The Department of Psychiatry and Behavioral Sciences at the Stanford University School of Medicine, seeks a research scientist with expertise in computational modeling as applied to psychiatry and/or neuroscience to join the Department as an Assistant Professor, Associate Professor, or full Professor in either the University Tenure Line or Non-Tenure Line (Research).

The successful applicant should have significant computational modeling expertise as related to psychiatry and/or neuroscience and experience integrating multidisciplinary conceptual and factual information across related dimensions of inquiry (e.g. neuroimaging, cognition, behavior). Excellent training and an established track record of scholarly research are expected. Candidates should have a PhD or MD/PhD with graduate degrees (or comparable experience) in computer science, neuroscience, psychology, biomedical engineering, statistics or a related discipline. Clinician applicants must possess clinical doctoral level training in General Psychiatry, Psychology, or a related clinical field, and be currently licensed or fully eligible for a California medical license or a California license to practice clinical psychology. The chosen candidate will conduct teaching and cutting-edge, cross-disciplinary computational research as it relates to psychiatric and neurodevelopmental disorders. If a clinician is chosen, clinical care for patients with psychiatric and/or neurodevelopmental disorders may also be a component of the position. This position requires a demonstrated ability to work in a collaborative, transdisciplinary and interactive environment.

The predominant criterion for appointment in the University Tenure Line is a major commitment to research and teaching. The major criterion for appointment for faculty in the Non-Tenure Line (Research) is evidence of high-level performance as a researcher for whose special knowledge a programmatic need exists.

Stanford University is an equal opportunity employer and is committed to increasing the diversity of its faculty. It welcomes nominations of and applications from women, members of minority groups, protected veterans and individuals with disabilities, as well as from others who would bring additional dimensions to the university’s research, teaching and clinical missions.

To apply, please submit a CV, brief letter, and the names of three references to:
