STANFORD UNIVERSITY

How Social Is Your Child?

Stanford University researchers are currently recruiting healthy children for a study about the relationship between social behaviors and biomarkers such as oxytocin.

In order to participate in this research study your child must:

*Be between the ages of 6 to 12 years

*Be in good medical health and not have a neuropsychiatric disorder

*Be willing to provide a blood sample and complete IQ testing at Stanford

There is no cost to participate and your child will be paid up to $50 for fully completing this study.
