Important Information for Pediatric Cardiology Camp Attendees

Costs and Fees
- The costs of registration, flight, meals, hotel, simulation based equipment, transportation to and from the conference, and educational items will be provided at NO COST to you.
- If you are traveling from outside of the Bay Area, a hotel room in Palo Alto, California will be booked for you in your name for Thursday April 27, Friday April 28, and Saturday April 29. If you would like to extend your hotel stay at the discounted rate you may do so but the boot camp will only be paying for the above nights.
- Transportation from the airport to your hotel and from the conference to the airport at the conclusion of the boot camp will be arranged. Transportation will also be provided from the hotel to the boot camp and then from boot camp back to the hotel each day.
- All meals will be provided free of charge at the conference.

Reimbursement
- We will book all of the above transportation and hotel rooms. Stanford will not be providing any reimbursement for any costs related to this event.

Research Component
- The primary objectives of this event are educational. We are always striving, though, to improve the boot camp experience and to learn if some of the educational tools we are using are effective. As such, there will be a research component to the event so that we can gauge the effects of some of our teaching and learning modules. All research related activities (such as testing) will be anonymous and not feedback, scores, or other metrics will be shared with your program director.

Expectations
- As part of agreeing to be a part of this training program, you agree to complete all pre and post training surveys and all pre- and post-training testing.
- We will likely also be designing pre-boot camp training modules. These modules provide basic teaching in some core areas of pediatric cardiology and are designed to improve your knowledge of pediatric cardiology. These modules may take up to 3-5 hours to complete and you will be required to complete these in order to attend the boot camp in April 2017.
