student judicial affairs, see http://www.stanford.edu/dept/vpsa/judicialaffairs.

The individuals referenced in this section are available to discuss these options and differing methods for dealing with sexual harassment.”

“6. Consensual Sexual or Romantic Relationships

a. **In General**—There are special risks in any sexual or romantic relationship between individuals in inherently unequal positions, and parties in such a relationship assume those risks. In the University context, such positions include (but are not limited to) teacher and student, supervisor and employee, senior faculty and junior faculty, mentor and trainee, adviser and advisee, teaching assistant and student, coach and athlete, and the individuals who supervise the day-to-day student living environment and student residents. Because of the potential for conflict of interest, exploitation, favoritism, and bias, such relationships may undermine the real or perceived integrity of the supervision and evaluation provided, and the trust inherent particularly in the teacher-student context. They may, moreover, be less consensual than the individual whose position confers power or authority believes. The relationship is likely to be perceived in different ways by each of the parties to it, especially in retrospect.

Moreover, such relationships may harm or injure others in the academic or work environment. Relationships in which one party is in a position to review the work or influence the career of the other may provide grounds for complaint by third parties when that relationship gives undue access
or advantage, restricts opportunities, or creates a perception of these problems. Furthermore, circumstances may change, and conduct that was previously welcome may become unwelcome. Even when both parties have consented at the outset to a romantic involvement, this past consent does not remove grounds for a charge based upon subsequent unwelcome conduct.

Where such a relationship exists, the person in the position of greater authority or power will bear the primary burden of accountability, and must ensure that he or she—and this is particularly important for teachers—does not exercise any supervisory or evaluative function over the other person in the relationship. Where such recusal is required, the recusing party must also notify his or her supervisor, department chair or dean, so that such chair, dean or supervisor can exercise his or her responsibility to evaluate the adequacy of the alternative supervisory or evaluative arrangements to be put in place. Staff members may notify their local human resources officers. To reiterate, the responsibility for recusal and notification rests with the person in the position of greater authority or power. Failure to comply with these recusal and notification requirements is a violation of this policy, and therefore grounds for discipline. The University has the option to take any action necessary to insure compliance with the spirit of this recusal policy, including transferring either or both employees in order to minimize disruption of the work group. In those extraordinarily rare situations where it is programmatically infeasible to provide alternative supervision or evaluation, the cognizant Dean or Director must approve all evaluative and compensation actions.

b. With Students—At a university, the role of the teacher is multifaceted, including serving as intellectual guide, counselor, mentor and advisor; the teacher’s influence and authority extend far beyond the classroom. Consequently and as a general proposition, the University believes that a sexual or romantic relationship between a teacher and a student, even where consensual and whether or not the student would otherwise be subject to supervision or evaluation by the teacher, is inconsistent with the proper role of the teacher, and should be avoided. The University therefore very strongly discourages such relationships.”

11.6 STUDENT ACADEMIC GRIEVANCE PROCEDURES

The following policy was effective beginning in the 1999-2000 academic year and is subject to periodic review (check the online Stanford Bulletin for the currently applicable version).

1. Coverage

   a. Any Stanford undergraduate or graduate student who believes that he or she has been subjected to an improper decision on an academic matter is entitled to file a grievance to obtain an independent review of the allegedly improper decision, followed by corrective action if appropriate. A grievance is a complaint in writing made to an administrative officer of the University concerning an academic decision, made by a person or group of persons acting in an official University capacity, that directly and adversely affects the student as an individual in his or her academic capacity.

   b. Grievance procedures apply only in those cases involving a perceived academic impropriety arising from a decision taken by: (1) an individual instructor or researcher; (2) a school, department, or program; (3) a committee charged to administer academic policies of a particular school, department, or program; (4) the University Registrar, the Vice Provost for Undergraduate Education, the C-USP Subcommittee on Academic Standing, or a Senate
committee or subcommittee charged to administer academic policies of the Senate of the Academic Council. They do not pertain to complaints expressing dissatisfaction with a University policy of general application challenged on the grounds that the policy is unfair or inadvisable, nor do they pertain to individual school, department, or program academic policies, as long as those policies are not inconsistent with general University policy.

c. Individuals should be aware that the University Ombuds Office is available to all Stanford students, faculty, and staff to discuss and advise on any matter of University concern and frequently helps expedite resolution of such matters. Although it has no decision-making authority, the University Ombuds Office has wide powers of inquiry, including into student complaints against instructors.

