The [Tobacco Prevention Toolkit](#) is a peer-reviewed, research-informed and validated set of curriculums to help prevent students from starting or escalating use of any tobacco product.

The Toolkit and all curriculums (see Core Curriculum Menu document) and courses were developed in consultation with and reviewed by youth, educators, and health care providers.

With the wide array of new forms of "smoking", smoking devices and increase in vaping, and given that many young people are using tobacco, cannabis, and e-cigarettes, discussing this Triangulum or the intersection of all three products is important. As such, in addition to the Tobacco Prevention Toolkit, we have lessons in our Cannabis Awareness and Prevention Toolkit that you can use alone or in conjunction with the Tobacco Prevention Toolkit.

We provide trainings to help you implement the Toolkit and related curriculums. Below we provide the logistics and menu of training options available.

Implementation and training cost: FREE

Training logistics:

- 90-minute virtual training via Zoom
- Limited to 40 participants per training
- Receive an overview of the Toolkit
- Practice navigating the website
- Receive technical assistance
- Hear about the increased health risks of using tobacco/nicotine during the COVID-19 pandemic
- **Complete our Training Request Form if interested in a training:** <https://tinyurl.com/TPT-Training>

Virtual Training Menu
