

**Radioactive  
Material  
Release or Spill**

**A radiation emergency  
or release occurred**

**Attend to anyone in immediate danger.**

Call **286**

**Tell the Operator:**

- Your name, dept., phone number
- Description of the injured, if any
- Building name, room number
- Isotope, amount or type of equipment malfunction
- Where you are evacuating to
- Other pertinent information

**Stay on the line until operator releases you.**

**Close all doors to radiation area**

**DO NOT clean up the spills**  
(unless trained and equipped to do so)

**The Operator will notify SU Health  
Physics and other Response Personnel**

**Provide information to  
Emergency Responders.**

- Wait outside the spill area until responders arrive.
- Keep people out of spill area.

**The Director of Health  
Physics assumes  
responsibility for  
radiation  
as soon as they are  
notified.**

**If a person has been  
exposed to radioactive  
material,** call or ask

someone  
to call 286 for  
assistance.

Remain in a safe place  
until help arrives or  
person can be safely  
transported to the ER

If the spill or release  
gets into sanitary sewer  
or storm sewers, report  
this information to SU  
EH&S  
723-0448 (24 hour line)
