STANFORD ADULT  
**Cystic Fibrosis**  
Advisory Council

SUNDAY, JANUARY 13, 2013

### 1-16-13 Agenda

Please print your own copy of the agenda and review the "attachments" to assist in cross infection control.

Anyone calling in needs to do so AHEAD of time. We've asked that call-in or WebEx members get set up 10 minutes before the scheduled meeting time.

Advisory Council visitors are welcome; however, attendees must respect the CF Center at Stanford cross infection guidelines. Please do not attend in person if you have an active viral infection or any other contagious condition. If you have CF, keep three feet between yourself and others who have CF. Avoid shaking hands with others. Additionally, individuals with CF who have ever had a confirmed positive sputum culture for *Burkholderia cepacia* (*B. cepacia*) or who have cultured Methicillin-resistant *Staphylococcus aureus* (MRSA) within the past two years, or who are currently culturing a bacterium resistant to all antibiotics (pan resistant) may not attend our sessions in person due to the cross-infection risks to others with CF.

Please see the "To attend this meeting via WebEx" section at the bottom of this agenda if you wish to attend this month's meeting via WebEx.

#### The Stanford Adult Cystic Fibrosis Advisory Council Agenda

# We Have a Facebook Page!

The screenshot shows a Facebook page for the group "Stanford Adult Cystic Fibrosis". The page header includes the group name and a search bar. The left sidebar lists various categories: GROUPS (Stanford Adult Cystic Fi..., Praying for success with VX..., Richland High Class of 197..., RICHLAND REMEMBERS, Create Group...), APPS (Games, Suburbia, Candy Crush Saga, Royal Story, CoasterVille, Sunshine Bay, Kitchen Scramble, SimCity Social, Games Feed, Bubble Safari), FRIENDS (Richland High School), PAGES (Pages Feed, Like Pages, Create a Page...), and INTERESTS (Pages and Public Figures).

The main content area features a post by Meg Boardman Dvorak, dated 3 hours ago. The post text reads: "anyone out there do a 'crossfit' work out regimen at the gym? What kind of adjustments (if any) need to be made for CF?". Below the text is a large image with the text "Top Secret!". The post has 13 views and a comment box.

Below the post is another post by Brian Eddy, dated 7 days ago. The text reads: "I believe we will get a chance to work with the MyHealth team fairly soon to drive some improvements to the content, making it more CF related. So if you haven't had a chance to look at the CaseStudy.pdf file (available in the Files tab under our photos) containing a mockup, please do, we would love to have your input".

The right sidebar shows the group's member count (68 members, 2 new) and an "Invite by Email" button. Below this are tags for "Cystic fibrosis", "Lung diseases", and "Lung transplantation". A "Suggested Groups" section lists several related groups, including "PURPLE ROSE FIGHTERS (CYSTIC FIBRO...", "Stanford Hypertrophic Cardiomyopat...", "Stanford Neuromuscular Disorders", and "CF Connect".
