

The Division of Infectious Diseases and Geographic Medicine at Stanford University School of Medicine is recruiting for a **Musculoskeletal Infectious Diseases Fellow** for the academic 2023–2024 year.

This one-year, non-ACGME accredited fellowship provides rigorous, specialized training in the practice of musculoskeletal infectious diseases. The fellowship focuses on comprehensive clinical training in musculoskeletal infections, working in a collaborative setting with orthopedic surgeons and wound care providers. Clinical service will include several rotations in both the inpatient and outpatient setting, with the remainder of the year dedicated to electives and protected research time. During the dedicated research time fellows will have the opportunity to lead projects in medical education, quality improvement, leadership, and clinical research.

Stanford Healthcare is consistently ranked as one of the best hospitals in the United States by U.S. News & World Report and serves as the primary teaching hospital for the Stanford University School of Medicine. This is a unique opportunity to work closely in an emerging subspecialty practice within the field of infectious diseases. In addition to being one of the best hospitals in the United States, Stanford Healthcare is a leader in the field of orthopedics and serves as a referral center for complex musculoskeletal infections.

Eligible applicants would have completed at least two years of an ACGME-accredited ID fellowship program by the start of the fellowship and be either board certified or board eligible in infectious diseases, and board certified in internal medicine.

We encourage any interested fellows to apply for this unique training opportunity. Stanford is an equal opportunity employer and encourages applications from women and minorities.

To apply, please submit the following materials by September 15<sup>th</sup>, 2022; applications will be considered on a rolling basis.

- C.V.
- Personal statement
- Names and contact information for three reference letter writers
  - ID Fellowship Program Director to provide one of the above reference letters
  - Letters to be sent from the letter writers to the contact below

Please email application materials to:
