

# Stanford Cancer Center Clinical Innovation Fund

The Stanford Cancer Center Clinical Innovation Fund (CIF) seeks to drive, and fund innovative projects designed to elevate the quality of care, enhance the patient/provider experience, and expand Stanford Cancer Center outreach & growth, as aligned with Stanford Cancer Transformation.

Proposals should be designed to:

- Enhance the patient & provider experience
- Improve quality of care in outpatient/inpatient settings
- Promote clinical outreach and Cancer Center volume growth
- Increase value of care by reducing costs while improving patient care
- Promote physician, nursing, and APP education around cancer and overall care delivery

Previously approved proposals include:

- *Driving Value Based Use of High Cost Melanoma Therapies at Stanford Cancer Center*
- *Audio-Visual Assisted Therapeutic Ambience for Radiotherapy (AVATAR)*
- *Stanford Cancer Center Smoking Cessation Program*

## Funding

- 1-year funding period, up to \$150,000
- No cost extension after 1 year available per approval

## Eligibility

- Open to the following Cancer Center personnel:
  - Physicians & APPs
  - Nursing staff Coordinators/Clinical
