Pediatric IBD and Celiac Disease Postdoctoral Support Policy

GENERAL

The Stanford Pediatric IBD and Celiac Disease Postdoctoral Support awards funds innovative maternal and child health focused on pediatric IBD and celiac disease for postdoctoral fellows from across all disciplines.

Postdoctoral Fellows ($80K/year, up to 2 years)

All projects must have a focus on pediatric IBD and celiac disease and be significantly related to the health of expectant mothers and children. The applicant can be any PhD postdoctoral fellow. Projects resulting in a shift from adjacent research to pediatric IBD and celiac disease research in the mentor’s lab, are encouraged.

GENERAL ELIGIBILITY

- All applicants must have, or plan on, having a focus on pediatric IBD and celiac disease.
- All applicants and their Primary Research Mentor must be a MCHRI Members.
- A Primary Research Mentor must be identified for postdoctoral fellows.
- All applicants must have legal residence in the United States (Applicants with H or J visas are eligible).
- All applicants must have an appointment date effective no later than the application deadline.

The following are not eligible:

- Clinician Educators (see Clinician Educator Grants Program).
- Visiting scholars to Stanford.
- Senior Research Scientists, Research Associates/Assistants.
- Former recipients of MCHRI sponsored awards who have not complied with award/reporting requirements.
- Mentor or applicant who have not cleared overdraft(s) in previous MCHRI awards prior to applying.
- Prospective postdocs with an appointment date occurring after the application deadline.

Eligibility: Postdoctoral Fellows Only

This grant provides salary-only support for postdoctoral fellows in support of a specific project related to maternal and/or child health and pediatric IBD and celiac disease research. Medical fellows (MD or equivalent) training in a clinical fellowship program should not apply through this mechanism.

- Eligibility is for all PhD postdoctoral fellows.
- Funding for year two is not guaranteed and subject to review of progress and career plans.
- Applicants who completed a first post-doctoral fellowship at an institution not affiliated with Stanford University and wish to pursue a second post-doctoral fellowship at Stanford University in a scientific area different from their first post-doctoral fellowship are eligible.
- Projects resulting in a shift from adjacent research to pediatric IBD and celiac disease research in the mentor’s lab, are encouraged.

The applicant’s primary research mentor must be a MCHRI Member and one of the following:

- MD, MD/PhD, or PhD whose primary focus is maternal and/or child health research.
- MD, MD/PhD, or PhD who wishes to expand his/her interest in maternal and/or child health research.
- The mentor should be at the Assistant Professor rank or above with a track record as a research mentor.

AWARD

Award may be used for salary & benefits only.

Award may NOT be used for (all categories):
- Travel, conference fees, tuition, classes
- Membership dues, journal subscriptions, books
- Office supplies, ITSS communications
- Poster presentations, abstract submissions
- Computer equipment (e.g. iPads, laptops, tablets, smartphones, and other similar technologies), software, or accessories
- Any other indirect research costs

1 “Children” or “Child” refers to expectant mothers, oocyte, zygote, embryo, fetus, infant, child, and/or adolescent.
Determination of Funding Level
If the applicant is successful in obtaining external funding for his/her salary, s/he must immediately notify MCHRI Administration. In such a situation, the MCHRI award will be reduced by a comparable amount.

Failure to disclose may impact eligibility for future awards sponsored by the MCHRI.

No-Cost Extensions (NCX)
NCXs are not allowed.

Submission and Award Limits
A single applicant may submit only 1 application per grant cycle.

PROPOSAL REQUIREMENTS

Biostatistical Consultation
A biostatistical consult is required for all human-based studies and those with power calculations. As part of a partnership with the Stanford Quantitative Sciences Unit (QSU), MCHRI grant applicants may request services as needed to support the success of their research project (most services at no charge to the investigator). Their expertise is available for consultation, the development of grant proposals, and implementation of funded projects. Click here to submit a request directly to the QSU. Requests should be made at least 30 days prior to submission deadline.

Mentor Support Form
A Mentor Support Form is required from the Primary Research Mentor for all postdocs. The Primary Research Mentor must be a Member of the MCHRI; a membership form is available here.

