Genentech: Research Associate/Sr. Research Associate - Oncology Biomarker

The Position:
The Department of Oncology Biomarker Development (OBD) at Genentech is currently seeking a highly motivated Research Associate/Sr. Research Associate. OBD is one of the Departments within Development Sciences / Early Development focused on the translation of new molecular entities from Research into Development. This is an exciting opportunity to participate in, and to enable, our vision of targeting candidate medicines to those patients most likely to derive clinical benefit.

Responsibilities:

The successful candidate will be responsible for the identification and validation of biomarkers, the development and validation of biomarker assays / novel technologies and their implementation in clinical development to aid the advancement of novel cancer therapeutics.

Requirements:

- BS/MS/PhD degree in life sciences with 5-10 years of experience in academic or industry laboratory setting.
- Strong interest in science, track records of publications, in-depth and broad understanding of cancer omics is desired.
- Enthusiastic, dedicated, self-motivated, creative, team oriented, able to multi-task, and meet timelines efficiently and productively.
- Ability to independently design, perform and analyze biological experiments.
- Solid hands-on experience with molecular and cell biology techniques.
- Outstanding organizational, communication, and people interaction skills.
- Oncology research experience is a plus.
