

Marina Basina, MD

Clinical Associate Professor

Department of Medicine - Endocrinology,
Gerontology, & Metabolism, Stanford
University

Marina Basina, MD is a clinical endocrinologist and clinical researcher with a focus in diabetes management and diabetes technology. Her primary interests are in Type 1 Diabetes, Diabetes technology, and Diabetes in pregnancy.

She has a busy clinical practice at Stanford Hospital and Clinics seeing patients in both inpatient and outpatient settings. She serves as medical director of inpatient diabetes service at Stanford. Dr. Basina received numerous teaching awards and a Stanford Hospital award for excellence in patient care.

She leads support groups for individuals with type 1 diabetes. She is an active member of medical advisory board for several community diabetes organizations (Carb DM, T1DSugar Mommas, Beyond Type 1), and gives educational talks for patients on a regular basis.

She is a co-investigator of ECHO Type 1 Diabetes project Extension for Community Healthcare Outcomes that serves for empowering primary care providers to improve health outcomes for underserved patients with T1D.