2. Grievance and Appeal Procedures

a. Informal Attempts at Resolution: the student first should discuss the matter, orally or in writing, with the individual(s) most directly responsible. If no resolution results, the student should then consult with the individual at the next administrative level, for example, the chair or director of the relevant department or program, or, for those cases in which there is none, with the school dean. At this stage, the department chair or program director, if any, may inform the dean that the consultation is taking place and may solicit his or her advice on how to ensure that adequate steps are taken to achieve a fair result. Efforts should be made to resolve the issues at an informal level without the complaint escalating to the status of a formal grievance.

b. The Filing of the Grievance:

1) If informal means of resolution prove unsatisfactory, the student should set forth in writing a statement of the decision that constitutes the subject matter of the dispute, the grounds on which it is being challenged, and the reasons why the grievant believes that the decision was improperly taken. The statement should also include a description of the remedy sought and the informal efforts taken to date to resolve the matter. It is at this point that the complaint becomes a formal grievance. The written grievance should specifically address the matters set forth in the Standards for Review, as stated in Section 4 below. The grievance should include an allegation of any adverse effects on the grievant, known to the grievant at the time of filing.

2) The grievance document should be submitted to the dean of the school in which the grievance arose; for a grievance concerning a decision of the University Registrar, the Vice Provost for Undergraduate Education, or of a Senate committee or subcommittee, the procedures set forth herein for grievances and appeals shall be modified as stated in Section 3 below. A grievance must be filed in a timely fashion, that is, normally within 30 days of the end of the academic quarter in which the adverse decision occurred or should reasonably have been discovered. A delay in filing a grievance may, taking all circumstances into account, constitute grounds for rejection of the grievance.

c. The Response to the Grievance:

1) The relevant dean shall consider the grievance. The dean may attempt to resolve the matter informally or make whatever disposition of the grievance that he or she deems appropriate. The dean may, in appropriate cases, remand the grievance to a lower administrative level (including to the level at which the grievance arose) for further consideration.
2) The dean may also refer the grievance, or any issue therein, to any person (the "grievance officer") who shall consider the matter and report to the dean as the latter directs. The dean shall inform the grievant (and the party against whose decision the grievance has been filed) in writing of any referral of the matter and shall specify the matters referred, the directions to the person or persons to whom the referral is made (including the time frame within which the person is to report back to the dean), and the name of that person.

3) In undertaking the review, the dean or the grievance officer may request a response to the issues raised in the grievance from any individuals believed to have information considered relevant, including faculty, staff, and students.

4) Should attempts to resolve the matter informally not be successful, the dean shall decide the grievance, and shall notify the grievant (and the party against whose decision the grievance has been filed) in writing of the disposition made of the grievance and the grounds for the disposition at the earliest practicable date after his or her receipt of the grievance.

5) Normally, no more than 60 days should elapse between the filing of a grievance and the disposition by the dean. If, because of absence of key persons from the campus or other circumstances or exigencies (including those due to breaks in the academic calendar), the dean decides that disposition on that schedule is not possible, he or she shall inform the grievant (and the party against whose decision the grievance has been filed) of that in writing, giving the grounds therefore and an estimate of when a disposition can be expected.

d. The Filing of an Appeal:

1) If the grievant is dissatisfied with the disposition of the grievance at the decanal level, either on substantive or on procedural grounds, he or she may appeal in writing to the Provost.

