A Roadmap (5 Ps) for Completion of an Educational Research Project

Bani M. Ratan, MD, EdD, associate professor, Department of Obstetrics and Gynecology and Department of Education, Innovation, and Technology, **Sanika Rane, MD,** resident physician, Department of Internal Medicine-Pediatrics, and **Nital P. Appelbaum, PhD,** assistant dean, Division of Medical Education Research and Scholarship, and associate professor, Department of Education, Innovation, and Technology; Baylor College of Medicine

While education research often necessitates a structured approach to project completion, there is little guidance on how to systematically engage with a mentee through the process.[1] This guide, utilizing 5 Ps (prepare, plan, project, present, publish), is a step-by-step approach to completing an educational research project, highlighting the iterative process of project development and the importance of multiple phases to build foundational knowledge and produce effective scholarship.
