Children With Autism Needed for Research Study

Stanford University researchers are currently recruiting children with autism spectrum disorder (ASD) to study treatment effects on the brain.

In order to participate in this research study your child must:

* aged 3 to 12 years old
* diagnosis of autism spectrum disorder (ASD)
* willing to take a nutritional supplement (N-acetyl cysteine)
* able to complete an MRI and EEG of the brain

To help determine eligibility, please complete a screening questionnaire at https://redcap.link/autismresearch

There is no cost and you will be paid up to $50 for this study.

For more information, contact us at (650) 736-1235 or autismresearch@stanford.edu

For general information regarding questions, concerns, or complaints about research, research related injury, or the rights of research participants, please call (650) 723-5244 or toll-free 1-866-680-2906.