2) The appeal must specify the particular substantive or procedural bases of the appeal (that is, the appeal must be made on grounds other than general dissatisfaction with the disposition) and must be directed only to issues raised in the grievance as filed or to procedural errors in the grievance process itself, and not to new issues. The appeal shall contain the following:

   a) A copy of the original grievance and any other documents submitted by the grievant in connection therewith.

   b) A copy of the determination made by the dean on that grievance.

   c) A statement of why the reasons for the determination of the dean are not satisfactory to the grievant. This statement should specifically address the matters set forth in the Standards for Review in Section 4 below.

3) The grievant shall file his or her appeal at the earliest practicable date after the grievant's receipt of the determination by the dean. Normally, no more than 30 days should elapse between the transmittal of the dean's decision on the grievance and the filing of the appeal. A delay in filing an appeal may, taking all circumstances into account, constitute grounds for rejection of the appeal.
e. The Response to the Appeal:

1) The Provost may attempt to resolve the matter informally, or refer the appeal, or any issue thereof, to any person (the "grievance appeal officer") who shall consider the matter and report to the Provost as the latter directs. The Provost may also, in appropriate cases, remand the matter to a lower administrative level (including to the level at which the grievance arose) for further consideration.

2) The Provost shall inform the grievant (and the party against whose decision the grievance has been filed) in writing of any referral of the matter and shall specify the matters referred, the directions to the person to whom the referral is made (including the time frame within which the person is to report back to the Provost), and the name of that person.

3) Should attempts be made to resolve the matter informally not be successful, the Provost shall decide the appeal, and shall notify the grievant (and the party against whose decision the grievance has been filed) in writing of the disposition made of the grievance and the grounds for the disposition at the earliest practicable date after his or her receipt of the appeal. The decision of the Provost shall be final, unless the grievant requests a further appeal to the President pursuant to Section 2f below, and the President agrees to entertain this further appeal.

4) Normally no more than 45 days should elapse between the filing of the appeal and the disposition by the Provost. If, because of absence of key persons from the campus or other circumstances or exigencies (including those due to breaks in the academic calendar), the Provost judges that disposition on that schedule is not possible, he or she shall inform the grievant (and the party against whose decision the grievance has been filed) of the fact in writing, giving the grounds therefore and an estimate of when a disposition can be expected.

f. The Request to the President: If the student is dissatisfied with the disposition of the appeal by the Provost, he or she may write to the President of the University giving reasons why he or she believes the grievance result to be wrong (following the general format set forth in Section 2d.2 above). No more than 30 days should elapse between the transmittal of the Provost's disposition and the written statement to the President urging further appeal. In any case, the President may agree or decline to entertain this further appeal. If the President declines to entertain the further appeal, the decision of the Provost shall be final. If the President decides to entertain the further appeal, he or she shall follow the general procedures set forth in Section 2e above, and the decision of the President shall be final.

3. Grievances Concerning Decisions of the University Registrar, the Vice Provost for Undergraduate Education, or of a Senate Committee or Subcommittee

a. For a grievance concerning a decision of the University Registrar, the Vice Provost for Undergraduate Education, the C-USP Subcommittee on Academic Standing, or of a Senate committee or subcommittee, the grievant shall file his or her grievance with the Provost, rather than with the dean, and the Provost shall handle that grievance in accordance with the procedures set forth in Section 2c above.

b. There shall be no appeal of the Provost's disposition of that grievance, except as may be available under Section 2f above.
4. Standards for Review and Procedural Matters
   a. The review of grievances or appeals shall usually be limited to the following considerations:
      1) Were the proper facts and criteria brought to bear on the decision? Were improper or extraneous facts or criteria brought to bear that substantially affected the decision to the detriment of the grievant?
      2) Were there any procedural irregularities that substantially affected the outcome of the matter to the detriment of the grievant?
      3) Given the proper facts, criteria, and procedures, was the decision one which a person in the position of the decision maker might reasonably have made?
   b. The time frames set forth herein are guidelines. They may be extended by the relevant administrative officer in his or her discretion for good cause.
   c. Questions concerning the filing and appeal of grievances should be directed to the Office of the Provost.

