Decoding The Personal Genome: Insights for Cancer, Aging, and Development

Your skin is not just your protective barrier and most visible organ. It is also the window into your overall health and the living laboratory that just might teach us the most about cancer and other diseases.

Join us for a fascinating evening with Howard Chang, MD, PhD, the Virginia and D. K. Ludwig Professor of Cancer Genomics and inaugural presenter of the *Marvin A. Karasek Lecture in Dermatology.

Monday, May 7 | 5:00–7:00 p.m.
Lecture | Poster Session | Reception

Paul and Mildred Berg Hall
Li Ka Shing Center for Learning and Knowledge
291 Campus Drive | Stanford

RSVP by April 25 to Vanny Koornwinder at 650.725.0814 or vanny@stanford.edu. Pre-registration is required.

*Established in 2016 by the estate of Marvin A. Karasek, PhD, this annual lecture in dermatology explores the latest breakthroughs in cutaneous biology and investigative dermatology to accelerate the pace of translational research and transform human health.
