

News & Notables

REGISTER: MCHRI Symposium Oct. 19, 2023 at LKSC

We look forward to having you join our 6th annual MCHRI Symposium! The all day Symposium will include session focused on: Climate Induced Change to Maternal and Child Health, Omics, PEDSnet and other data-rich research resources at Stanford. This is an opportunity to connect with the maternal and child health community across Stanford, hear from rising scientists, and attend a moderated poster hall.

Congratulations to the Inaugural Recipients of the Interprofessional Clinical Program Award!

The new program is for non-faculty staff at Stanford Medicine Children's Health, providing them the opportunity to design, develop, and implement a research study that advances patient care outcomes, along with up to 200 hours of MCHRI Clinical Research Coordinator services and up to 200 hours of protected time away from clinical duties. Recipients and their projects are: Kylie Clewes, PT, DPT, "Abnormal Vestibular-Oculomotor Function and Symptomatology in Adolescents with Concussion", and Fiona Wang, PA-C, MS, "The Impact of Intrauterine Devices on Endometrial Lining in Nulliparous Women".

2023 Global Health Seed Grant Awardees

2023 Global Health Seed Grant Recipients Announced

Stanford's Center for Innovation in Global Health (CIGH) announced a record 17 new Global Health Seed Grants, each of which tackles an emerging threat to global health, and each with the potential to save lives and improve global health equity. MCHRI is supporting three of the 2023 Global Health Seed Grant projects:

1. Clear Sarnquist, DrPH, MPH: *Task-sharing the Youth Readiness Intervention to improve the mental health outcomes of Somali war-affected youth in Kenya*
2. Valerie Chock, MD, MS, Epi: *Reducing Intraventricular Hemorrhage in Premature Infants in Brazil*
3. Kanwaljeet Anand, MBBS, PhD and Sara Singer, MBA, PhD: *Frugal Innovations in Child Cardiac Care in a Rural Health System in India*

MCHRI TIP Supported Publication

Congratulations to Detlef Obal, MD, PhD, DESA who's FY19 Transdisciplinary Initiatives Program supported research has recently been published alongside Gaoxian Chen. The original study, *Reversal of Opioid-Induced Neonatal Cardiac Malformation Using CRISPR-Cas9 Gene Editing*, has led to a publication in Frontiers in Endocrinology.