11.7 Childbirth Accommodation Policy for Women Graduate Students at Stanford University

The following may be found in Section 5.9 of the Graduate Academic Policies and Procedures Handbook (the GAP handbook), available online at

http://gap.stanford.edu/5-9.html

Rationale

To increase the number of women pursuing advanced degrees, it is important to acknowledge that a woman's prime childbearing years are the same years she is likely to be in graduate school, doing postdoctoral training, and establishing herself in a career. This Childbirth Accommodation Policy is designed to partially ameliorate the intrinsic conflict between the “biological” and the “research” and “training” clocks for women graduate students.

Nothing in this policy replaces the communication and cooperation between student and advisor, and the good-faith efforts of both to accommodate the birth of a child. It is the intention of this policy to reinforce the importance of that cooperation, and to provide support where needed to make that accommodation possible.

This policy is intended to provide an accommodation for the demands placed on a woman by late-stage pregnancy, childbirth, and the care of a newborn. It is designed to make it possible to maintain the mother's full-time, registered student status, and to facilitate her return to full participation in classwork, and, where applicable, research, teaching, and clinical training in a seamless manner.

Summary of Provisions of the Childbirth Policy

The Childbirth Policy has four components. All women graduate students (including students in professional schools) anticipating or experiencing a birth who are registered, matriculated students
1. are eligible for an Academic Accommodation Period of up to two consecutive academic quarters around the time of the birth, during which the student may postpone course assignments, examinations, and other academic requirements;

2. are eligible for full-time enrollment during this period and will retain access to Stanford facilities, Cardinal Care, and Stanford housing; and

3. will be granted an automatic one-quarter extension of University and departmental requirements and academic milestones, with the possibility of up to three quarters by petition under unusual circumstances. In addition,

4. women graduate students supported by fellowships, teaching assistantships, and/or research assistantships will be excused from their regular TA or RA duties for a period of six weeks during which they will continue to receive support.

(Students do not receive a stipend or salary if none was received previously, but are eligible for the Academic Accommodation Period and the one-quarter extension of academic milestones.)

**ELIGIBILITY**

The Childbirth Policy applies to matriculated and enrolled women graduate students anticipating or experiencing a birth. Adoption, foster-care placement, and paternity leave are covered under existing policies governing Medical, Maternity, and Paternity Leave, as described in the Stanford Graduate Academic Policies and Procedures (GAP) Handbook, Section 5.3. Birth mothers may opt to use a leave of absence instead of the benefits provided by the Childbirth Accommodation Policy. Depending on the stage in her academic career, the timing of the birth, her funding source, and the level of assistance she will receive from others in caring for the newborn, a woman may find it more advantageous or feasible to take one or more quarters of leave of absence rather than remaining enrolled and utilizing the Childbirth Policy. This may especially be the case for medical students because of the highly structured and sequential MD curriculum, particularly in the first two years.

**NOTE:** Before applying for a leave of absence, a woman student should determine the implications of a leave for remaining in on-campus housing, continuation of Cardinal Care insurance, fulfilling visa requirements, eligibility for student loans and loan deferment privileges, and whether leave “stops the clock” with regard to University or departmental funding (see Leaves of Absence and Reinstatement in Section 5.3 of the GAP Handbook). She should also discuss with her research advisor how a leave, especially one longer than a single quarter, would affect time-sensitive research projects and reporting, and the feasibility of resuming the same research project on return from leave.

**PLANNING FOR THE ACADEMIC ACCOMMODATION PERIOD**

The student should initiate discussions with her advisor(s) and departmental or school administrators at least four months prior to the anticipated birth in order to make arrangements for an Academic Accommodation Period. This will provide the lead time necessary to rearrange teaching duties for those students supported by teaching assistantships, or to adjust laboratory or other research schedules. Medical students will need to assess and, if possible, adjust the mix of classroom, research, and clinical activities. This planning period should also be used to reach agreement on a timeline for academic issues (e.g., class
attendance and residency issues, PhD qualifying exam and other academic milestones, field work, time-sensitive research reports on sponsored projects) that will be affected by the birth of a child and by the automatic one-quarter extension of academic requirements. It is essential that the student consult with the research advisor well in advance of the birth if the nature of her funding or the research grant conditions require that specific tasks be completed by specified dates, or if the PI will need to hire additional help to meet those conditions during a period of reduced activity by the woman graduate student. It is the student's responsibility to make arrangements with faculty and with departmental administrators for course completion and for continuation of teaching, research and/or clinical activities before and following the Academic Accommodation Period.

One of the purposes of the Childbirth Policy is to make it possible for women to maintain their full-time student status, so that they continue accumulating units toward the residency requirement, and to avoid triggering any interruptions in on-campus housing, insurance coverage, eligibility for student loans, and deferment of student loan repayment. By remaining full-time students, the visa status of international students is not affected. While it is usually better for the woman student to remain enrolled full-time, in some cases, depending on the coursework appropriate to the stage of her academic program, part-time enrollment would be appropriate. This will require careful consultation, in advance, to ensure that the implications for academic progress, visa status, loan eligibility and deferment, etc. have been thoroughly investigated. In completing the petition for the Academic Accommodation Period, the student may request up to two quarters of part-time enrollment. If part-time enrollment status is approved, the student will retain all privileges of the Childbirth Accommodation Policy. Independent of making this request for part-time enrollment, if a serious medical problem were to arise for mother or newborn, the woman student would be eligible for reduction in units under existing University policy.

NOTES: International students should discuss the intended Academic Accommodation Period with the Bechtel International Center at the beginning of the planning period to address proactively any unique visa issues and to consider current immigration regulations.

A student must be enrolled for a minimum of 6 units to be eligible for student loans and loan deferment privileges.

APPLYING FOR A CHILDBIRTH ACADEMIC ACCOMMODATION PERIOD AND AN EXTENSION OF ACADEMIC REQUIREMENTS

Women graduate students anticipating or experiencing the birth of a child may formally request a one-quarter extension of University and departmental academic requirements and a childbirth Academic Accommodation Period. Such a period is intended to recognize the student's need for special consideration before and after the birth of a child. This Academic Accommodation Period is not a leave of absence from University responsibilities. The expectation is that the woman will be in residence, and, assuming good health of the pregnant woman or new mother and the infant, will remain engaged in classwork and research, and, if applicable and feasible, clinical activities, even if at a reduced level.

The Childbirth Policy is administered by the Office of the Vice Provost for Graduate Education (VPGE) through a petition process. (Petition form is a downloadable pdf file.) In that petition, the woman student specifies the dates on which the Academic Accommodation Period begins and ends, with the requirement that it must fall within at most two consecutive quarters. A letter from the student's health-care provider stating the anticipated delivery date must accompany the petition. If the childbirth occurs prior to filing the petition, the accommodation period begins on the birth date.
The Office of the Vice Provost for Graduate Education will notify the student, the student’s department, and the relevant Stanford administrative offices that the one-quarter extension of University and departmental academic requirements and the Academic Accommodation Period have been approved, along with the dates for the accommodation period.

**DURING AND AFTER THE ACADEMIC ACCOMMODATION PERIOD**

**Funding**

In addition to being eligible for up to two quarters of academic accommodation, those women graduate students supported by fellowships, teaching assistantships, and/or research assistantships will be excused from their regular TA or RA duties for a period of six weeks during which they will continue to receive support.

Students who do not have an ongoing commitment of financial support in the form of fellowships, teaching assistantships, or research assistantships may petition for an academic accommodation period and an automatic one-quarter extension of academic requirements, but are not entitled to tuition or other funding from the Childbirth Accommodation Fund.

For most PhD students for whom a Teaching Assistantship is part of her support package, it should be possible to arrange the timing of teaching assignments to accommodate childbirth. During the six-week period, students supported by teaching assistantships may choose to continue in some limited capacity (e.g., grading, preparing course materials, or other non-intensive duties), in order to finish out an academic quarter, but cannot be required to do so. With advance planning, most Research Assistantship assignments can similarly be adjusted to accommodate childbirth. Most granting agencies provide for a short period of reduced activity due to health or personal issues. The support of students while they are writing or otherwise preparing the development or defense of a dissertation is typically an allowable expense on a research grant or contract if the student has already been funded to do the work related to that project.

