“Interesting Cases in Ultrasound-Guided FNA and Core Biopsy”

David Ken Wah Lieu, MD, MBA
Interventional Cytopathologist,
Fine Needle Aspiration Medical Group in Alhambra and Los Alamitos, CA

Thursday • March 12, 2020
8:30 - 9:30 am • Lane Building • L201

This presentation is a 1 hour case based lecture presenting interesting and unusual cases that one might think would not be possible to diagnose by pathologist performed UG-FNA/CNB. There is emphasis on cases that were misdiagnosed by clinicians, radiologists, and surgeons when they attempted FNA or even open biopsy.

Faculty Host: Thomas J. Montine, MD, PhD, Department of Pathology. This Lecture is open to faculty, trainees and students affiliated with Stanford University School of Medicine. Contact Camille Casal cacasal@stanford.edu or (650) 498-1746 for more information.
