The Departments of Neurosurgery and Psychiatry & Behavioral Sciences at Stanford University seek an Interventional Psychiatrist to expand the departments’ academic and clinical programs. The successful candidate will be appointed at the Assistant, Associate or Full Professor rank in the Medical Center Line (MCL) based on qualifications and experience.

The major criteria for appointment for faculty in the MCL shall be excellence in the overall mix of clinical care, clinical teaching, scholarly activity that advances clinical medicine, and institutional service appropriate to the programmatic need the individual is expected to fulfill.

The candidate must be board-eligible or board-certified from the ABPN, and eligible for a California medical license. It is expected that the candidate will spearhead programs in Interventional Psychiatry to include the following areas of interest: brain stimulation, radiosurgery, focused ultrasound and transmagnetic stimulation for depression, OCD and other psychiatric disorders. It is also expected that the candidate will develop an academic career with responsibilities including patient care, teaching, and clinical or laboratory research.

Interested candidates should send a copy of their curriculum vitae, statement of research interests and names of three referees to ns_interpsych@lists.stanford.edu, addressed to:

Charles D. DeBattista, M.D.
