

VOLUNTEERS NEEDED FOR ALZHEIMER'S DISEASE RESEARCH STUDY

STUDY OVERVIEW:

The purpose of the study is to learn through imaging how iron is involved in Alzheimer's disease.

You will be asked to complete **PET-MRI** and **7T MRI** studies at Stanford for up to three imaging sessions. Each visit will take around **2-3 hours**. Participants will be compensated \$200 for their time.

ARE YOU PARTICIPATING IN THE HEALTHY BRAIN AGING STUDY WITH THE ADRC?

If yes, let us know! If you have had any PET MRI(s) with the ADRC, or are scheduled for these scans, you have already completed parts of this study.

PROTOCOL DIRECTOR: Michael Zeineh, MD, PhD

If you are interested in participating, or if you have any questions, please contact **Nicole Mouchawar:**
(650) 391-6506, nmouchaw@stanford.edu

Participant's rights questions, contact 1-866-680-2906
