

# Workshop on Neurobehavior

Neurobehavioral Phenotyping for Disease Models and Drug Discovery

June 24-30, 2023 at Stanford University

The Workshop is a week-long, in-person, interactive course on practical, mechanistic, and ethological aspects of behavioral phenotyping, with emphasis on applications for neurodegenerative disease models and drug discovery. There will be a two day kickoff symposium, June 24<sup>th</sup>-26<sup>th</sup> taught by scientists at the forefront of the Behavior field.

Topics include: Learning & Memory, Sensory & Motor, Anxiety & Depression, Addiction, and Automated Methods

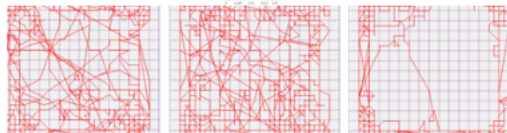

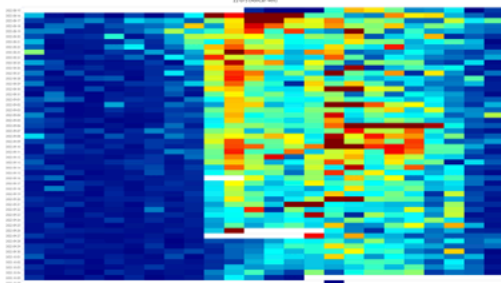

## Fees

- No cost to attend
- Housing provided
- Travel costs not included

## Applications

- Due March 3
- Early applications receive priority
