BRIEF VOCATIONAL PLANNING SCREEN

This should be completed at least annually for all CIC participants, unless there is an extenuating circumstance that removes work or school as a possible recovery goal.

Client: CMMHC#: Date:

1. What are your thoughts about looking for employment at the present time? Are you considering this?

2. (If considering getting a job) Why are you thinking this might be a good idea?

   or

3. (If are not interested in work) Why are you not interested in working??

4. If you would like to look for employment, would you be interested in the Vocational Specialist assisting you in finding a job? For example, we could help you complete a resume or applications, identify job openings, prepare for interviews, figure out your strengths and interests to find a position you would like—does any of that sound like you might want to have that kind of support?

We have been talking so far about employment—now I would like to switch briefly to talking about education

1. Are you interested in going back to school in the next few months? Is there anything you want to study? (If no, you can end the interview—if yes, note answer and continue)

2. Why do you want to go to school?

3. What would you like to study?

4. Would you be interested in the NAVIGATE Vocational Specialist assisting you in going to school? We could help, for example, with visiting campuses, completing applications, seeking financial aid, developing your study skills, managing the social side of school—would any of that be of interest to you?
