

Autism Parent Support Group

Sponsored by the
Stanford Autism Center at
Packard Children's Hospital

Parents of children with autism face a unique set of challenges. The opportunity to connect with other families who have been through similar experiences can be a valuable form of support.

Please join our monthly support group!

Topics for discussion will include:

- * Advocating for your child
- * Dealing with the impact on the entire family
- * Navigating school and learning issues
- * Investigating treatment options and resources

Please note that the support group is not intended to serve as therapy or other mental health services.

Meetings