Upon creation of an Online Application Record by the applicant (no later than 4 weeks prior to submission deadline), the Primary Research Mentor will receive an automated email with a unique link to complete the Mentor Support Form. For further instructions on the Mentor Support Form please go here.

Letters of Support
- Letters of support are required from all listed non-primary research mentor(s), co-investigator(s) and collaborator(s)
- Letters are NOT blinded and must be attached at the end of the single, PDF application that is uploaded to the Online application portal.

Biosketch
A NIH Biosketch (including Personal Statement) from each research mentor and co-investigator must be obtained.

The NIH Biosketch template can be obtained here: https://grants.nih.gov/grants/forms/biosketch.htm

Budget and Budget Justification
The applicant must submit a MCHRI Budget Worksheet detailing all current and potential other sources of funding for this study.

Pediatric IBD and Celiac Disease Postdoctoral Support Budget Worksheet.

Applicants must identify all potential sources of funding as instructed on the budget form. If the potential sources of funding are not fully and clearly described, the proposal will not be reviewed.

IRB Approval
It is strongly encouraged that you submit your IRB application prior to the MCHRI application submission deadline and the IRB review meeting date stated in the MCHRI application. If there is an approval letter, it must be attached with the application. If approved for funding, the award cannot commence (fund transfer) without the approved IRB. Should there be a reason you will not have IRB approval by the award start date, please email mchri_admin@stanford.edu to request a waiver and include a justification in your request. For more information, please see: http://humansubjects.stanford.edu/

REVIEW CRITERIA

Review is based on (1) relevance to maternal and child health and (2) NIH Investigator-initiated Review Criteria:

1. Significance. Does this study address an important [maternal and child] health] problem? If the aims are achieved, how will scientific knowledge or clinical practice be advanced? What will be the effect of these studies on the concepts, methods, technologies, treatments, services, or preventions that drive this field?

2. Approach. Are the conceptual or clinical framework, design, methods, and analyses adequately developed, well integrated, well-reasoned, and appropriate to the aims of the project? Does the applicant acknowledge potential problem areas and consider alternative tactics?

3. Innovation. Is the project original and innovative? For example: Does it challenge existing paradigms
or clinical practice or address an innovative hypothesis or critical barrier to progress in the field? Does the project develop or use novel concepts, approaches, methods, tools, or technologies?

4. Investigators. Are the investigators appropriately trained and well suited to carry out this work? Is the work proposed appropriate to the experience level of the principal investigator and other researchers? Does the investigative team bring complementary and integrated expertise to the project (if applicable)?

5. Environment. Does the scientific environment contribute to the probability of success? Do the studies benefit from unique features of the scientific environment or subject populations or use useful collaborative arrangements? Is there evidence of institutional support?

SELECTION PROCESS

Proposals are reviewed by the MCHRI Scientific Review Committee.

Reviewer Comments

All applicants will receive reviewer comments regardless of award.

AWARDEE RESPONSIBILITIES

The PI will take responsibility for the research idea, development methods, supervision and conduct of the study in addition to the following:

- Faculty and Instructors keep their Community Academic Profile (CAP) updated and utilize the “Permit PubMed import” feature
- Submit reports in a timely manner, including a Progress Report within 30 days of the award end date
- Provide updates in all Progress Reports on funding status from external and/or internal sources
- Submit progress reports for up to 3 years following the award end date that will include information about grants submitted, publications, employment, and new external funding resulting from this award
- All abstracts, presentations, and publications about research supported by the Stanford Maternal and Child Health Research Institute award should include acknowledgement of MCHRI using the funding acknowledgement guidelines as follows:

  "The project described in this publication was supported by the Stanford Pediatric IBD and Celiac Disease Research Program."

Award recipients who have not acknowledged their work, as indicated above, are not eligible for future awards sponsored by the MCHRI.

RESUBMISSION

Applicants not funded may resubmit proposals for future cycles and are encouraged to work with the members of the Review Committee on revisions and/or suggestions for improvement. To be respectful of our reviewers time commitments all requests must be submitted at least one month prior to application due date. A maximum of 1 resubmission is accepted. To request a resubmission consultation with a reviewer, contact mchri_admin@stanford.edu.
