

Table Component

Description of Component

The Table component allows a web author to create a custom table on a web page.

How to Use the Component

1. You can identify the Table component in the Web Author toolkit as follows:

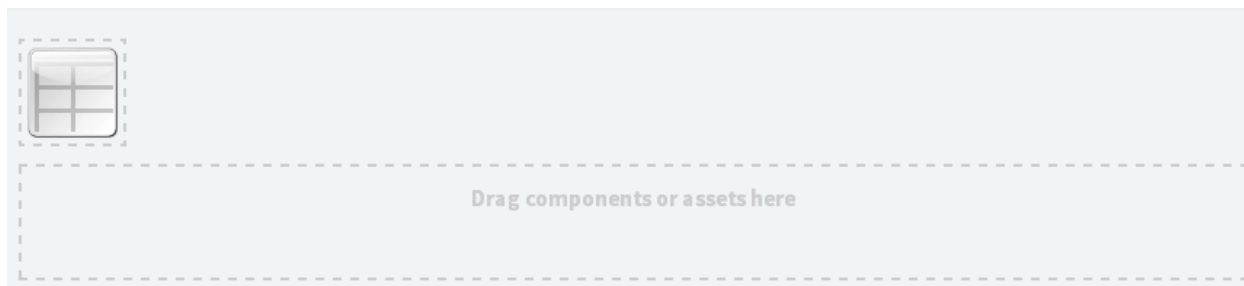

2. Drag the component onto the page in the place where you want the text to display.

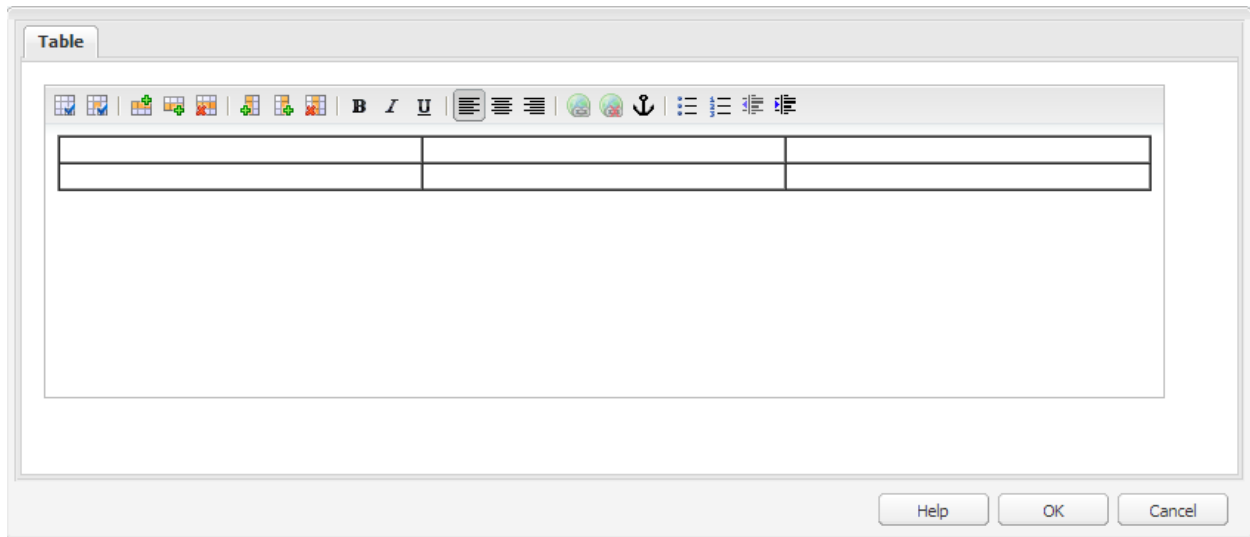

3. Or, right click and select New.

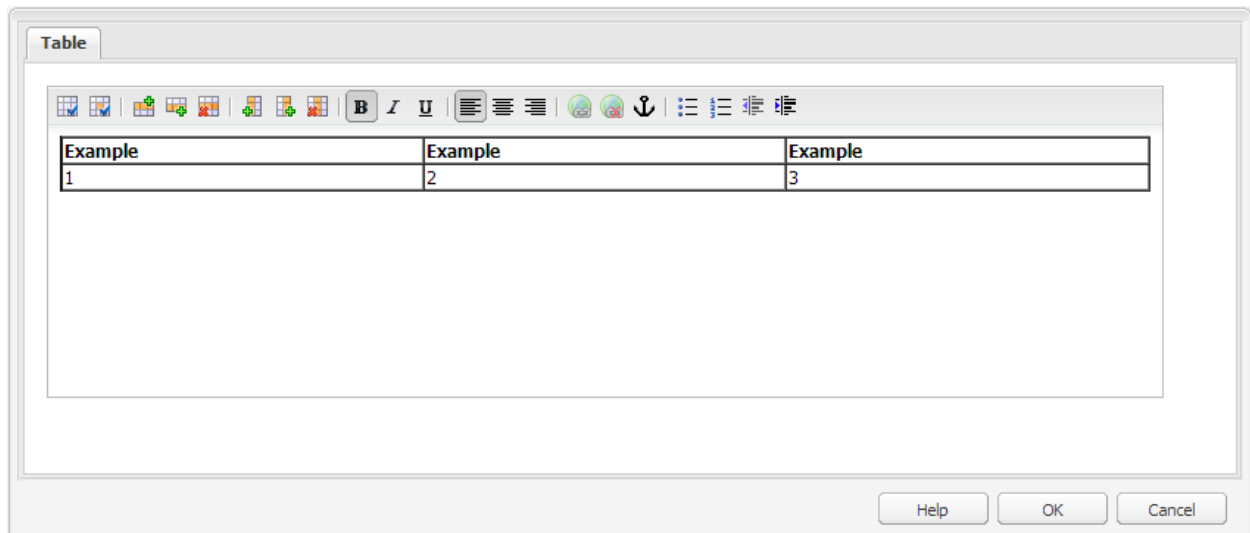

The component displays on the web page similar to the example below.

4. Right click or double click to open the component.

5. By default the table displays as above. You can create a custom table with the necessary columns and using the toolbar.

6. Click OK to save the results and display on the page.
