Novel Strategies For The Treatment Of Neurologic Disorders

May 9, 2020 | 8:30am - 4:30pm
Four Seasons Hotel, Hong Kong

Distinguished faculty and experts from Stanford University School of Medicine and the Greater Bay Area of China will discuss:

- Acute stroke intervention
- Treatment of primary brain tumors including CyberKnife Radiosurgery
- Updates on spine surgery and cerebrovascular surgery
- Medical treatment for movement disorders
- Epilepsy
- Developments in pediatric neurosurgery
- Neuromodulation and brain stimulation for various neurologic diseases
- Virtual reality
- Stem cell therapy

The meeting will provide the opportunity to exchange information and ideas and explore collaboration for both clinical work and basic science research.