Once a student files a petition, the Office of the Vice Provost of Graduate Education will determine if the regulations of a funding agency allow a six-week period of reduced activity and occasional absence. If it does not, the student’s salary and/or stipend and associated tuition for the six-week period will be paid from the Childbirth Accommodation Fund, administered by the Office of the Dean of Research. If continued funding would be allowed by the granting agency, but project deadlines require that a Principal Investigator hire a temporary replacement, the support for the mother may be charged to the Childbirth Accommodation Fund for the six-week period.

In most cases, students who are supported by 50% FTE Research Assistantships may be reduced to a 25% FTE appointment for one quarter during the period of accommodation. The balance of the student’s financial support will be provided in the form of a stipend payment to the student from the Childbirth Accommodation Fund.

The student, her advisor, and her department should recognize that it might not be feasible to return to a regular TA or RA assignment immediately after the six-week period. In that case, arrangements should be made to move a teaching assignment to another quarter, to assign limited on-site duties to a research assistant, or to find an alternative form of support. These issues should be negotiated sensitively with the student’s needs in mind. For her part, the student should work proactively with her department to make arrangements for ongoing support beyond the six-week period if she cannot return to her normal duties.
Students who are supported by fellowships internal to Stanford normally have their stipends distributed as lump-sum payments at the beginning of each quarter. Students supported in this manner who have had their petitions approved will see no change in their fellowship support.

Students who are supported by fellowships external to Stanford must adhere to the rules of the granting agency with respect to absences from academic and research work. If the granting agency requires suspension of fellowship benefits during the six-week period, the student will be eligible for substitute payment from the Childbirth Accommodation Fund.

Coursework, Research, and Clinical Activities

Approval of an Academic Accommodation Period will stop the academic and research clocks with regard to assignments due, reports anticipated, or other class- and research-related requirements. It does not, however, waive class attendance requirements for students in the Law School or clinical training or other requirements in the School of Medicine. Students in other schools are expected to attend class and participate in seminars to the extent that the health of mother and newborn and the demands of caring for an infant allow. Faculty or relevant staff are expected to work with the student to make arrangements for submitting work for completion of requirements when the student returns, and to grade it promptly so as to remove any “Incomplete” notations as rapidly as possible. Faculty members are encouraged to assign “N” and “L” grades, where appropriate.

11.8 OWNERSHIP AND USE OF STANFORD NAME AND TRADEMARKS

Stanford registered marks, as well as other names, seals, logos, and other symbols and marks that are representative of Stanford, may be used solely with permission of Stanford. Merchandise bearing Stanford’s names and marks, such as t-shirts, glassware, and notebooks, must be licensed. For complete text of the currently applicable policy, including the University officers authorized to grant permission to use the Stanford name and marks, see Administrative Guide memo 15.5, Ownership and Use of Stanford Name and Trademarks at

11.9 COMPUTER AND NETWORK USAGE POLICY

For a complete text of the currently applicable version of this policy, see Administrative Guide Memo 62, Computer and Network Usage Policy, available at

POLICY

The following is quoted from the policy:

Users of Stanford network and computer resources have a responsibility not to abuse the network and resources. This policy provides guidelines for the appropriate and inappropriate use of information technologies.
SUMMARY

The following summarizes the policy on Computer and Network Usage:

In particular, the policy provides that users of University information resources must respect software copyrights and licenses, respect the integrity of computer-based information resources, refrain from seeking to gain or permitting others to gain unauthorized access, including by sharing passwords, and respect the rights of other computer users.

