Applicant’s Name:

This supplemental form allows you to explain why you are interested in the Stanford gastroenterology fellowship program. We encourage you to share your goals or any unique, personally important or challenging experiences and achievements. In your responses, please be as specific and succinct as possible.

This is the link to the internal tracks that are offered within our fellowship program: [http://med.stanford.edu/gastrohepfellows/Fellows_Program/Gastroenterology-ACGME/Curriculum.html](http://med.stanford.edu/gastrohepfellows/Fellows_Program/Gastroenterology-ACGME/Curriculum.html)

Please indicate which track you believe matches your interest and goals. This does not obligate you in any way to stay in this track if you match with our program. There is only one program track for our Stanford GI Fellowship through ERAS and the NRMP Match. Fellows who match with our program are then asked to choose one of these three internal tracks during the eighth month of their first year of fellowship.

Career Scientist Track

Translational and Patient–Oriented Research Track

Clinician Educator Track

1. What are your present interests and long-term career goals? How will the fellowship at Stanford University help you achieve your personal career goals?

2. Describe any significant research experiences and how they relate to your future plans. Please specify your role in formulating the rationale, results, conclusions and the final publication.

3. Describe any patient-related, teaching, and service-oriented activities or special achievements that you want us to consider.

4. Is there any particular Stanford faculty you would like to meet during your visit? If you do not know the name of the faculty, please tell us what type of research you would be interested in pursuing during your fellowship at Stanford so that we can identify potential mentors for you.

*Please put your name on this form as well as noted in the document name.
**Please start the document file name with last name followed by first name or initial.
