Interprofessional Clinician Program (ICP) Award

The Interprofessional Clinician Program (ICP) Award offers non-faculty staff at Stanford Medicine Children’s Health the opportunity to design, develop and implement a research study that advances and improves patient care outcomes.

Applicants may include staff from Patient Care Services, Child Life, Pharmacy, and Rehabilitation Services. Research must be focused on care of mothers, babies, and children that are novel and seek to improve clinical care.

AWARD:

The ICP award provides up to 200 hours in MCHRI Clinical Research Coordinator (CRC) services and up to 200 hours of protected time away from clinical duties through the Patient Care Services and/or the Department of Nursing Research and EBP per grant.

In addition, applicants may request funds for supplies up to $5,000 to complete their project.

A mentor must be identified for new researchers. See definition of new researcher below.

- A mentor must hold an academic appointment and capable of submitting an IRB at Stanford University. They must have documented experience in running a research study at Stanford this can be via publication, grant funding, or IRB approved protocols.

The performance period is up to 18 months and the project proposed must be feasible within this timeframe.

KEY DATES

LETTER of INTENT DEADLINE: December 2, 2022 - 11:59 PM PT

All Applicants must submit a letter of intent (LOI) with letters of support from research mentors and managers submitted as one pdf to the following link: ONLINE APPLICATION LINK, per the LOI instructions. You do not need to submit your LOI through the Research Management Group or the School of Medicine.

Applicants notified to proceed with full proposals in mid-December 2022.

FULL ICP PROPOSAL (by invitation) DEADLINE: April 17, 2023 – 11:59 PM PT (no late applications will be accepted)

Awards will be announced in June 2023. Earliest award start date is July 1, 2023. The performance period is for up to 18 months.

APPLICANT ELIGIBILITY
- All applicants must be employed full time FTE and employed at SMCH for at least 1-year within Patient Care Services, Child Life, Pharmacy, and Rehabilitation Services.

- All applicants must have, or plan on, having a focus on maternal child health research.
- Applicants must have a masters or doctoral degree.
- Faculty in the SOM are not eligible to apply for the ICP such as a physician that has an academic appointment in the School of Medicine (SOM), or a Postdoc that is working within the SOM.

Types of Research

Research must be primarily related to maternal child health. “Child” refers to the expectant mother, oocyte, zygote, embryo, fetus, infant, child, and/or adolescent.

Projects must be novel to the field and can be a continuation or expansion of the investigator’s current research.

The types of research eligible include but not limited to, clinical outcomes research, patient centered research, behavioral or qualitative research, and health services research.

Category I: New Researcher
The New Researcher is an individual that has not led or been first author on a published research study. They cannot have served as a PI/PD for a study. Category 1 applicant must identify an experienced researcher to serve as mentor and PD/PI for the IRB submission at the time they submit a Letter of Intent.

Category II: Experienced Researcher
The Experienced Researcher is an individual that has led at least ONE research study and has been first author on ONE study. This individual will submit a Letter of Intent and must identify someone that can serve as PI/PD on the IRB protocol for their study.