This policy covers appropriate use of computers, networks, and information contained therein. As to political, personal and commercial use, the University is a non-profit, tax-exempt organization and, as such, is subject to specific federal, state, and local laws regarding sources of income, political activities, use of property, and similar matters. It also is a contractor with government and other entities, and thus must assure proper use of property under its control and allocation of overhead and similar costs. For these reasons, University information resources must not be used for partisan political activities where prohibited by federal, state, or other applicable laws, and may be used for other political activities only when in compliance with federal, state, and other laws, and in compliance with applicable University policies. Similarly, University information resources should not be used for personal activities not related to appropriate University functions, except in a purely incidental manner. In addition, University information resources should not be used for commercial purposes, except in a purely incidental manner or except as permitted under other written policies of the University or with the written approval of a University officer having the authority to give such approval. Any such commercial use should be properly related to University activities, take into account proper cost allocations for government and other overhead determinations, and provide for appropriate reimbursement to the University for taxes and other costs the University may incur by reason of the commercial use. Users also are reminded that the .edu domain on the Internet has rules restricting or prohibiting commercial use, and thus activities not appropriately within the .edu domain and which otherwise are permissible within the University computing resources should use one or more other domains, as appropriate.

The University’s Information Security Officer is authorized in appropriate circumstances to inspect or monitor private data (including e-mail), such as when there is a reasonable cause to suspect improper use of computer or network resources.

For further information on the topic of peer-to-peer file sharing, see the section below on Copyright.

11.10 COPYRIGHT

Copyright laws protect original works of authorship and give the owners of copyrights the exclusive right to do and to authorize others to do certain things in regard to a copyrighted work, including: make copies, distribute the work, display or perform the work publicly, and create derivative works. Copyright laws apply to nearly all forms of captured content, including traditional works like books, photographs, music, drama and sculpture. The laws also adapt to changes in technologies, and include in their scope modern forms of works like motion pictures, Web sites, electronic media, software, multimedia works and some databases. Registration is not required to obtain a copyright, so if in doubt, assume a copyright applies.

Unless an exception to the copyright owner’s exclusive rights applies, you must obtain permission from the copyright owner to copy, distribute, display or perform a copyrighted work in any medium for any purpose. Be especially mindful of copyright principles when using the Internet. Just because a work is posted on the
Internet does not mean that the owner of the copyright has given you permission to use it. And, you should not be posting material onto the Internet without copyright clearance.

Stanford University Libraries have licenses with many publishers, which permit copying of materials in accordance with the educational, research or administrative functions of the University. In addition, there are four major exceptions to the copyright owner’s exclusive rights, which (if applicable) permit limited use without permission. These are: the fair use exception, the library exception, the face-to-face teaching exception, and the distance-learning exception. For a more detailed explanation of these exceptions, the copyright laws and Stanford’s copyright policies, please review the University’s Copyright Reminder at

http://www-sul.stanford.edu/libraries_collections/copyright_reminders/

It is each person’s responsibility to be aware of and abide by copyright law; violation may result in civil or criminal liability, and constitutes grounds for University discipline, up to and including discharge, dismissal and expulsion.

**PEER-TO-PEER FILE SHARING**

The use of file-sharing networks and software to download and share copyrighted works like software, music, movies, television programs, and books can violate copyright laws. Both the person who makes an illegal copy of a copyrighted work available and the person who receives or downloads an illegal copy have violated the law and Stanford policies. Many file-sharing programs have default settings that share copyrighted files, such as music and movies, through the Internet. Before enabling any of these programs students, faculty, or staff must read the fine print, make sure to understand the program itself, and only use such programs lawfully. Under the Digital Millennium Copyright Act (DMCA), copyright owners are entitled to notify Internet service providers, such as Stanford, that IP addresses linked to the Stanford network are sharing copies of music, movies, or other content without authorization. The law requires the University to respond to such complaints by eliminating access to the infringing materials. Stanford will disconnect students who fail to respond to a DMCA complaint promptly, and Stanford will charge reconnection fees starting at $100 and going up as high as $1,000 for successive DMCA complaints. Furthermore, the University also will suspend or terminate computer access to the Stanford network, including termination of the SUNet ID, to members of the community who continue to violate copyright laws. Finally, the University will take action through the student, employee, or faculty disciplinary processes if necessary. Beyond University consequences, copyright holders may file civil lawsuits against copyright infringers seeking extensive monetary damages. If compelled by a lawful subpoena, Stanford may be required to identify students, faculty, staff, or others who have violated copyright law. For more information about file-sharing, refer to Residential Computing’s online resource, File-Sharing and Copyright Law at

