

## **Savitha Subramanian, MD**

Associate Professor of Medicine  
University of Washington

Savitha Subramanian, MD is an associate professor at the University of Washington Division of Metabolism, Endocrinology and Nutrition. She is the Medical Director of the UW Lipid Clinic with special expertise in genetic lipid disorders, partial lipodystrophy and complex diabetes. She is extensively involved in a collaborative care model for diabetes working with primary care physicians in the greater Seattle area. As the physician lead for diabetes population health management for UW Medicine she has developed standardization pathways for outpatient diabetes management for primary care.

Nationally, Dr. Subramanian is a member of the Endocrine Society's Endocrine Self-Assessment Program workgroup, and the Lipid Management Guideline task force. She has recently joined the American Board of Internal Medicine's Endocrinology Examination Committee. Locally, Dr. Subramanian conducts many teaching activities for trainees and clinicians, including the popular Diabetes and Endocrine Update for Primary Care CME courses for the University of Washington.
