

STANFORD BMT WELCOMES 2018-2019 FELLOWS

Arpita Gandhi, MD, MS

is a true alumni of the Rutgers University in New Jersey. She received a bachelor degree in Molecular Biology, a master degree in Biomedical Sciences, and medical degree all from Rutgers University. To top that, she then did her internal medicine residency at Rutgers as well. Eventually, she moved to Pennsylvania and finished a Hematology/Oncology fellowship at University of Pittsburgh Medical Center (UPMC). She has been extremely active in academic medicine and has been involved in numerous clinical projects. While she has significant bench experiment, she aspires to be a clinical investigator focusing on hematological malignancy in an academic medical center. In addition to medicine, she also enjoys painting on her spare time, and her family of two young kids.

Junaid Hussain, MD

was born and raised in Pakistan. He received his medical degree from Allama Iqbal Medical College, University of Punjab. He came to the United States in 2007 when he started his internal medicine residency at Pinnacle Health Hospitals, Harrisburg, Pennsylvania. After residency, he worked as a hospitalist at several southern states in a frontline health care setting. Eventually, he found his calling in Hematology/Oncology and finished a fellowship at Levine Cancer Institute in Carolina Healthcare System. He has a special interest in multiple myeloma and is interested in building a career focusing on this disease.

Joshua Mansour, MD

grew up in Southern California. He went to Vanderbilt University for undergraduate study in Psychology and Spanish. After graduation, he went on to receive his medical degree from Ross University School of Medicine in Dominica, and did his internal medicine residency at Medical College of Georgia and Hematology/Oncology fellowship at Medical University of South Carolina, Charleston. He has been proliferative in academia with more than 10 publications on various topics in hematology. In his “spare” time, he did research analysis on stock market, and served as a private wealth manager prior to his residency. His career goal is to become a clinical investigator.

Chaitanya Iragavarapu, MD

received his medical degree from Government Stanley Medical College in India. He finished his internal medicine residency at New York Medical College followed by a Hematology/Oncology fellowship at the same institute. He has received teaching awards in almost every single year during his residency and fellowship. He has several publications on a variety of different topics, and had a quality improvement project in streamlining oral anti-cancer medication in a community setting. He is interested in becoming a practicing hematologist focusing on transplantation.