http://rescomp.stanford.edu/info/dmca/

**SCHOOL OF MEDICINE COURSE CONTENT ACCESS AND APPROPRIATE USE POLICY**

Stanford University School of Medicine course materials are intended for curriculum and course-related purposes and are copyrighted by the University. Appropriate access to this content is given for personal academic study and review purposes only. Unless otherwise stated in writing, this content may not be shared, distributed, modified, transmitted, reused, sold or otherwise disseminated. These materials may also be protected by additional copyright; any further use of this material may be in violation of federal
copyright law. Violators of this policy will be referred to the Committee on Professionalism, Performance, and Promotion (CP3).

For examples and frequently asked questions see

http://med.stanford.edu/irt/edtech/policies/course_content_access.html

11.11 SMOKE-FREE ENVIRONMENT

SCHOOL OF MEDICINE SMOKE-FREE ENVIRONMENT

The following is quoted from the School of Medicine policy, effective September 1, 2007:

It is the policy of the Stanford University School of Medicine that smoking is prohibited anywhere on the School of Medicine campus. This prohibition includes all enclosed buildings and facilities and all outdoor areas on the footprint of the School of Medicine and at the James H. Clark Center. A map indicating the area subject to this policy may be found at

http://med.stanford.edu/tobaccofree/map/

Specifically, smoking is prohibited in classrooms and offices, all enclosed buildings and facilities, in covered walkways, in School vehicles, and in all outdoor areas within the boundaries of the School and the James H. Clark Center.

This policy relies on the consideration and cooperation of smokers and non-smokers. It is the responsibility of all members of the School community to observe and follow this policy and its guidelines. Faculty, staff and students repeatedly violating this policy may be subject to appropriate action to correct any violation(s) and prevent future occurrences.

Smoking cessation programs are available for faculty and staff through the Center for Research in Disease Prevention, Health Improvement Program (HIP):

http://hip.stanford.edu

Students may contact the Health Promotion Program (HPP) through the Vaden Student Health Center for smoking cessation information or programs:

http://vaden.stanford.edu/wellness/substanceAbuse.html

In addition, the School of Medicine Web site includes lists of resources and links to other smoking cessation programs:

http://med.stanford.edu/tobaccofree/

STANFORD HOSPITALS AND CLINICS (SHC) NON-SMOKING POLICY

The following is quoted from the Stanford Hospitals and Clinics (SHC) and Lucile Packard Children’s Hospital (LPCH) policy, approved March 2007:
It is SHC/LPCH policy to provide a smoke-free environment for patients, staff and visitors within the Hospital and Clinics and to comply with applicable no-smoking regulations.

No smoking is allowed by patients, employees, medical staff, volunteers, and visitors within any hospital and clinic buildings, interior patios, within the Stanford University Medical Center Loading Dock yard, or near all building entrances or windows.

There are no exceptions for any smoking inside the hospital or clinic buildings. Exterior smoking guidelines for psychiatric inpatients are established within the Psychiatric Inpatient Policy and Procedures.

All employees, medical staff, and volunteers are responsible for compliance and to help enforce this policy. Staff should remind anyone smoking inside buildings about the no-smoking policy and direct them to smoke outside.

Outdoor smoking areas at Stanford Hospital and LPCH are located away from building entrances. Outside smoking locations include Stanford Hospital on the west side benches alongside the Parking Garage at the end of the G-1 Wing Building, and in the H-2 outside psychiatric patients’ patio (this area is not open to the general public). At LPCH, the smoking area is along the west side of the hospital.

11.12 CAMPUS SAFETY AND CRIMINAL STATISTICS
