The Department of Psychiatry and Behavioral Sciences at the Stanford University School of Medicine is seeking 1-2 full-time faculty members to provide clinical care and teaching in the area of schizophrenia and other psychotic disorders. This position requires skills and experience in clinical innovation, organizational management, clinical care, and teaching. It may include a research component if desired by the chosen applicant, but research is not required. The Department’s existing program in psychosis consists of a multidisciplinary team comprising psychiatry, psychology, and social work collaborating closely with our inpatient unit and student mental health center. As a training center, the clinic routinely incorporates medical students, residents, fellows, and psychology post-doctoral students. Stanford Department of Psychiatry and Behavioral Sciences is the coordinating site for the Prodrome and Early Psychosis Program Network (PEPPNET) with opportunities for the candidate to become involved in early psychosis program development at a national level.

This position is open to psychiatrists with subspecialty training or other relevant expertise in treating schizophrenia and other psychotic disorders. Candidates must have a medical degree (or equivalent), be licensed or license-eligible in California, and hold board certification in Psychiatry by the American Board of Psychiatry and Neurology.

Rank and salary will be commensurate with experience.

Stanford is an equal employment opportunity and affirmative action employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, protected veteran status, or any other characteristic protected by law. Stanford welcomes applications from all who would bring additional dimensions to the University’s research, teaching and clinical missions.

Interested candidates should send a cover letter, current curriculum vitae, and the names of three references to:
