Gary M. Glazer Lectureship
“Imaging in the Age of Precision Medicine”

James H. Thrall, MD
Chairman Emeritus, Department of Radiology
Massachusetts General Hospital
Professor of Radiology
Harvard Medical School

Thursday, May 23, 2013
5:30 PM – 6:30 PM
LPCH Freidenrich Auditorium

Reception: 6:30 PM – 7:00 PM

ABSTRACT
The increasing ability to establish genotypic characteristics of individual patients and the genotypes of diseases such as cancer and the ability to establish better phenotypic cohorts is resulting in more precise diagnosis. In turn, this will allow more precise selection of therapy. Imaging is poised to play major roles in the age of precision medicine. Among many other applications, imaging biomarkers serve as proxies for phenotype manifestation of disease and imaging is often the most immediate and best way of assessing response to therapy with the unique ability to survey the entire body.

Accreditation
The Stanford University School of Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Credit Designation
The Stanford University School of Medicine designates this live activity for a maximum of 1.00 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Cultural and Linguistic Competency
California Assembly Bill 1195 requires continuing medical education activities with patient care components to include curriculum in the subjects of cultural and linguistic competency. The planners and speakers of this CME activity have been encouraged to address cultural issues relevant to their topic area. The Stanford University School of Medicine Multicultural Health Portal also contains many useful cultural and linguistic competency tools including culture guides, language access information and pertinent state and federal laws. You are encouraged to visit the portal: http://lane.stanford.edu/portals/cultural.html
