

Transition Updates

Mary Helmers, RN BSN
Pediatric CF Nurse Coordinator
March 2, 2013

A Few Reminders...

When do you transition?

- The CF care team looks at all patients that are between 18-21 years of age to determine the readiness of the patient/family to transition
- The Pediatric and Adult CF Care Teams meet quarterly to discuss the patients that are ready to transition and a detailed outline of the patients history is discussed

LPCH/SUH Transition Protocol

Transition Brochure

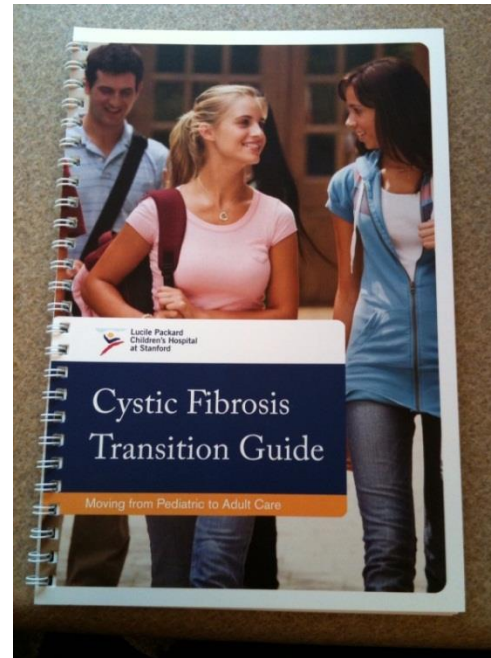

- Cystic Fibrosis Parent Advisory Council is in the process of completing a CF Transition Brochure for patients/families

CF R.I. S. E.

Responsibility. Independence. Self Care. Education.

- Gilead Transition Advisory Council
- Commenced October 2011 at NACFC
- 10 CF Centers participating in program
- Pediatric/Adult patients reviewed program
- Go Live is targeted for March/April, 2013

Don't forget your Transition Booklet

Moving on to the Adult Program

- With all the advances in CF care, we have seen our young adults grow up, go to college, get jobs, get married and have families of their own. It is our hope that your time spent in the Pediatric Center prepares you and your family for life as an independent healthy adult.
- It is our goal for all young adults to learn about and eventually manage their own CF care.
- CF Adult's need adult providers!
