The Division of Oncology in the Department of Medicine at Stanford University is recruiting a health services researcher in Oncology. The faculty position is at the Assistant Professor level in either the University Tenure Line (UTL) or the Medical Center Line (MCL). The successful candidate should be accomplished in health services research, involving research on access, quality, cost, disparities, or outcomes relevant to cancer care.

The predominant criterion for appointment in the UTL is a major commitment to research and teaching. The major criteria for appointment for faculty in the MCL shall be excellence in the overall mix of clinical care, clinical teaching, scholarly activity that advances clinical medicine, and institutional service—appropriate to the programmatic need the individual is expected to fulfill.

The successful candidate will be expected to build a strong health services research program and participate in the educational, and if applicable the clinical, activities of the Division of Oncology at either Stanford or the VA. We expect the candidate will work with other Stanford faculty in health services research.

Candidates with an MD or MD/PhD and board certified or board eligible in Medical Oncology and/or Hematology will be preferred. The Division of Oncology benefits from an outstanding scientific and clinical environment at Stanford, including active collaborations with the basic science departments and the Stanford Cancer Institute, as well as active collaborations with the Palo Alto Medical Foundation Research Institute (PAMFRI) and the Cancer Prevention Institute of California (CPIC).

Candidates should submit a curriculum vitae, a brief letter outlining their interests, and names and addresses of three references to:
