

Can rTMS improve memory and thinking?

Repetitive Transcranial Magnetic Stimulation for Mild Cognitive Impairment

Are you:

- ***55 to 90 years old?***
- ***Experiencing memory problems
consistent with Mild Cognitive Impairment?***

If yes, we'd like to hear from you.

Please call (650) 852-3457.

Or, ask your doctor about MCI or rTMS research.

- ❖ Repetitive Transcranial Magnetic Stimulation (rTMS) delivers neurostimulation in an outpatient clinic. rTMS has shown therapeutic promise in early clinical trials.
- ❖ Participants will have a 2/3 chance of receiving active (real) rTMS in this study. The remaining 1/3 of participants will serve in a placebo-control group and receive inactive rTMS.
- ❖ This study requires frequent treatment visits to the Palo Alto VA for 2 to 4 weeks. Then there will be two follow-up clinic visits.
- ❖ *Veterans and Non-Veterans* will receive study treatments at no cost to them, and will receive financial compensation for their time.

For more information, please call (650) 852-3457.

We are located in Building 5, 3801 Miranda Ave, Palo Alto, CA 94304.
