

Stanford MEDICINE | Department of Psychiatry and Behavioral Sciences

Brain Imaging and Addiction Neuroscience

Assistant Professor

Non-Tenure Line (Research)

Department of Psychiatry and Behavioral Sciences

Stanford University School of Medicine

The Department of Psychiatry and Behavioral Sciences at the Stanford University School of Medicine, seeks 1-2 research scientists with expertise in human and/or animal brain imaging as applied to neuropsychiatric and addiction disorders to join our faculty at the rank of Assistant Professor in the Non-Tenure Line (Research).

The successful applicant(s) should have significant brain imaging expertise as related to psychiatry and/or neuroscience, and experience integrating multidisciplinary conceptual and factual information across related dimensions of inquiry (e.g. neuroimaging, cognition, behavior). Excellent training and an established track record of scholarly research are expected. Candidates should have a PhD or MD/PhD with the PhD being in neuroscience, pharmacology, computer science, biomedical engineering or a related discipline. The chosen candidate(s) will conduct teaching and cutting-edge, cross-disciplinary brain imaging research as it relates to psychiatric and addiction disorders. A demonstrated ability to work in a collaborative, transdisciplinary and interactive environment is required.

The major criterion for appointment for faculty in the Non-Tenure Line (Research) is evidence of high-level performance as a researcher for whose special knowledge a programmatic need exists.

Stanford is an equal employment opportunity and affirmative action employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, protected veteran status, or any other characteristic protected by law. Stanford welcomes applications from all who would bring additional dimensions to the University's research, teaching and clinical missions.
