

Stanford MEDICINE | Department of Psychiatry and Behavioral Sciences

Addiction Medicine

Medical Center Line or Clinician Educator Line
Assistant, Associate or full Professor rank
Department of Psychiatry and Behavioral Sciences
Stanford University School of Medicine

The Department of Psychiatry and Behavioral Sciences at the Stanford University School of Medicine is seeking to fill four full-time positions in our growing Addiction Medicine Program, as part of a plan to develop a youth addiction service. The strategic expansion of our Addiction Medicine Program is supported by generous philanthropic funding from the Taube Foundation. The chosen candidates will be appointed in the Medical Center Line or the Clinician Educator Line. Rank and salary will be commensurate with experience. Programmatic areas of need are as follows:

* **Director of the Youth Addiction Medicine Program.** This position will be responsible for leadership and oversight of the clinical, research, and training mission of the youth addiction service program. This appointment may be to the Clinician Educator line, or to the Medical Center Line if the selected faculty member has an established record of independent scholarship that is expected to continue going forward.

* **Clinician Scientist.** This position will be a clinician scientist with an independent scholarly research portfolio in the area of addiction medicine in relation to adolescents and young adults, and clinical and teaching expertise in child psychiatry or psychology.

* **Two Clinician Educators.** These Clinician Educators will provide expert clinical care and teaching of child and adolescent psychiatry and psychology trainees in the area of youth addiction. One will be focused upon programmatic clinic needs, while the other will primarily build addiction medicine networks and community collaborations.

Our existing program in Addiction Medicine consists of an ambulatory outpatient dual diagnosis clinic, including medication assisted treatment, and individual, and group psychotherapy. The clinic primarily serves adults, but also provides care for some older adolescents. The Department collaborates with our partners in clinics in other departments (Pain and Primary Care) to best serve the needs of our patients. Our Addiction Medicine Fellowship Training Program is ACGME accredited. We train two fellows per year from diverse specialties, and the program will continue to expand.

These positions are open to physicians with expertise in addiction medicine/addiction psychiatry and experience treating adolescents and young adults. Psychologists with adolescent addiction medicine expertise will also be considered. Physician applicants must have a medical degree (or equivalent), be licensed or license-eligible in California, have an X-waiver license to prescribe buprenorphine, specialty board certification in addiction medicine, and significant experience in the diagnosis and management of adolescents with

addictive disorders. Fellowship training in Addiction Medicine or Addiction Psychiatry is highly desired. Psychologist applicants must have a PhD or PsyD from an APA accredited clinical psychology program, completion of an APA-accredited internship, a minimum of one year of postdoctoral training in child psychology, and evidence of experience and expertise treating adolescent addiction. Preference will be given to psychologist applicants who have completed the EPPP and are currently licensed in the state of California.

Ideally, the chosen candidates would have experience in working in multidisciplinary clinical care services for patients with substance use disorders.

The major criteria for appointment for faculty in the Medical Center Line shall be excellence in the overall mix of clinical care, clinical teaching, and a history of scholarly activity that advances clinical medicine, and institutional service appropriate to the programmatic need the individual is expected to fulfill. The major criteria for appointment, reappointment and promotion for faculty in the Clinician Educator Line is excellence in the overall mix of clinical care, teaching, administrative and/or scholarship appropriate to the programmatic need the individual is expected to fulfill.

Faculty rank will be determined by the qualifications and experience of the successful candidate.

Stanford is an equal employment opportunity and affirmative action employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, protected veteran status, or any other characteristic protected by law. Stanford welcomes applications from all who would bring additional dimensions to the University's research, teaching and clinical missions.

Interested candidates should send a cover letter, current curriculum vitae, and the names of three references to:
