The Department of Psychiatry and Behavioral Sciences is seeking 1-2 research scientists to lead independent scholarly research and teach in the interdisciplinary area of sleep and mental health science. Researchers whose work has the potential for direct translation to clinical care are particularly encouraged. Significant research training and a demonstrated track record of empirical research is required. Candidates should have an MD or PhD in psychology, neuroscience, neurobiology, or a related discipline. Clinical care is optional, should a clinician scientist be selected for the faculty position.

Appointment at the rank of Assistant or Associate Professor in the University Tenure Line or the Non Tenure Line-Research will be commensurate with qualifications and experience.

The predominant criterion for appointment in the University Tenure Line is a major commitment to research and teaching. The major criterion for appointment for faculty in the Non Tenure Line-Research is evidence of high-level performance as a researcher for whose special knowledge a programmatic need exists. Faculty rank and line will be determined by the qualifications and experience of the successful candidate.

Stanford is an equal employment opportunity and affirmative action employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, protected veteran status, or any other characteristic protected by law. Stanford welcomes applications from all who would bring additional dimensions to the University’s research, teaching and clinical missions.

Interested candidates should send a brief letter outlining their interests, their curriculum vitae, and the names of three references to:
