

Science Café

hosted by Stanford Cancer Institute

We invite the community to learn and chat about science with experts and health advocates. Tell family, friends, and neighbors about Science Café!

The HPV Vaccine: 20th century discovery, Today's cancer prevention

MONDAY MARCH 6, 2023

5:00 p.m. – 6:30 p.m. PT

Join by Zoom or Telephone

FEATURING

Ana Reyes

Cancer Survivor & Health Advocate

Beverly S. Mitchell, MD

Oncologist & Scientist, Stanford Cancer Institute

Nichole Tyson MD

Physician, Stanford Medicine

Join Ana Reyes, Dr. Beverly S. Mitchell, and Dr. Nichole Tyson to learn and discuss about the Human Papilloma Virus (HPV) vaccine. After decades of research and clinical trials, the HPV vaccine was approved starting in 2006. Our health experts will explain the science background and health benefits of this vaccine, especially when children are vaccinated at age 11 or 12 years old. The Centers for Disease Control and Prevention (CDC) provides [guidelines for vaccination](#).

Please [register online](#) ✓ to receive the Zoom meeting and telephone information for this event.
