The Department of Psychiatry and Behavioral Sciences at Stanford University School of Medicine is seeking a full-time faculty member at the rank of Assistant or Associate Professor in the Medical Center Line or Non-Tenure Line (Research). This position is a research, teaching, and administrative leadership role encompassing the areas of sleep and circadian science specifically in relation to mental illness. Specifically, this faculty member will serve as the Sleep Core Leader for the Sierra-Pacific Mental Illness Research, Education and Clinical Center (MIRECC) based at the Palo Alto VA Health Care System. Experience conducting multi-dimensional sleep-related research that integrates conceptual and factual information across related dimensions of inquiry, such as clinical trials, behavioral science, neuroimaging, neuroscience, and/or genomics, is expected. Excellent training and an established track record of research are expected. Candidates should have a MD, PhD or MD/PhD with graduate degrees (or comparable experience) in sleep disorders, circadian rhythms neuroscience, psychology, psychiatry, or a related discipline. Clinician applicants must possess clinical doctoral level training in General Psychiatry, Psychology, or a related clinical field, and be currently licensed or fully eligible for a California medical license or a California license to practice clinical psychology. The chosen candidate will conduct teaching and cutting-edge research as it relates to sleep and circadian rhythms in mental illness with a particular focus on the older Veteran. If a clinician is chosen, clinical care for patients with psychiatric and/or sleep disorders may also be a component of the position. The demonstrated ability to work in a collaborative, transdisciplinary and interactive environment is a requirement. The successful applicant must be a U.S. citizen to be eligible for employment with the U.S. Department of Veterans Affairs.

- The major criteria for appointment for faculty in the Medical Center Line shall be excellence in the overall mix of clinical care, clinical teaching, scholarly activity that advances clinical medicine, and institutional service appropriate to the programmatic need the individual is expected to fulfill.
- The major criterion for appointment for faculty in the Non-Tenure Line (Research) is evidence of high-level performance as a researcher for whose special knowledge a programmatic need exists.

Stanford University is an equal opportunity employer and is committed to increasing the diversity of its faculty. It welcomes nominations of and applications from women, members of minority groups, protected veterans and individuals with disabilities, as well as from others who would bring additional dimensions to the university’s research, teaching and clinical missions. Interested candidates should send a copy of their curriculum vitae, a brief letter outlining their interests, and the names of three references via e-mail only to:
