

Panel Builder Component

Description of Component

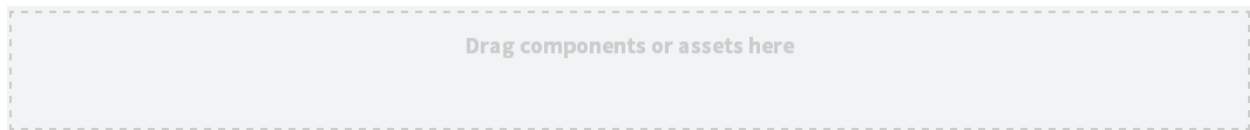

The Panel Builder component is used to build content panels with either a single column or up to three columns configured with different column percentages and with a white background or not.

How to Use the Component

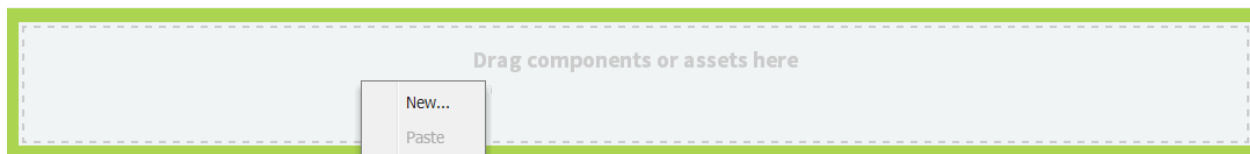

1. You can identify the Panel Builder component in the Web Author toolkit as follows:

2. Drag the component onto the page in the place where you want the text to display.

3. Or, right click and select New.

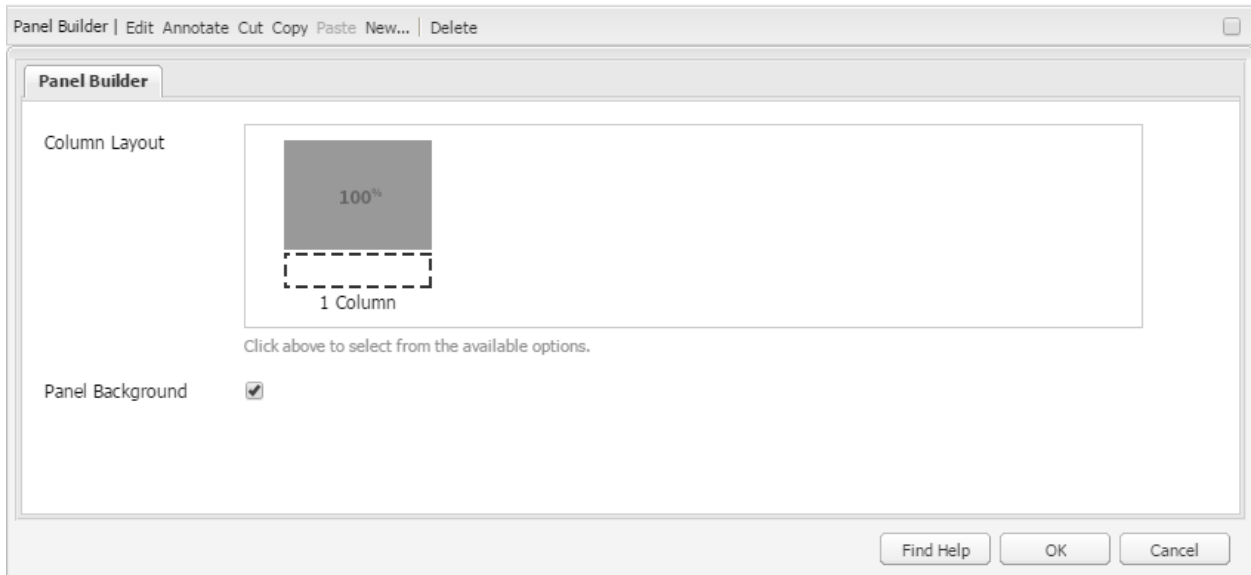

The component displays on the web page.

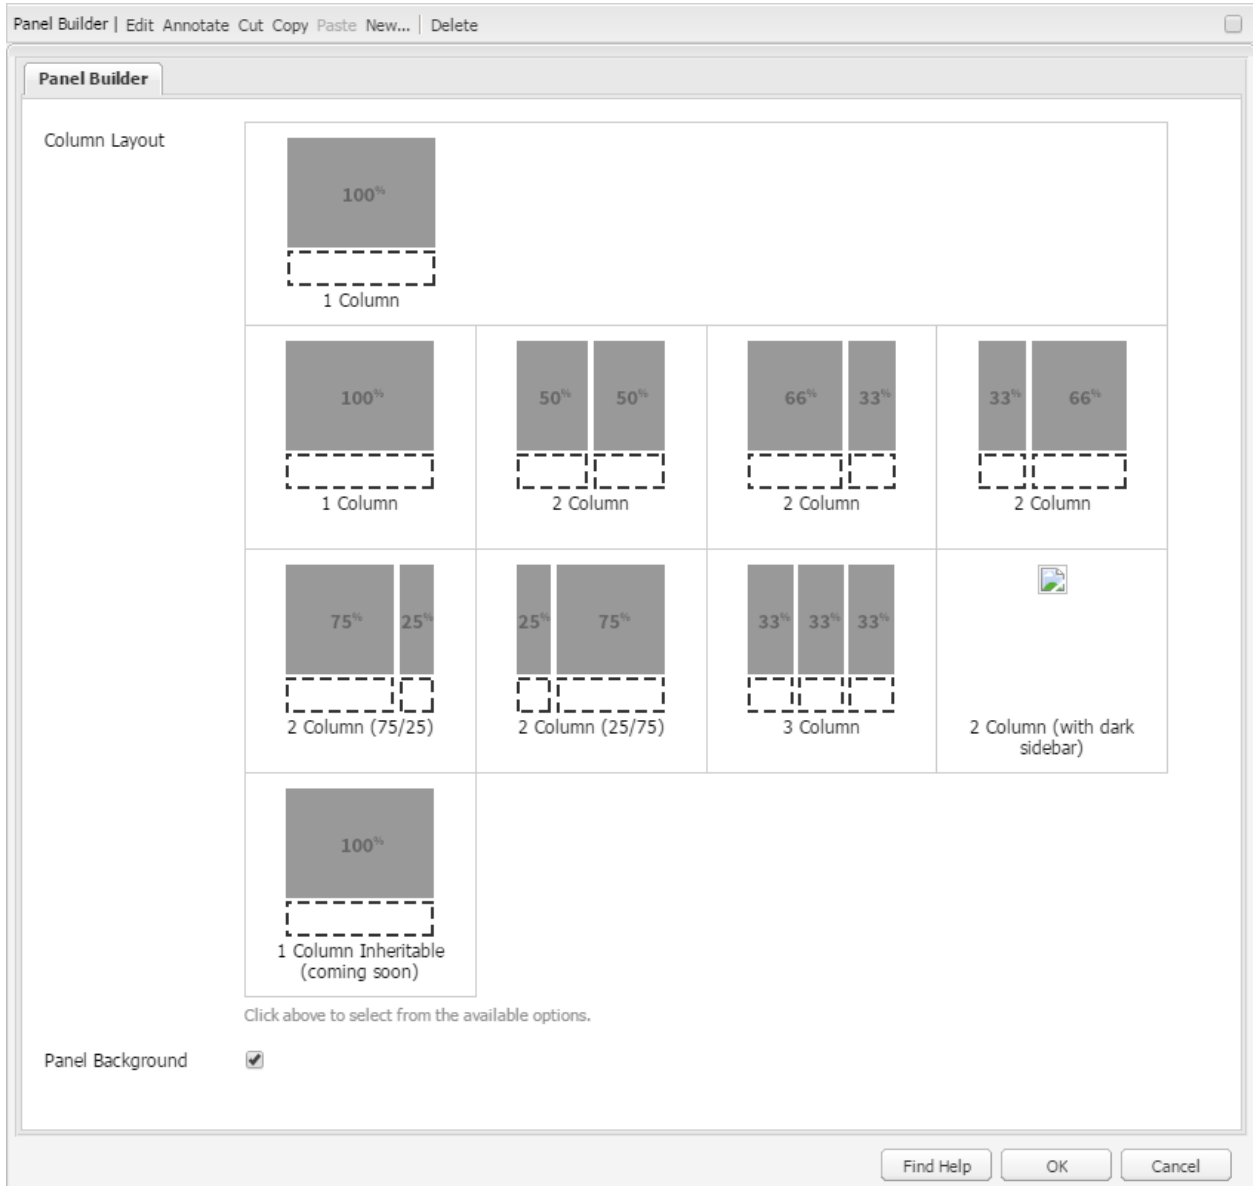

4. Click Edit to edit the panel.

5. Click the image to display the column options.

6. Depending on the template you use, the options below will be varied. Click the column set-up you wish to use.

7. Select to have a panel background show as white. Check the box or deselect to not have a panel background.

8. Click OK to save the changes and to display on the web page.

You can also click on the Help button to view additional Help related materials.

Results

You can now drag and drop components into the columns or right click to add a new component.
